Salesforce Order Management Administrator Accredited Professional Sample Questions (Q64-Q69):

NEW QUESTION # 64

How can an administrator synchronize licenses from the production org when preparing a sandbox for development?

- A. Export a Change Set
- B. Run the Match Production Licenses to Sandbox without a Refresh tool in Setup
- C. Use a custom shell script
- D. Import a Change Set

Answer: B

Explanation:

The best way for an administrator to synchronize licenses from the production org when preparing a sandbox for development is to run the Match Production Licenses to Sandbox without a Refresh tool in Setup. This tool allows administrators to match their sandbox licenses with their production licenses without refreshing their sandbox. This way, the administrator can ensure that the sandbox has the same number and type of licenses as the production org, and avoid any license-related issues when developing or testing in the sandbox. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.data_sandbox_licenses.htm&type=5

NEW QUESTION # 65

Which of the following options represent two ways that an administrator can utilize APIs in Workbench to query OrderSummaries?

- A. Connect API and Platform API
- B. Apex API and Connect API
- C. Composite API and Invocable API
- D. Invocable API and Apex API
- E. Platform API and Composite API

Answer: E

Explanation:

The Platform API and the Composite API are two ways that an administrator can use APIs in Workbench to query Order Summaries. The Platform API allows querying, creating, updating, deleting, and searching records in Salesforce. The Composite API allows combining multiple requests into a single call, which can improve performance and reduce complexity.

NEW QUESTION # 66

A customer orders two shirts and one jacket in B2C Commerce. The Order is ingested into Order Management. However, the customer decides to cancel the order prior to fulfillment. What object is created and linked to the Order Summary?

- A. Return Order
- **B. Change Order**
- C. Suspend Order
- D. Cancel Order

Answer: B

NEW QUESTION # 67

An administrator has created a new currency field on the Fulfillment Order object and wants to roll up the total to the Order Summary object. When creating a rollup field on the Order Summary object, Fulfillment Order does not appear as an option. Why is this?

- A. The Order Summary object has reached the limit of Rollup Summary fields
- **B. The Order Summary field on the Fulfillment Order object is a Lookup**
- C. Rollup Fields cannot sum Currency Fields
- D. The Rollup Summary field must be created on the Fulfillment Order object with the Order Summary object as the parent

Answer: B

Explanation:

The reason why Fulfillment Order does not appear as an option when creating a rollup field on the Order Summary object is that the Order Summary field on the Fulfillment Order object is a Lookup. A Lookup field is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. To create a rollup summary field, the relationship between the objects must be master-detail, which means that the child record cannot exist without its parent record. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.custom_field_types.htm&type=5
https://help.salesforce.com/s/articleView?id=sf.fields_about_roll_up_summary_fields.htm&type=5

NEW QUESTION # 68

Which two objects are found within Order Management?

- **A. Fulfillment Order**
- B. Packing Manifest
- C. Receipt
- D. Cart
- **E. Payment Summary**

Answer: A,E

Explanation:

Two objects that are found within Order Management are:

Fulfillment Order. A Fulfillment Order is a record that represents a group of products in an order that are fulfilled together from the same location. A Fulfillment Order has a lookup relationship to the Order Summary object, and it contains information such as the fulfillment location, delivery method, status, etc.

Payment Summary. A Payment Summary is a record that represents a payment made for an order or part of an order. A Payment Summary has a lookup relationship to both Order Summary and Invoice objects, and it contains information such as the payment amount, method, status, etc.
