Latest NSE7_SSE_AD-25 Braindumps Free & NSE7_SSE_AD-25 Reliable Exam Prep

our NSE7_SSE_AD-25 exam questions beckon exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our NSE7_SSE_AD-25 simulating exam is the best. Our effort in building the content of our NSE7_SSE_AD-25 Study Materials lead to the development of learning guide and strengthen their perfection. To add up your interests and simplify some difficult points, our experts try their best to design our study material and help you understand the learning guide better.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which two deployment methods are used to connect a FortiExtender as a FortiSASE LAN extension?
(Choose two.)

- A. Configure an IPsec tunnel on FortiSASE to connect to FortiExtender.
- B. Enter the FortiSASE domain name in the FortiExtender GUI as a static discovery server
- C. Enable Control and Provisioning Wireless Access Points (CAPWAP) access on the FortiSASE portal.
- D. Connect FortiExtender to FortiSASE using FortiZTP

Answer: B,D

Explanation:

There are two deployment methods used to connect a FortiExtender as a FortiSASE LAN extension:

* Connect FortiExtender to FortiSASE using FortiZTP:

* FortiZero Touch Provisioning (FortiZTP) simplifies the deployment process by allowing FortiExtender to automatically connect and configure itself with FortiSASE.

* This method requires minimal manual configuration, making it efficient for large-scale deployments.

* Enter the FortiSASE domain name in the FortiExtender GUI as a static discovery server:

* Manually configuring the FortiSASE domain name in the FortiExtender GUI allows the extender to discover and connect to the FortiSASE infrastructure.

* This static discovery method ensures that FortiExtender can establish a connection with FortiSASE using the provided domain name.

FortiOS 7.6 Administration Guide: Details on FortiExtender deployment methods and configurations.

FortiSASE 23.2 Documentation: Explains how to connect and configure FortiExtender with FortiSASE using FortiZTP and static discovery.

NEW QUESTION # 46

When viewing the daily summary report generated by FortiSASE, the administrator notices that the report contains very little data. What is a possible explanation for this almost empty report?

- A. There are no security profile group applied to all policies.
- B. Log allowed traffic is set to Security Events for all policies.
- C. Digital experience monitoring is not configured.
- D. The web filter security profile is not set to Monitor

Answer: B

Explanation:

If the daily summary report generated by FortiSASE contains very little data, one possible explanation is that the "Log allowed traffic" setting is configured to log only "Security Events" for all policies. This configuration limits the amount of data logged, as it only includes security events and excludes normal allowed traffic.

* Log Allowed Traffic Setting:

* The "Log allowed traffic" setting determines which types of traffic are logged.

* When set to "Security Events," only traffic that triggers a security event (such as a threat detection or policy violation) is logged.

* Impact on Report Data:

* If the log setting excludes regular allowed traffic, the amount of data captured and reported is significantly reduced.

* This results in reports with minimal data, as only security-related events are included.

References:

FortiOS 7.6 Administration Guide: Provides details on configuring logging settings for traffic policies.

FortiSASE 23.2 Documentation: Explains the impact of logging configurations on report generation and data visibility.

NEW QUESTION # 47

Which two settings are automatically pushed from FortiSASE to FortiClient in a new FortiSASE deployment with default settings?
(Choose two.)

- A. FortiSASE certificate authority (CA) certificate
- B. zero trust network access (ZTNA) tags
- C. tunnel profile
- D. real-time protection

Answer: A,C

Explanation:

In a default FortiSASE deployment, the tunnel profile (for secure connectivity) and the FortiSASE CA certificate (for SSL inspection and trusted communication) are automatically pushed to FortiClient endpoints.

NEW QUESTION # 48

Which two benefits come from integrating SoCaaS with FortiSASE? (Choose two answers)

- A. Provides bandwidth usage analytics
- B. Eliminates the need of endpoint protection software
- C. Continuous threat monitoring of all connected endpoints
- D. Centralized visibility of all threat events

Answer: C,D

NEW QUESTION # 49

What is required to enable the MSSP feature on FortiSASE?

- A. Role-based access control (RBAC) must be assigned to identity and access management (IAM) users using the FortiCloud IAM portal.
- B. Multi-tenancy must be enabled on the FortiSASE portal.
- C. The MSSP add-on license must be applied to FortiSASE.
- D. MSSP user accounts and permissions must be configured on the FortiSASE portal.

Answer: A

Explanation:

To enable the MSSP feature on FortiSASE, you must use the FortiCloud IAM portal to assign RBAC permissions to users. This grants appropriate access to manage multiple tenants or customer accounts securely.

NEW QUESTION # 50

.....

We have installed the most advanced operation system in our company which can assure you the fastest delivery speed, to be specific, you can get immediately our NSE7_SSE_AD-25 training materials only within five to ten minutes after purchase after payment. At the same time, your personal information will be encrypted automatically by our operation system as soon as you pressed the payment button, that is to say, there is really no need for you to worry about your personal information if you choose to buy the NSE7_SSE_AD-25 Exam Practice from our company. We aim to leave no misgivings to our customers so that they are able to devote themselves fully to their studies on NSE7_SSE_AD-25 guide materials: Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator and they will find no distraction from us. I suggest that you strike while the iron is hot since time waits for no one.
