## COF-C03 Latest Exam Papers & Reliable COF-C03 Test Question

The latest COF-C03 exam torrent covers all the qualification exam simulation questions in recent years, including the corresponding matching materials at the same time. Do not have enough valid COF-C03 practice materials, can bring inconvenience to the user, such as the delay progress, learning efficiency and to reduce the learning outcome was not significant, these are not conducive to the user persistent finish learning goals. Therefore, to solve these problems, the COF-C03 test material is all kinds of qualification examination, the content of the difficult point analysis, let users in the vast amounts of find the information you need in the study materials, the COF-C03 practice materials improve the user experience, to lay the foundation for good grades through qualification exam.

## Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q180-Q185):

### NEW QUESTION # 180

What is the relationship between a Query Profile and a virtual warehouse?

- A. A Query Profile can help users right-size virtual warehouses.
- B. A Query Profile automatically scales the virtual warehouse based on the query complexity.
- C. A Query Profile can help determine the number of virtual warehouses available.
- D. A Query Profile defines the hardware specifications of the virtual warehouse.

**Answer: A**

Explanation:

A Query Profile provides detailed execution information for a query, which can be used to analyze the performance and behavior of queries. This information can help users optimize and right-size their virtual warehouses for better efficiency. References: [COF-C02] SnowPro Core Certification Exam Study Guide

### NEW QUESTION # 181

Which task is supported by the use of Access History in Snowflake?

- A. Compliance auditing
- B. Data backups
- C. Performance optimization
- D. Cost monitoring

**Answer: A**

Explanation:

Access History in Snowflake is primarily utilized for compliance auditing. The Access History feature provides detailed logs that track data access and modifications, including queries that read from or write to database objects. This information is crucial for organizations to meet regulatory requirements and to perform audits related to data access and usage.

Role of Access History: Access History logs are designed to help organizations understand who accessed what data and when. This is particularly important for compliance with various regulations that require detailed auditing capabilities.

How Access History Supports Compliance Auditing:

By providing a detailed log of access events, organizations can trace data access patterns, identify unauthorized access, and ensure that data handling complies with relevant data protection laws and regulations.

Access History can be queried to extract specific events, users, time frames, and accessed objects, making it an invaluable tool for compliance officers and auditors.

### NEW QUESTION # 182

If a virtual warehouse runs for 61 seconds, shuts down, and then restarts and runs for 30 seconds, for how many seconds is it billed?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

Explanation:

Snowflake's billing for virtual warehouses is per-second, with a minimum of 60 seconds for each time the warehouse is started or resumed. Therefore, if a warehouse runs for 61 seconds, it is billed for 61 seconds. If it is then shut down and restarted, running for an additional 30 seconds, it is billed for another 60 seconds (the minimum charge for a restart), totaling 121 seconds.

### NEW QUESTION # 183

What happens to the underlying table data when a CLUSTER BY clause is added to a Snowflake table?

- A. Data may be colocated by the cluster key within the micro-partitions to improve pruning performance
- B. Smaller micro-partitions are created for common data values to allow for more parallelism
- C. Larger micro-partitions are created for common data values to reduce the number of partitions that must be scanned

- D. Data is hashed by the cluster key to facilitate fast searches for common data values

**Answer: A**

Explanation:

When a CLUSTER BY clause is added to a Snowflake table, it specifies one or more columns to organize the data within the table's micro-partitions. This clustering aims to colocate data with similar values in the same or adjacent micro-partitions. By doing so, it enhances the efficiency of query pruning, where the Snowflake query optimizer can skip over irrelevant micro-partitions that do not contain the data relevant to the query, thereby improving performance.

#### **NEW QUESTION # 184**

What information does the Query Profile provide?

- **A. Statistics for each component of the processing plan**
- B. Detailed Information about the database schema
- C. Real-time monitoring of the database operations
- D. Graphical representation of the data model

**Answer: A**

#### **NEW QUESTION # 185**

.....

If you want to prepare for your exam in a paper version, our COF-C03 test materials can do that for you. COF-C03 PDF version is printable and you can print them into hard one, and take some notes on them. In addition, we offer you free demo to have a try, so that you can have a better understanding of what you are going to buy. We are pass guarantee and money back guarantee for COF-C03 Exam Dumps, if you fail to pass the exam, we will give you full refund. Online and offline chat service are available, if you have any questions about COF-C03 exam materials, you can have a conversation with us, and we will give you reply soon as possible.
