The passing rate of our 3V0-32.23 training quiz is 99% and the hit rate is also high. Our professional expert team seizes the focus of the exam and chooses the most important questions and answers which has simplified the important 3V0-32.23 information and follow the latest trend to make the client learn easily and efficiently. We update the 3V0-32.23 Study Materials frequently to let the client practice more. We provide the function to stimulate the 3V0-32.23 exam and the timing function of our 3V0-32.23 study materials to adjust your speed to answer the questions. You will pass the 3V0-32.23 exam easily.

By offering these outstanding 3V0-32.23 dump, we have every reason to ensure a guaranteed exam success with a brilliant percentage. The feedback of our customers is enough to legitimize our claims on our 3V0-32.23 exam questions. Despite this, we offer you a 100% return of money, if you do not get through the exam, preparing for it with our 3V0-32.23 Exam Dumps. No amount is deducted while returning the money.

Formats of Dupleader Updated VMware 3V0-32.23 Exam Practice Questions

3V0-32.23 test guide is an examination material written by many industry experts based on the examination outlines of the calendar year and industry development trends. Its main purpose is to help students who want to obtain the certification of 3V0-32.23 to successfully pass the exam. Compared with other materials available on the market, the main feature of 3V0-32.23 Exam Materials doesn't like other materials simply list knowledge points. According to our statistics on the data so far, the passing rate of the students who have purchased one exam exceeds 99%, which is enough to see that 3V0-32.23 test guide is a high-quality product that can help you to realize your dream.

VMware 3V0-32.23 exam is one of the most advanced cloud management and automation certification exams in the IT industry. It is designed to test the skills and knowledge of IT professionals in designing and implementing complex cloud management and automation solutions using VMware technologies. Passing 3V0-32.23 exam is a testament to the expertise and proficiency of IT professionals in cloud management and automation.

Passing the VMware 3V0-32.23 Certification Exam is a great way to demonstrate your expertise and proficiency in cloud management and automation using VMware technologies. It can also help you advance your career by opening up new job opportunities and increasing your earning potential. Whether you are new to cloud management and automation or have years of experience, the VMware 3V0-32.23 certification exam is a valuable investment in your professional development.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q42-Q47):

NEW QUESTION # 42

An architect is designing an Aria Automation Config (SaltStack Config) for configuration management and looking to integrate with Aria Automation to meet the following conditions:

Multi-Tenancy in Aria Automation

Automated SaltStack Minion agent installation via Cloud Templates resource type What two aspects does the architect need to include? (Choose two.)

- A. The Aria Automation Config (SaltStack Config) can be associated with multi-tenancy.
- B. The integration process will install & enable the SaltStack config service.
- C. Verify Aria Automation administrator credentials and SaltStack Config root-level access.
- D. The Aria Automation Config (SaltStack Config) can be only associated with a single tenancy.
- E. The Aria Automation Config (SaltStack Config) service installed via standalone method can be accessed via Aria Automation Service Console.

Answer: A,B

Explanation:

The integration process ensures SaltStack Config is installed and enabled for configuration management.

SaltStack Config supports multi-tenancy, allowing use within multi-tenant Aria Automation environments and automated agent installation via Cloud Templates.

NEW QUESTION # 43

A customer wants to design and deploy Workspace ONE Access to provide an SSO for VMware Aria Suite users. The customer has two data centers with low bandwidth and high latency constraints. The customer requires mitigation against data center failure. What two design decisions would achieve the customer's requirements? (Choose two.)

- A. Replicate Workspace ONE Access cluster between sites and protect it using VMware Site Recovery Manager.
- B. Deploy SQL Always-on Availability Group cluster across both sites.
- C. Deploy a Workspace ONE Access cluster with internal PostgreSQL in one site.
- D. Deploy a stretched PostgreSQL database cluster across both sites.
- E. Deploy a stretched Workspace ONE Access cluster across both sites, connected to stretched database cluster.

Answer: A,B

Explanation:

Deploying SQL Always-on Availability Group across both sites provides database availability and failover protection without the latency and bandwidth issues of a stretched cluster. Replicating the Workspace ONE Access cluster and using VMware Site Recovery Manager enables orchestrated failover in case of a data center failure, addressing the requirement for site failure mitigation in a high-latency, low-bandwidth environment.

NEW QUESTION # 44

A cloud architect is tasked with designing a Guest virtual machine (VM) request form for an organization's new vRealize Automation (vRA) implementation. Its current PowerCLI VM request tool uses a PowerShell script that retrieves user IDs from Active Directory, which is the same identity source for vRealize Automation. The intent of the script is to retrieve and display John Smith when the actual value in Active Directory is JSmith01.

What is the most secure way to utilize the same script for user's display name in the vRA request form?

- A. Create a drop-down custom property with external values that returns a display name using the existing PowerShell script.
- B. Design a schedule vRealize Orchestrator (vRO) workflow to execute the PowerShell Script and store values in vRO, then utilize the vRA external drop-down to retrieve these values from vRO.

- C. Design a schedule vRealize Orchestrator workflow to execute the PowerShell Script and update the vRealize Automation drop-down custom property with static values.
- D. Design a display custom property in the vRA 'Administration/Active Directory Policy' that maps to the correct organizational unit.

Answer: A

NEW QUESTION # 45

Which scenario aligns with the use of VMware Identity Manager in a Cloud Management logical design?

- A. Tracking employee attendance
- B. Securing remote access to cloud resources
- C. Managing inventory in a retail store
- D. Designing a new company logo

Answer: B

NEW QUESTION # 46

A company has a main office, three regional offices, and six branches offices.

The network links are configured as shown in the exhibit. View the Exhibit:

During information gathering, an architect records:

The regional offices are located in secure bunkers. The CTO feels this would be a good location for all the vRealize Automation components to meet their BC/DR objectives. However, the CTO is looking for the best design while maintaining their very high security requirements.

The branch offices are located in very remote locations with unpredictable network performance.

Reliance on the main and regional offices needs to be minimal while still allowing provisioning of machines in the branch offices. The branch offices consist of three host vSphere clusters.

There is synchronous vSphere Metro Storage Cluster (vMSC) between the regional offices as well as replicated backups between the regional offices with replication running nightly. The CEO wants to have the lowest possible RPO and RTO of the vRealize portal including the ability to manage already provisioned machines while NOT increasing the amount of data being replicated between the regional offices as much as possible.

Referring to the exhibit, which two design specifications can the architect recommend to meet requirements? (Choose two.)

- A. distributed vRealize Automation management solution across the regional offices
- B. distributed vRealize Automation management solution in the main office
- C. vSphere agents in the regional offices that manage the regional and branch offices
- D. distributed vRealize Automation management solution in each of the regional offices
- E. vSphere agents in each of the branch offices

Answer: A,C

NEW QUESTION # 47

.....

Our 3V0-32.23 exam questions not only includes the examination process, but more importantly, the specific content of the exam. In previous years' examinations, the hit rate of 3V0-32.23 learning quiz was far ahead in the industry. We know that if you really want to pass the exam, our study materials will definitely help you by improving your hit rate as a development priority. After using 3V0-

32.23 training prep, you will be more calm and it is inevitable that you will get a good result.
