If you have any questions that need to be consulted, you can contact our staff at any time to help you solve problems related to our EAEP2201 qualification test. Our thoughtful service is also part of your choice of buying our learning materials. Once you choose to purchase our EAEP2201 test guides, you will enjoy service.

Esri Enterprise Administration Professional 2201 Sample Questions (Q37-Q42):

NEW QUESTION # 37

A GIS administrator needs to add a member to the ArcGIS Enterprise organization. This member will perform publishing and editing workflows.

Which user type and role should the member be assigned?

- A. The Creator user type and the Publisher role
- B. The Editor user type and the Publisher role
- C. The GIS Professional user type and the Data Editor role

Answer: A

Explanation:

In ArcGIS Enterprise, the Creator user type includes full privileges for content creation, sharing, and administration. When paired with the Publisher role, it grants the user the ability to publish hosted feature layers, map image layers, and other services, as well as perform editing tasks on existing data. This combination is specifically designed for users who require both publishing and editing capabilities.

The Editor user type is limited to editing and cannot publish content. The GIS Professional user type provides access to ArcGIS Pro but, when assigned the Data Editor role, restricts the user from publishing content.

Therefore, only the Creator user type with Publisher role supports both publishing and editing workflows.

Reference Source: ArcGIS Enterprise Administrator Guide - User types and roles

NEW QUESTION # 38

An organization is considering deploying ArcGIS Enterprise. A needs assessment shows that all users need access to the following applications and capabilities:

- * ArcGIS Pro
- * ArcGIS StoryMaps
- * View, edit and create portal content items

Which user type should be assigned for these users?

- A. Creator
- B. Editor
- C. GIS Professional

Answer: C

Explanation:

To meet the listed requirements, the appropriate user type is GIS Professional. This user type includes:

* Access to ArcGIS Pro (essential for desktop GIS work and analysis)

* Full content management and sharing privileges in the portal

* Use of premium apps like ArcGIS StoryMaps, Experience Builder, and others. The Creator user type provides access to web-based apps and content but does not include ArcGIS Pro without an additional add-on license. The Editor user type is limited to viewing and editing existing data and does not support app creation or use of ArcGIS Pro.

Reference Source: ArcGIS Enterprise user type documentation - Application access matrix

NEW QUESTION # 39

A GIS administrator has a group of users who share maintenance responsibilities for a critical application.

The administrator needs to allow all users to edit the application without transferring ownership.

Which option should the administrator use?

- A. A shared update group
- B. A collaboration group
- C. An administrative group
- D. A public group

Answer: A

Explanation:

A shared update group allows group members to edit each other's items without needing to transfer ownership. This is ideal for collaborative editing and shared responsibility for applications, maps, or dashboards.

From Esri documentation:

"Shared update groups allow multiple members to update items shared with the group, even if they do not own the items."

- * Option B doesn't exist as a group type in ArcGIS Enterprise.
- * Option C allows viewing, but not editing others' content.
- * Option D applies to distributed collaboration, not shared editing.

Reference: ArcGIS Enterprise - Group Settings for Collaborative Management

NEW QUESTION # 40

An organization buys an additional 25 licenses for ArcGIS Pro and needs to assign the licenses to ArcGIS Enterprise users. Which license file is required to make those assignments?

- A. Any existing license file used previously
- B. An updated license file with only the 25 additional ArcGIS Pro licenses
- C. New license file with just the 25 ArcGIS Pro licenses
- D. An updated license file with 25 additional ArcGIS Pro licenses

Answer: D

Explanation:

When an organization purchases additional licenses (e.g., ArcGIS Pro), a new combined license file must be generated that includes both the existing entitlements and the newly purchased ones. This updated license file reflects the total number of licenses (original + new).

From the ArcGIS Enterprise Licensing documentation:

"When downloading a new license file from My Esri to assign additional licenses, the license file must reflect the complete set of user types and extensions required. You must generate a new license file that includes both the existing and new entitlements."

- * Option A is incorrect because a license file with only the new licenses would overwrite the previous file.
- * Option B is incorrect for the same reason - partial license files are not valid for merging with existing licenses.
- * Option D does not accommodate the new licenses.

Reference: ArcGIS Enterprise - Managing Portal License Files and User Entitlements

NEW QUESTION # 41

An ArcGIS Pro user receives the following error when trying to publish to ArcGIS Enterprise:

"Unable to publish to ArcGIS Server, error 001369: failed to create service" The ArcGIS Server logs reveal:

- * Failed to create service
- * Internal server error
- * Unable to instantiate class for XML schema type
- * Invalid XML registry file
- * 390 ArcSOC processes running
- * Server uses only half of available RAM

Which action should the administrator perform?

- A. Increase the non-interactive desktop heap size
- B. Scale up the ArcGIS Server machine resources
- C. Use more dedicated instances instead of shared

Answer: C

Explanation:

This issue is consistent with desktop heap exhaustion, especially when a high number of ArcSOC processes (e.g., 390) are running

on Windows. Desktop heap is a limited memory resource used for GUI and system object management. When it runs out, services can fail to start and produce XML-related errors.

Increasing the non-interactive desktop heap size in the Windows registry resolves this.

From Esri documentation:

"If the Windows desktop heap size is too low, ArcGIS Server may be unable to create new processes (ArcSOC), causing service failures and related internal server errors."

* Option B is a generic fix and won't address the specific heap exhaustion issue.

* Option C doesn't help if the root issue is OS-level heap size limits.

Reference: ArcGIS Enterprise - ArcSOC process limits and Windows desktop heap size

NEW QUESTION # 42

.....

Most customers reflected that our Esri exam questions cover most of questions of actual test. So if you decided to choose EAEP2201 as your study materials, you just need to spend your spare time to practice EAEP2201 Dumps PDF and remember the points of pass exam guide.
