3V0-22.25 Training Pdf - 3V0-22.25 Exam Prep

We all know that Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) exam dumps are an important section of the Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) exam that is purely based on your skills, expertise, and knowledge. So, we must find quality 3V0-22.25 Questions that are drafted by industry experts who have complete knowledge regarding the Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) certification exam and can share the same with those who want to clear the 3V0-22.25 exam. The best approach to finding Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) exam dumps is to check the Braindumpsqa that is offering the Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) practice questions.

VMware Advanced VMware Cloud Foundation 9.0 Operation Sample Questions (Q39-Q44):

NEW QUESTION # 39

An architect is designing the log archiving strategy for VCF Operations for Logs. The requirement is to retain searchable logs on high-performance storage for 30 days, and then move them to low-cost storage for 1 year for compliance.

Retention Policy

Hot Tier: 30 Days (Queryable instantly)

Cold Tier: 365 Days (Archived)

Configuration

Cluster Storage: 2 TB vSAN

Archive Location: NFS Share on NAS

Which feature should be configured to meet this requirement?

- A. Use a cron job to SCP the data files to the NAS daily.

- B. Enable "Data Archiving" in VCF Operations for Logs, point it to the NFS mount, and set the system to archive data as it rotates out of the active bucket.
- C. Increase the vSAN storage to 50 TB to keep all 365 days in the Hot Tier.
- D. Configure "Data Aging" in SDDC Manager to move logs to AWS S3.

Answer: B

NEW QUESTION # 40

When forwarding logs to a legacy syslog server, the destination system administrator complains that the logs are arriving without the hostname in the header, making them impossible to attribute.

Which setting in the VCF Operations for Logs forwarding rule addresses this format issue?

- A. "Disk Buffer Size".
- B. "Worker Count".
- C. "Enable SSL".
- D. "Syslog Format" (e.g., RFC 5424 vs RFC 3164). The administrator might need to toggle the format or check/uncheck "Add source" (or similar header option) to ensure the proprietary fields are flattened into a standard syslog header that the legacy receiver understands.

Answer: D

NEW QUESTION # 41

A Cloud Admin is configuring RBAC for a "Multi-Department" dashboard strategy.

Setup

- User Group: "HR-Admins"
- User Group: "Finance-Admins"
- Dashboard: "HR-Overview" (Shared with HR-Admins)
- Dashboard: "Finance-Overview" (Shared with Finance-Admins)

Issue

A user in the "HR-Admins" group logs in. They can see the "HR-Overview" dashboard in the menu, but all the widgets (charts) on the dashboard say "No Data" or are blank.

What is the mostly likely configuration gap preventing the data display?

- A. The user needs to install the "HR Management Pack".
- B. The "HR-Admins" group was assigned the correct Role, but the Object Group (Scope) assigned to them was empty or incorrect (e.g., they don't have permission to see the HR VMs that populate the widgets).
- C. The widgets are configured to "Self Provider" mode.
- D. The dashboard was not "Published".

Answer: B

NEW QUESTION # 42

After successfully adding two new Data Nodes to the cluster, the administrator notices that the disk usage on the new nodes is near 0%, while the old nodes are still at 80%.

Which system process must complete to resolve this imbalance?

- A. The "Rebalance" (GemFire Rebalancing) operation. In modern versions, this often starts automatically or is triggered via the Admin UI to redistribute the existing metric shards onto the new nodes.
- B. The "Garbage Collection" process, which runs nightly.
- C. The administrator must manually vMotion the VMDKs to balance storage.
- D. The system requires a "Full Restart" of the cluster to recognize the new disk space.

Answer: A

NEW QUESTION # 43

An administrator wants to use VCF Automation to consume infrastructure defined in existing Terraform configurations (.tf files).

Which statement accurately describes the Terraform Integration capability in VCF Automation?

- A. It requires the Terraform binary to be installed on the vCenter Server.
- B. It converts Terraform code into VCF Automation YAML automatically.
- **C. It allows administrators to add a "Terraform Configuration" resource to the design canvas. VCF Automation connects to a Git repository containing the Terraform files, and at deployment time, it executes the terraform plan/apply commands using a designated Terraform Runtime (Kubernetes pod or separate VM agent).**
- D. It only supports AWS; it cannot run Terraform against vSphere.

Answer: C

NEW QUESTION # 44

.....

Each format of the VMware Certification Exams not only offers updated exam questions but also additional benefits. A free trial of the Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) exam dumps prep material before purchasing, up to 1 year of free updates, and a money-back guarantee according to terms and conditions are benefits of buying Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) real questions today. A support team is also available 24/7 to answer any queries related to the Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) exam dumps.
