

# Pegasystems PEGACPRSA22V1 Questions - Pass Exam With Ease (2026)

---

## Pegasystems PEGACPSSA23V1 Practice Questions

### Certified Pega Senior System Architect '23 Exam

Order our PEGACPSSA23V1 Practice Questions Today and Get Ready to Pass with Flying Colors!

### PEGACPSSA23V1 Practice Exam Features | QuestionsTube

- Latest & Updated Exam Questions
- Subscribe to FREE Updates
- Both PDF & Exam Engine
- Download Directly Without Waiting

<https://www.questionstube.com/exam/pegacpssa23v1/>

At QuestionsTube, you can read PEGACPSSA23V1 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Pegasystems PEGACPSSA23V1 practice questions. These free demo questions are parts of the PEGACPSSA23V1 exam questions. Download and read them carefully, you will find that the PEGACPSSA23V1 test questions of QuestionsTube will be your great learning materials online. Share some

BTW, DOWNLOAD part of GetValidTest PEGACPRSA22V1 dumps from Cloud Storage: <https://drive.google.com/open?id=1UdZs-ajxQhhZr6xyt0ykSLL7VaL2Un2K>

Although the Pegasystems PEGACPRSA22V1 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our Pegasystems PEGACPRSA22V1 Study Materials, you will cope with it like a piece of cake. So our PEGACPRSA22V1 learning questions will be your indispensable practice materials during your way to success.

With the development of the electronic equipment, there are a lot of changes in the designs of our PEGACPRSA22V1 pass-sure torrent. The most impressive version is the APP online version. Normally, it can be used on all kinds of digital devices. But it also has the special advantage that the online version can be used when you are not online, As long as you use it for the first time in a networked environment, you can use the online version of our PEGACPRSA22V1 learning guide from anywhere without network connection. I believe the online version of our PEGACPRSA22V1 exam questions will be a good choice for you

## PEGACPRSA22V1 Test Passing Score - PEGACPRSA22V1 PDF

It is easy for you to pass the exam because you only need 20-30 hours to learn and prepare for the exam. You may worry there is

little time for you to learn the PEGACPRSA22V1 Study Tool and prepare the exam because you have spent your main time and energy on your most important thing such as the job and the learning and can't spare too much time to learn. But if you buy our Certified Pega Robotics System Architect 22 test torrent you only need 1-2 hours to learn and prepare the exam and focus your main attention on your most important thing.

## **Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q15-Q20):**

### **NEW QUESTION # 15**

You must configure an application to store encrypted login credentials in the user's local profile. You also need to automate the login using the encrypted credentials. How do you fulfill this requirement without creating an automation?

- A. Create a robot activity that performs the application login.
- B. Set the necessary application credential properties before interrogating the target controls.
- **C. Interrogate the target controls and set the necessary application credential properties.**
- D. Interrogate the target controls and create a script to perform the login functionality.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the Credential Manager is designed to securely store user credentials (such as usernames and passwords) in an encrypted form within the user's local profile. When properly configured, Pega Robotics can automatically log in to target applications without creating a separate automation.

From the Pega Robotics System Design and Implementation Guide (Application Configuration and Credential Management section): "When an application requires credential-based authentication, developers can configure the application's login controls during interrogation and assign the appropriate credential properties (Username and Password).

Once defined, credentials are stored securely in the user's local profile and automatically retrieved and decrypted during runtime to perform the login without explicit automation logic." Detailed Reasoning:

\* During interrogation, the login controls (such as username and password fields) are identified and linked to the credential properties of the application object.

\* Pega Robotics automatically handles the retrieval and secure decryption of credentials stored in the local user profile at runtime.

\* This eliminates the need for any manual automation steps or scripts for logging in.

Option Analysis:

\* A. Incorrect - Robot activities are server-executed tasks, not used for local application authentication.

\* B. Incorrect - Credentials must be configured after interrogating target controls to map them correctly.

\* C. Correct - Interrogating the login fields and setting the application credential properties allows Pega Robotics to securely manage and automate login automatically.

\* D. Incorrect - Creating a script defeats the purpose of using the built-in credential manager.

Thus, Option C is the correct method for configuring automatic login using encrypted credentials.

Reference: Extracted from Pega Robotics System Design and Implementation Guide, Credential Manager and Application Authentication section (Pega Robotics 19.1 and later).

### **NEW QUESTION # 16**

Which of the following controls cannot be added to the Windows form?

- A. ComboBox
- B. PictureBox
- C. ProgressBar
- **D. Pointer**

**Answer: D**

### **NEW QUESTION # 17**

Which two statements about Label/Jump To functionality are true? (Choose Two)

- A. It allows you to pass variables to different automations of the same project.
- B. It allows you to connect with other automations in the project.

- C. It allows you to keep automations organized and aids in debugging.
- D. It allows you to have multiple Exit points in an automation.
- E. It allows you to pass variables to different parts or workflows of the same automation.

**Answer: C,D**

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

The Label/Jump To functionality in Pega Robot Studio is used to improve automation organization and logical control flow.

Labels act as named anchor points within a single automation, and Jump To links can redirect the execution flow to these labeled points.

According to the Pega Robotics System Design and Implementation Guide, section "Using Labels and Jump To Blocks in Automations":

"The Label/Jump To functionality enables structured flow management within a single automation.

\* Labels define points in the automation to which the execution flow can jump.

\* Jump To blocks redirect execution to a corresponding label, allowing developers to organize complex automations into manageable sections.

\* This feature is particularly useful for debugging, error handling, and implementing multiple exit paths within a single automation."

Detailed Reasoning:

\* A. It allows you to pass variables to different parts or workflows of the same automation.

\* Incorrect. The Label/Jump To mechanism changes the flow of execution; it does not pass or transfer variable data between workflows.

\* B. It allows you to keep automations organized and aids in debugging.

\* Correct. Labels and Jump To blocks make complex automations more readable and structured by dividing logic into sections. This improves debugging and maintenance.

\* C. It allows you to pass variables to different automations of the same project.

\* Incorrect. Variables between automations are passed using parameters (inputs/outputs), not Label/Jump To blocks.

\* D. It allows you to have multiple Exit points in an automation.

\* Correct. By strategically placing labels and jumps, you can create multiple exit conditions or termination points within a single automation, improving control flow.

\* E. It allows you to connect with other automations in the project.

\* Incorrect. Connections to other automations are made through automation calls, not Label

/Jump To links.

Final Correct answer: B, D

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Using Labels and Jump To Blocks for Logical Flow Management section (Pega Robotics 19.1 and later).

## NEW QUESTION # 18

While setting up Start My Day, the user makes some changes in the Manage Applications window to prioritize and manage the applications that are configured to launch using the Start My Day functionality.

Which of the following applications does the user see on the desktop after using the Start My Day functionality?

- A. CRM, BankerInsight
- B. CRM, Notepad, BankerInsight
- C. Pega Finance, Notepad, BankerInsight
- D. Pega Finance, CRM, Notepad, BankerInsight

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the Start My Day (SMD) functionality allows a user to define and launch all required applications at once when starting work. The configuration of these applications is performed in the Manage Applications window, where each application can be individually enabled or disabled for automatic startup.

According to the Pega Robotics System Design and Implementation Guide, in the section "Start My Day Configuration and Manage Applications", the documentation specifies the following:

"Applications configured for Start My Day will launch automatically when the Start My Day feature is invoked.

The Manage Applications dialog lists all project applications and determines which ones are launched using the 'Enabled' checkbox.

Only applications marked as enabled will be started when the user initiates Start My Day. Applications that are listed but not

enabled remain closed." The screenshot in the question shows the following configuration under the Manage Applications window:

Application  
Enabled  
Type  
Path  
Pega Finance  
Yes  
Adapter  
BankerInsight  
Yes  
Adapter  
C:\Program Files (x86)\CRM Setup\CRM.exe  
CRM  
No  
Exe  
C:\Program Files (x86)\CRM Setup\CRM.exe  
Notepad  
Yes  
Exe  
C:\Windows\notepad.exe

From this configuration, the Enabled column indicates that the following applications will start automatically when Start My Day is triggered:

- \* Pega Finance
- \* BankerInsight
- \* Notepad

The CRM application is not enabled and therefore will not launch.

Option Analysis:

- \* Option A (Pega Finance, Notepad, BankerInsight): Correct, as these are the enabled applications.
- \* Option B (CRM, BankerInsight): Incorrect, because CRM is not enabled.
- \* Option C (CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.
- \* Option D (Pega Finance, CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.

Therefore, the correct answer is A. Pega Finance, Notepad, BankerInsight.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Start My Day (SMD) Configuration and Application Management section (Pega Robotics 19.1 and later).

### NEW QUESTION # 19

When performing application discovery, it is important that you \_\_\_\_\_ and \_\_\_\_\_ . (Choose two.)

- A. interrogate 100 percent of the controls in the application
- B. write automations to accomplish the basic search functionality of the application
- C. interrogate all controls required for the use case
- D. utilize test methods to validate that you can interact with representatives of the controls in the use case

**Answer: B,D**

### NEW QUESTION # 20

.....

GetValidTest's product is prepared for people who participate in the Pegasystems certification PEGACPRSA22V1 exam. GetValidTest's training materials include not only Pegasystems certification PEGACPRSA22V1 exam training materials which can consolidate your expertise, but also high degree of accuracy of practice questions and answers about Pegasystems Certification PEGACPRSA22V1 Exam. GetValidTest can guarantee you pass the Pegasystems certification PEGACPRSA22V1 exam with high score the even if you are the first time to participate in this exam.

**PEGACPRSA22V1 Test Passing Score:** <https://www.getvalidtest.com/PEGACPRSA22V1-exam.html>

In this industry, the examination is one of the most important tools (PEGACPRSA22V1 cram file) whether we have met the standard to be more professional in this field or not, Just as an old saying goes, "It's never too old to learn", so preparing for a PEGACPRSA22V1 certification is becoming a common occurrence, Test Engine: PEGACPRSA22V1 study test engine can be
