

IAPP CIPT Practice Exams For Self-Assessment (Web-Based And Desktop)

P.S. Free 2026 IAPP CIPT dumps are available on Google Drive shared by RealExamFree: <https://drive.google.com/open?id=1j9xiem7bGZFg0HhPWtU84zVsDdPX7wSP>

One of the key factors for passing the exam is practice. Candidates must use CIPT practice test material to be able to perform at their best on the real exam. This is why RealExamFree has developed three formats to assist candidates in their IAPP CIPT Preparation. These formats include desktop-based IAPP CIPT practice test software, web-based practice test, and a PDF format.

Passing an exam for most candidates may be not very easy, our CIPT Exam Materials are trying to make the difficult things become easier. With the experienced experts to revise the CIPT exam dump, and the professionals to check timely, the versions update is quietly fast. Thinking that if you got the certificate, you can get a higher salary, and you're your position in the company will also in a higher level.

>> Test CIPT King <<

Get Authoritative Test CIPT King and Useful CIPT Reliable Study Questions

The second format, by RealExamFree, is a web-based CIPT practice exam that can be accessed online through browsers like Firefox, Google Chrome, Safari, and Microsoft Edge. You don't need to download or install any excessive plugins or Software to use the web-based software. All operating systems also support this web-based CIPT Practice Test.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q215-Q220):

NEW QUESTION # 215

SCENARIO

Please use the following to answer the next questions:

Your company is launching a new track and trace health app during the outbreak of a virus pandemic in the US. The developers claim the app is based on privacy by design because personal data collected was considered to ensure only necessary data is captured, users are presented with a privacy notice, and they are asked to give consent before data is shared. Users can update their

consent after logging into an account, through a dedicated privacy and consent hub. This is accessible through the 'Settings' icon from any app page, then clicking 'My Preferences', and selecting 'Information Sharing and Consent' where the following choices are displayed:

- * "I consent to receive notifications and infection alerts";
- * "I consent to receive information on additional features or services, and new products";
- * "I consent to sharing only my risk result and location information, for exposure and contact tracing purposes";
- * "I consent to share my data for medical research purposes"; and
- * "I consent to share my data with healthcare providers affiliated to the company".

For each choice, an ON* or OFF tab is available. The default setting is ON for all Users purchase a virus screening service for US\$29.99 for themselves or others using the app. The virus screening service works as follows:

- * Step 1 A photo of the user's face is taken.
- * Step 2 The user measures their temperature and adds the reading in the app
- * Step 3 The user is asked to read sentences so that a voice analysis can detect symptoms
- * Step 4 The user is asked to answer questions on known symptoms
- * Step 5 The user can input information on family members (name, date of birth, citizenship, home address, phone number, email and relationship). The results are displayed as one of the following risk status: "Low", "Medium" or "High". If the user is deemed at "Medium" or "High" risk, an alert may be sent to other users and the user is invited to seek a medical consultation and diagnostic from a healthcare provider.

A user's risk status also feeds a world map for contact tracing purposes, where users are able to check if they have been or are in close proximity of an infected person. If a user has come in contact with another individual classified as 'medium' or 'high' risk, an instant notification also alerts the user of this. The app collects location trails of every user to monitor locations visited by an infected individual. Location is collected using the phone's GPS functionality, whether the app is in use or not; however, the exact location of the user is 'blurred' for privacy reasons. Users can only see on the map circles. The location data collected and displayed on the map should be changed for which of the following reasons?

- A. The location data is too precise
- **B. The radius used for location data exceeds official social distancing rules**
- C. The blurriness does not allow users to know how close they are to an infected person
- D. The location data has not been pseudonymized

Answer: B

Explanation:

The location data collected and displayed on the map should be changed because the radius used for location data exceeds official social distancing rules. This can lead to inaccurate risk assessments and unnecessary alerts, causing confusion and potentially violating user privacy. Ensuring that the radius for location data aligns with official guidelines helps maintain accuracy and relevancy in the contact tracing process, thereby enhancing the app's effectiveness while respecting user privacy. (Reference: IAPP CIPT Study Guide, Chapter on Location Data and Privacy)

NEW QUESTION # 216

A key principle of an effective privacy policy is that it should be?

- A. Presented with external parties as the intended audience.
- B. Made general enough to maximize flexibility in its application.
- C. Designed primarily by the organization's lawyers.
- **D. Written in enough detail to cover the majority of likely scenarios.**

Answer: D

Explanation:

A key principle of an effective privacy policy is that it should be written in enough detail to cover the majority of likely scenarios. This ensures that the policy provides clear guidance on how personal data is to be handled, making it easier for employees to understand and follow, and for customers to know how their data is being used. According to the IAPP, privacy policies need to be sufficiently detailed to address the range of situations that the organization may encounter, which helps in maintaining compliance with privacy laws and regulations.

NEW QUESTION # 217

What is the main privacy threat posed by Radio Frequency Identification (RFID)?

- A. RFID can be utilized to spoof identification details
- **B. RFID can be utilized to track people or consumer products**
- C. RFID can be utilized to gain unauthorized access to an individual's device
- D. RFID can be utilized to read information from a device without the user's knowledge

Answer: B

Explanation:

The main privacy threat posed by Radio Frequency Identification (RFID) technology is its ability to track people or consumer products without their knowledge. RFID tags can be read from a distance without the individual's consent, potentially leading to unauthorized surveillance and tracking. This capability raises significant privacy concerns, especially in contexts where individuals are unaware that they are being monitored or that their movements and interactions with products are being recorded. (Reference: IAPP CIPT Study Guide, Chapter on Emerging Technologies and Privacy)

NEW QUESTION # 218

An organization is concerned that its aging IT infrastructure will lead to increased security and privacy risks. Which of the following would help mitigate these risks?

- A. Code audits.
- B. Data Loss Prevention.
- C. Network Centricity.
- **D. Vulnerability management.**

Answer: D

Explanation:

To mitigate the security and privacy risks associated with an aging IT infrastructure, vulnerability management is essential. This process involves identifying, evaluating, treating, and reporting on security vulnerabilities in systems and the software that runs on them. Regular vulnerability assessments and management ensure that any weaknesses are promptly addressed, reducing the risk of exploitation. Other options, like Data Loss Prevention, Code Audits, and Network Centricity, while useful, are not as directly targeted at the overarching issue of managing vulnerabilities in aging systems. (Reference: IAPP CIPT Study Guide, Chapter on Risk Management and Security Controls)

NEW QUESTION # 219

SCENARIO

Please use the following to answer the next question:

Chuck, a compliance auditor for a consulting firm focusing on healthcare clients, was required to travel to the client's office to perform an onsite review of the client's operations. He rented a car from Finley Motors upon arrival at the airport as so he could commute to and from the client's office. The car rental agreement was electronically signed by Chuck and included his name, address, driver's license, make/model of the car, billing rate, and additional details describing the rental transaction. On the second night, Chuck was caught by a red light camera not stopping at an intersection on his way to dinner. Chuck returned the car back to the car rental agency at the end of the week without mentioning the infraction and Finley Motors emailed a copy of the final receipt to the address on file.

Local law enforcement later reviewed the red light camera footage. As Finley Motors is the registered owner of the car, a notice was sent to them indicating the infraction and fine incurred. This notice included the license plate number, occurrence date and time, a photograph of the driver, and a web portal link to a video clip of the violation for further review. Finley Motors, however, was not responsible for the violation as they were not driving the car at the time and transferred the incident to AMP Payment Resources for further review. AMP Payment Resources identified Chuck as the driver based on the rental agreement he signed when picking up the car and then contacted Chuck directly through a written letter regarding the infraction to collect the fine.

After reviewing the incident through the AMP Payment Resources' web portal, Chuck paid the fine using his personal credit card. Two weeks later, Finley Motors sent Chuck an email promotion offering 10% off a future rental.

What should Finley Motors have done to incorporate the transparency principle of Privacy by Design (PbD)?

- A. Obtained verbal consent from Chuck and recorded it within internal systems.
- B. Signed a data sharing agreement with AMP Payment Resources.
- C. Documented that Finley Motors has a legitimate interest to share Chuck's information.
- **D. Provided notice of data sharing practices within the electronically signed rental agreement.**

Answer: D

Explanation:

By providing clear and concise notice of its data sharing practices within the rental agreement that Chuck electronically signed, Finley Motors could have ensured that Chuck was informed about how his personal information would be used and shared. This would have helped to increase transparency and build trust with Chuck.

NEW QUESTION # 220

.....

There may be customers who are concerned about the installation or use of our CIPT training questions. You don't have to worry about this. In addition to high quality and high efficiency, considerate service is also a big advantage of our company. We will provide 24 - hour online after-sales service to every customer. If you have any questions about installing or using our CIPT Real Exam, our professional after-sales service staff will provide you with warm remote service. As long as it is about our CIPT learning materials, we will be able to solve. Whether you're emailing or contacting us online, we'll help you solve the problem as quickly as possible. You don't need any worries at all.
