- **C. Internal**
- D. Credential

**Answer: A,C**

#### NEW QUESTION # 76

Which archiving objects are relevant for archiving change documents for user master records? Note: There are 2 correct answers to this question.

- **A. US\_PASS**
- B. US\_AUTH
- C. US\_PROF
- **D. US\_USER**

**Answer: A,D**

Explanation:

In SAP systems, archiving change documents for user master records involves specific archiving objects to manage historical data efficiently. The archiving object US\_PASS is used to archive changes related to user passwords, such as password resets or updates, which are critical for tracking user account modifications.

Similarly, US\_USER is used to archive changes to user master records, including details like user IDs, names, and group assignments, ensuring a comprehensive record of user profile modifications. These objects allow administrators to store historical data securely while freeing up system resources. In contrast, US\_AUTH is related to authorization assignments, not user master record changes, and US\_PROF deals with profile assignments, which are separate from user master data. By using US\_PASS and US\_USER, SAP ensures that changes to sensitive user information are preserved for audit and compliance purposes, supporting security governance in large-scale SAP environments. This archiving process helps maintain system performance while retaining essential historical data for regulatory and forensic analysis.

#### NEW QUESTION # 77
