EX280 test engine & EX280 pass sure vce & EX280 pdf torrent

Passing the Red Hat Certified Specialist in OpenShift Administration exam EX280 exam is your best career opportunity. The rich experience with relevant certificates is important for enterprises to open up a series of professional vacancies for your choices. Our RedHat EX280 learning quiz bank and learning materials look up the latest EX280 questions and answers based on the topics you choose.

RedHat Red Hat Certified Specialist in OpenShift Administration exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

Configure a service account

Configure a service account in the apples project to meet the following requirements:

The name of the account is ex280sa

The account allows pods to be run as any available user

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc project apples
```

```
$ oc create sa ex280sa
```

```
$ oc adm policy add-scc-to-user anyuid -z ex280sa
```

NEW QUESTION # 11

Autoscale of Pods

Task information Details:

Create an HPA for httpd with min=2 , max=9 , and CPU target 60% .

Set resource requests on the httpd deployment so autoscaling can function properly.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Set resource requests on the deployment:

```
oc set resources deployment httpd --requests=cpu=50m,memory=100Mi
```

* Create the HPA:

```
oc autoscale deployment httpd --min=2 --max=9 --cpu-percent=60
```

* Verify:

```
oc get hpa
```

```
oc describe hpa httpd
```

```
oc get deployment httpd -o yaml
```

Why resource requests matter:

* HPA CPU utilization is calculated against requested CPU.

* Without requests, percentage-based autoscaling is incomplete or invalid.

This task focuses on autoscaling prerequisites and policy creation.

NEW QUESTION # 12

Create Project Template

Task information Details:

Generate the bootstrap project template, create it in openshift-config , update the cluster project configuration to use the template, and create a new project to validate it.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Generate the default template:

```
oc adm create-bootstrap-project-template -o yaml > template.yaml
```

* Review and edit template.yaml if required.

* Create the template in openshift-config:

```
oc create -f template.yaml -n openshift-config
```

* Edit the cluster project configuration:

```
oc edit project.config.openshift.io/cluster
```

* Add or update:

```
spec:
```

```
projectRequestTemplate:
```

```
name: project-request
```

* Save and exit.

* Create a test project:

```
oc new-project test123
```

* Verify the template behavior:

```
oc get project test123 -o yaml
```

Notes:

* The uploaded lab text shows projects.config.openshift.io cluster-admin; the standard resource is project.config.openshift.io/cluster.

This task checks cluster-wide customization of new-project creation behavior.

NEW QUESTION # 13

Collect Cluster Information

Task information Details:

Run must-gather and archive the gathered data into a tar file.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Run must-gather:

```
oc adm must-gather
```

* Confirm the directory created, usually something like:

```
ls
```

* Archive the directory:

```
tar -cvzf system10-4ktjl-l4kj5l-lk45j.tar.gz must-gather.local.*
```

* Verify:

```
ls -lh *.tar.gz
```

Notes:

* The lab text shows a tar command without source paths. A valid tar command must include the source directory or files.

* Use the actual must-gather output directory generated in your environment.

This task validates support-data collection and cluster diagnostics handling.

NEW QUESTION # 14

Deploy an application

Deploy the application called rocky in the bullwinkle project so that the following conditions are true:

The

application is reachable at the following address: <http://rocky.apps.domainXX.example.com> The application produces output

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc project bullwinkle
```

```
$ oc get pods
```

```
$ oc get all | grep deploy
```

```
$ oc get nodes
```

```
$ oc describe nodes | grep -i taint
```

```
$ oc adm taint nodes worker0 key1=value1:NoSchedule-
```

```
$ oc adm taint nodes worker1 key1=value1:NoSchedule-
```

```
$ oc describe nodes | grep -i taint
```

```
$ oc get route
```

```
$ oc delete route rocky
```

```
$ oc expose svc rocky --hostname rocky.apps.domainxx.example.com
```

```
$ oc get route
```

NEW QUESTION # 15

.....

By practicing under the real exam scenario of this RedHat EX280 web-based practice test, you can cope with exam anxiety and appear in the final test with maximum confidence. You can change the time limit and number of questions of this RedHat EX280 web-based practice test.
