A lot of people has regard passing the Fire-Inspector-II exam as the best and even only one method to achieve their great goals, because they cannot find the another method that is easier than the exam to help them to make their dreams come true, and more importantly, the way of passing the Fire-Inspector-II Exam can help them save a lot of time. So a growing number of people have set out to preparing for the exam in the past years in order to gain the higher standard life and a decent job. As is known to us, the exam has been more and more difficult for all people to pass, but it is because of this, people who have passed the Fire-Inspector-II exam successfully and get the related certification will be

taken seriously by the leaders from the great companies.

## International Code Council 67 - Fire Inspector II Exam Sample Questions (Q24-Q29):

### NEW QUESTION # 24

What is the maximum travel distance to an exit from within a tent?

- A. 100 ft.
- B. Any distance approved by the chief
- C. 75 ft.
- D. 150 ft.

**Answer: D**

Explanation:

The maximum travel distance to an exit from within a tent is regulated under the 2021 International Fire Code (IFC), Section 3103.12.2 - Means of Egress (Tents and Membrane Structures).

IFC Section 3103.12.2 - Travel Distance:

"The maximum travel distance to an exit shall not exceed 150 feet (45,720 mm)." Why Other Options Are Incorrect?

A). 75 ft. - This limit does not apply to tents; the correct limit is 150 ft.

B). 100 ft. - Too restrictive; the IFC allows up to 150 ft.

D). Any distance approved by the chief. - The fire code does not allow unlimited travel distances; 150 feet is the maximum permitted by code.

# Correct answer: C. 150 ft.

### NEW QUESTION # 25

Compressed natural gas (CNG) motor vehicle fuel-dispensing equipment may be installed in which of the following locations?

- A. 15 ft. from a public street.
- B. 5 ft. from an undeveloped property line.
- C. 20 ft. from a railroad track.
- D. 40 ft. from trolley wires.

**Answer: C**

Explanation:

Compressed Natural Gas (CNG) motor vehicle fuel-dispensing equipment installation requirements are outlined in 2021 International Fire Code (IFC) Section 2208 - Compressed Natural Gas Motor Fuel- Dispensing Facilities.

IFC 2021, Section 2208.3 - Equipment Location and Protection:

Requires that CNG dispensing equipment be installed at least:

10 feet from property lines

20 feet from public streets, highways, sidewalks, or railroads

10 feet from buildings or structures

Why Other Options Are Incorrect?

A: 40 ft. from trolley wires.

The IFC does not specify a 40-ft requirement for trolley wires in relation to CNG fuel-dispensing equipment.

B: 15 ft. from a public street.

Incorrect because IFC 2208.3 states that the minimum required distance from a public street is 20 feet, not 15 feet.

D: 5 ft. from an undeveloped property line.

Incorrect, as the minimum clearance from any property line is 10 feet, not 5 feet.

### NEW QUESTION # 26

Fine magnesium scrap stored in quantities greater than 1,000 cu. ft. shall be separated from all buildings other than those used for magnesium scrap recovery operations by a distance of not less than \_\_\_ ft.

- A. 0
- B. 1

- C. 2
- D. 3

**Answer: C**

Explanation:

Storage of fine magnesium scrap is regulated under 2021 IFC Chapter 59 - Magnesium and specifically IFC Section 5904.3.2.5 - Separation Distances for Magnesium Scrap Storage.

IFC 5904.3.2.5 - Minimum Separation Distances:

Fine magnesium scrap in quantities greater than 1,000 cubic feet must be separated from all buildings (except those used for magnesium scrap recovery) by at least 250 feet.

Why Other Options Are Incorrect?

A: 30 feet - Too close; insufficient for high-risk metal fires.

B: 50 feet - Does not meet the minimum required separation for magnesium scrap.

C: 100 feet - While larger, it still does not meet the 250-ft. requirement

### NEW QUESTION # 27

What fire-resistance rating is required for interior nonbearing wall and partitions in Type IV construction?

- A. 1 hour
- B. 0 hours
- C. 2 hours
- D. 1-1/2 hours

**Answer: B**

Explanation:

The fire-resistance rating requirements for different building elements in Type IV (Heavy Timber) construction are specified in the 2021 International Building Code (IBC), Table 601 - Fire-Resistance Rating Requirements for Building Elements (Hours).

IBC Table 601 - Fire Resistance for Type IV Construction:

Interior nonbearing walls and partitions in Type IV construction require 0 hours of fire resistance.

This is because Type IV construction primarily relies on large, heavy timber elements that provide inherent fire resistance.

Why Other Options Are Incorrect?

B: 1 hour - Incorrect, as nonbearing interior walls in Type IV construction are not required to have a fire- resistance rating.

C: 1-1/2 hours - Not required by code.

D: 2 hours - Only structural elements like exterior walls in some cases may require fire resistance, but nonbearing interior partitions do not.

### NEW QUESTION # 28

Which of the following situations requires securing of an operational permit from the code official prior to commencing the related activity?

- A. Inside storage of 100 cu. ft. of baled cotton.
- B. Storing 85,000 bd. ft. of lumber.
- C. Organic coating production facility producing 2 gallons per day.
- D. Fruit ripening operations using carbon dioxide gas.

**Answer: B**

Explanation:

IFC Section 105.6 lists activities requiring operational permits. For A, lumber storage exceeding 100,000 board feet (bd. ft.) indoors or outdoors requires a permit (Section 105.6.28, Lumber Yards), but local thresholds may be lower-85,000 bd. ft. is close to this limit and likely exceeds typical exempt amounts, triggering a permit in many jurisdictions. For B, IFC Table 3206.2 allows small quantities of combustible commodities like baled cotton (100 cu. ft. is minimal) without a permit unless part of a larger high-piled storage operation. For C, fruit ripening with CO<sub>2</sub> (Section 105.6.13) requires a permit only for specific flammable gases, not CO<sub>2</sub> alone, which is nonflammable. For D, organic coating production (Section 105.6.33) requires a permit only above 1 gallon per day, but 2 gallons is still small-scale and context- dependent-lumber storage is the clearer permit trigger here. Thus, A is the best answer.

Reference: IFC 2021, Section 105.6 (Required Operational Permits), Section 3206.2 (High-Piled Storage).

## NEW QUESTION # 29

.....

We provide first-rate service on the Fire-Inspector-II learning prep to the clients and they include the service before and after the sale, 24-hours online customer service and long-distance assistance, the refund service and the update service. The client can try out our and download Fire-Inspector-II guide materials freely before the sale and if the client have problems about our product after the sale they can contact our customer service at any time. We provide 24-hours online customer service which replies the client's questions and doubts about our Fire-Inspector-II training quiz and solve their problems.

**Fire-Inspector-II Hot Spot Questions:** <https://www.realexamfree.com/Fire-Inspector-II-real-exam-dumps.html>

No other certification training files can take place of our Fire-Inspector-II study guide as this kind of good impression is deeply rooted in the minds of people, APP version of Fire-Inspector-II pass dumps have similar with soft version, Achieving the Fire-Inspector-II certification can validate your personal ability and help you to get new career heights, And our practice materials also have a statistical analysis function to help you find out the deficiency in the learning process of Fire-Inspector-II practice materials, so that you can strengthen the training for weak links.

Everything in-between is part of the table, While the desire to gain new Fire-Inspector-II Hot Spot Questions knowledge and skills may be a powerful motivator, most certification seekers want to know how, or if, a certification enables them to earn more.

## What Will be the Result of Preparing with International Code Council Fire-Inspector-II Practice Questions?

No other certification training files can take place of our Fire-Inspector-II Study Guide as this kind of good impression is deeply rooted in the minds of people, APP version of Fire-Inspector-II pass dumps have similar with soft version.

Achieving the Fire-Inspector-II certification can validate your personal ability and help you to get new career heights, And our practice materials also have a statistical analysis function to help you find out the deficiency in the learning process of Fire-Inspector-II practice materials, so that you can strengthen the training for weak links.
