SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition 認定 C-S4CPB-2508 試験問題 (Q22-Q27):**質問 # 22**

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. System consistency checks
- **B. The selected deployment target**
- **C. The selected scope**
- D. Added partner content

正解: B、C

解説:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

質問 # 23

Which embedded support offerings can you make use of in the SAP Fiori Launchpad? Note: There are 3 correct answers to this question.

- **A. Digital assistance from generative AI (SAP Joule)**
- **B. Recorded system simulations from the Learning Center**
- C. Recorded webinars from the SAP Learning Website
- **D. Video tutorials from the SAP Help Portal**
- E. Assessment questions from the SAP Learning Hub

正解: A、B、D

解説:

The SAP Fiori Launchpad provides embedded support offerings that can help users learn and perform tasks more efficiently. These offerings include:

- * Digital assistance from generative AI (SAP Joule): This is a conversational AI assistant that can answer user questions, provide guidance, and execute tasks using natural language. SAP Joule can be accessed by selecting the headphones icon in the top right corner of the SAP Fiori Launchpad and choosing the chat option.
- * Recorded system simulations from the Learning Center: These are interactive tutorials that show users how to perform common tasks and scenarios in the SAP S/4HANA Cloud system. Users can access the simulations by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the graduation cap icon. The simulations are created with the SAP Enable Now tool and can be customized by customers if needed.
- * Video tutorials from the SAP Help Portal: These are short videos that explain the features and functionalities of the SAP S/4HANA Cloud system and the SAP Fiori Launchpad. Users can access the videos by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the megaphone icon. The videos are also available on the SAP Help Portal website.

The other options are not embedded support offerings in the SAP Fiori Launchpad. Recorded webinars from the SAP Learning Website and assessment questions from the SAP Learning Hub are external learning resources that users can access separately from the SAP Fiori Launchpad. References = Using the Embedded Support Capabilities and the Joule Generative AI Assistant > Using the Embedded Support Capabilities and the Joule Generative AI Assistant > SAP Fiori Launchpad Embedded Help and Support. SAP Fiori Launchpad for SAP S/4HANA Cloud > SAP Fiori Launchpad > What is SAP Fiori launchpad? SAP Fiori Launchpad - Overview > Services.

質問 # 24

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user.

How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the business catalogues assigned to the role.
- B. Check the restrictions for the role.
- C. Check the space and page(s) assigned to the role.
- D. Check the Role Maintenance app.
- E. Check the business role template.

正解: A、D、E

質問 # 25

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, where do you look next?

- A. SAP Business Technology Platform
- B. SAP Business Accelerator Hub
- C. SAP Cloud ALM
- D. SAP Discovery Center

正解: B

解説:

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, you should look next at the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content that can help you to connect SAP S/4HANA Cloud Public Edition with other SAP and non-SAP applications. You can browse, search, and filter the available integration packages, scenarios, and APIs, and access the relevant documentation and configuration guides¹. The SAP Business Accelerator Hub also provides links to the SAP Integration Suite tools, such as SAP Cloud Integration, SAP API Management, and SAP Cloud Integration Automation Service, that you can use to implement and manage the integrations².

The other options are not the correct places to look for integration requirements. SAP Discovery Center is a portal that helps you to discover, try, and buy SAP solutions and services³. SAP Business Technology Platform is a platform that enables you to extend, integrate, and build applications in the cloud⁴. SAP Cloud ALM is a cloud-based application lifecycle management tool that supports you in implementing, operating, and enhancing your cloud solutions⁵. References = SAP Business Accelerator Hub, SAP
