Testking 300-720 Learning Materials & New 300-720 Exam Questions

The experts in our company are always keeping a close eye on even the slightest change in the field. Therefore, we can assure that you will miss nothing needed for the 300-720 exam. What's more, the latest version of our 300-720 study materials will be a good way for you to broaden your horizons as well as improve your skills. So with our 300-720 Exam Questions, not only you can pass the exam with ease with 100% pass guarantee, but also you can learn the most professional and specialized knowledge in this field!

Cisco 300-720 Exam is a certification test that assesses the proficiency of IT professionals in securing email using the Cisco Email Security Appliance (ESA). 300-720 exam is designed to validate the candidates' understanding of email security concepts, including email authentication, encryption, and anti-spam techniques. Securing Email with Cisco Email Security Appliance certification is ideal for professionals who work in the field of network security, cybersecurity, and IT administration.

Cisco Securing Email with Cisco Email Security Appliance Sample Questions (Q94-Q99):

NEW QUESTION # 94

What occurs when configuring separate incoming mail policies?

- A. message exceptions
- B. message splintering
- C. message detachment
- D. message aggregation

Answer: B

Explanation:

Message splintering is a process that occurs when configuring separate incoming mail policies on Cisco ESA. Message splintering means that Cisco ESA will split a single incoming message into multiple copies, each with a different recipient and policy, and apply different security services and actions to each copy.

NEW QUESTION # 95

When email authentication is configured on Cisco ESA, which two key types should be selected on the signing profile? (Choose two.)

- A. Domain Keys
- B. Symmetric Keys
- C. Private Keys
- D. DKIM
- E. Public Keys

Answer: C,E

Explanation:

With DomainKeys or DKIM email authentication, the sender signs the email using public key cryptography. Configuring DomainKeys and DKIM Signing A signing key is the private key stored on the appliance.

[1/user_guide/b_ESA_Admin_Guide_11_1/b_ESA_Admin_Guide_chapter_010101.html?bookSearch=true](https://www.cisco.com/c/en/us/td/docs/security/esa/esa11-1/user_guide/b_ESA_Admin_Guide_11_1/b_ESA_Admin_Guide_chapter_010101.html?bookSearch=true)

NEW QUESTION # 96

An engineer deploys a Cisco Secure Email Gateway appliance with default settings in an organization that permits only standard H feature does not work. Which additional action resolves the issue?

- A. Configure the outbound firewall rule to permit traffic on port 3237
- B. Enable the Use SSL option under Advanced Settings for File Reputation.
- C. Enable the Use HTTP option under Advanced Settings for File Reputation.
- D. TP/HTTPS ports outbound and notices that the AMP file reputation
- E. Configure the outbound firewall rule to permit traffic on port 8081

Answer: D

Explanation:

Configuring the outbound firewall rule to permit traffic on port 3237 is the additional action that resolves the issue. AMP file reputation is a feature that allows Cisco ESA to check files attached to messages against a cloud-based database of known malicious files and apply appropriate actions, such as block, deliver, or quarantine.

By default, AMP file reputation uses TCP port 3237 to communicate with the cloud-based database. If this port is blocked by a firewall, AMP file reputation will not work properly.

To resolve this issue, the administrator can configure the outbound firewall rule to permit traffic on port 3237 from Cisco ESA. The other options are not valid actions to resolve the issue, because they do not affect the port used by AMP file reputation.

NEW QUESTION # 97

Which two components form the graymail management solution in Cisco ESA? (Choose two.)

- A. improved mail efficacy
- B. uniform unsubscribe management interface for end users
- C. cloud-based unsubscribe service
- D. secure subscribe option for end users
- E. integrated graymail scanning engine

Answer: C,E

Explanation:

The graymail management solution in the appliance comprises of two components: an integrated graymail scanning engine and a cloud-based Unsubscribe Service. The integrated graymail scanning engine identifies graymail messages using various criteria and

assigns them to different categories. The cloud-based Unsubscribe Service provides an easy mechanism for end users to unsubscribe from unwanted messages by checking the reputation of the unsubscribe links and performing the unsubscribe process on behalf of the end user.
