

# Cisco 300-425 Download Free Dumps | Valid Braindumps 300-425 Ebook

What's more, part of that BraindumpStudy 300-425 dumps now are free: <https://drive.google.com/open?id=1eWLYK64iuPwDCFFhIrl2AIgNA-3G-2I6r>

The Cisco 300-425 PDF is the collection of real, valid, and updated Cisco 300-425 practice questions. The 300-425 PDF dumps file works with all smart devices. You can use the Designing Cisco Enterprise Wireless Networks PDF questions on your tablet, smartphone, or laptop and start 300-425 Exam Preparation anytime and anywhere. The 300-425 dumps PDF provides you with everything that you must need in Cisco 300-425 exam preparation and enable you to crack the final Cisco 300-425 exam quickly.

Cisco 300-425 certification exam is specifically designed to test the knowledge and skills of network engineers in designing enterprise wireless networks. Designing Cisco Enterprise Wireless Networks certification exam is part of the Cisco Certified Specialist - Enterprise Wireless Design certification program, which is targeted at professionals who are involved in designing and implementing wireless networks in enterprise environments.

Cisco 300-425 Certification Exam is an essential certification for network engineers and architects who are responsible for designing and implementing enterprise wireless networks. 300-425 exam covers all aspects of wireless network design, including planning, implementation, and optimization. Designing Cisco Enterprise Wireless Networks certification is a part of the CCDP certification and is highly valued in the industry.

## Free PDF Quiz 2026 Latest Cisco 300-425 Download Free Dumps

We are impassioned, thoughtful team. So our 300-425 exam torrents will never put you under great stress but solve your problems with efficiency. Otherwise if you fail to pass the exam unfortunately with our 300-425 test braindumps, we will return your money fully or switch other versions for you. So by using our 300-425 exam torrents made by excellent experts, the learning process can be speeded up to one week. They have taken the different situation of customers into consideration and designed practical 300-425 Test Braindumps for helping customers save time. As elites in this area they are far more proficient than normal practice materials' editors, you can trust them totally.

To successfully pass the Cisco 300-425 exam, candidates must have a strong understanding of enterprise wireless network design

principles and best practices. They must also have hands-on experience in deploying and managing wireless networks. 300-425 Exam covers a range of topics, including network design, wireless site survey, wireless network implementation, wireless network management, and security.

## Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q52-Q57):

### NEW QUESTION # 52

An engineer is configuring a centralized set of controllers for separate facilities. Which two Cisco wireless architectures must be used to ensure flexible sizing of WLAN to VLAN mappings? (Choose two.)

- A. RF group
- B. mobility group
- C. AP group
- D. interface group
- E. controller group

**Answer: C,D**

Explanation:

Interface groups allow for flexible WLAN to VLAN mappings by grouping multiple interfaces into a single entity. This enables a single WLAN to be mapped to multiple VLANs, providing scalability and flexibility in network design. AP groups are used to manage the configuration of multiple APs collectively, allowing for consistent WLAN to VLAN mappings across different APs in separate facilities.

### NEW QUESTION # 53

How are mobility groups created, excluding mobility anchors?

- A. Each WLC must use the same mobility domain name and be defined as a peer in each other's static mobility members list.
- B. If WLCs with HA SSO are deployed, each WLC in the WLC HA pair is considered separately as a mobility peer.
- C. A mobility group does not require all WLCs in the group to use the same virtual IP address.
- D. The WLCs do not have to be of the same model or type to be a member of a mobility group, however each member should be running different software versions.

**Answer: B**

### NEW QUESTION # 54

Global Configuration		
Redundancy Mgmt Ip	172.25.44.4	
Peer Redundancy Mgmt Ip	172.25.44.5	
Redundancy port Ip	169.254.44.6	
Peer Redundancy port Ip	169.254.44.5	
Redundant Unit	Primary	<input checked="" type="radio"/>
Mobility Mac Address	60:73:5C:D1:76:00	
Keep Alive Timer (100 - 1000)	100	milliseconds
Keep Alive Retries (3 - 10)	3	
Peer Search Timer (60 - 300)	120	seconds
Management Gateway Failover	Enabled	<input checked="" type="radio"/>
SSO	Disabled	<input type="radio"/>

Refer to the exhibit. An enterprise is using wireless as the main network connectivity for clients. To ensure service continuity, a pair of controllers will be installed in a datacentre. An engineer is designing SSO on the pair of controllers. What needs to be included in the design to avoid having the secondary controller go into maintenance mode?

- A. The Keep alive timer is too low, which causes synchronization problems.

- B. The connection between the redundancy ports is missing.
- C. The redundancy port must be the same subnet as the redundancy mgmt.
- D. The Global Configuration of SSO is set to Disabled on the controller.

**Answer: B**

Explanation:

For Stateful Switchover (SSO) to function correctly, the redundancy ports on both the primary and secondary controllers must be directly connected. This allows for the necessary state and configuration information to be synchronized between the two controllers, preventing the secondary controller from entering maintenance mode in the event of a failover.

#### NEW QUESTION # 55

An engineer must perform a Layer 2 survey for a mining facility. Which type of antenna does the engineer use in the mine shaft?

- A. patch
- B. omnidirectional
- C. internal
- D. dipole

**Answer: A**

#### NEW QUESTION # 56

An engineer is designing a network deployment for a college with six buildings. Each building must have a WLC located in the IDF to support the APs. The wireless clients should be able to roam between the APs and the controllers. Which type of wireless architecture should be used?

- A. Autonomous
- B. Cloud
- C. Centralized
- D. Distributed

**Answer: C**

Explanation:

A centralized wireless architecture is suitable for a college with multiple buildings. It allows for centralized management of WLCs and supports seamless roaming for wireless clients across different APs and controllers.
