Google Associate-Google-Workspace-Administrator Prüfungsplan:

Thema	Einzelheiten
Thema 1	Managing Objects: This section of the exam measures the skills of Google Workspace Administrators and covers the management of user accounts, shared drives, calendars, and groups within an organization. It assesses the ability to handle account lifecycles through provisioning and deprovisioning processes, transferring ownership, managing roles, and applying security measures when access needs to be revoked. Candidates must understand how to configure Google Cloud Directory Sync (GCDS) for synchronizing user data, perform audits, and interpret logs. Additionally, it tests knowledge of managing Google Drive permissions, lifecycle management of shared drives, and implementing security best practices. The section also focuses on configuring and troubleshooting Google Calendar and Groups for Business, ensuring proper access control, resource management, and the automation of group-related tasks using APIs and Apps Script.
Thema 2	Troubleshooting: This section of the exam measures the skills of Technical Support Specialists and focuses on identifying, diagnosing, and resolving issues within Google Workspace services. It tests the ability to troubleshoot mail delivery problems, interpret message headers, analyze audit logs, and determine root causes of communication failures. Candidates are expected to collect relevant logs and documentation for support escalation and identify known issues. The section also evaluates knowledge in detecting and mitigating basic email attacks such as phishing, spam, or spoofing, using Gmail security settings and compliance tools. Additionally, it assesses troubleshooting skills for Google Workspace access, performance, and authentication issues across different devices and applications, including Google Meet and Jamboard, while maintaining service continuity and network reliability.

Thema 3	• Data Access and Authentication: This section of the exam evaluates the capabilities of Security Administrators and focuses on configuring policies that secure organizational data across devices and applications. It includes setting up Chrome and Windows device management, implementing context-aware access, and enabling endpoint verification. The section assesses the ability to configure Gmail Data Loss Prevention (DLP) and Access Control Lists (ACLs) to prevent data leaks and enforce governance policies. Candidates must demonstrate an understanding of configuring secure collaboration settings on Drive, managing client-side encryption, and restricting external sharing. It also covers managing third-party applications by controlling permissions, approving Marketplace add-ons, and deploying apps securely within organizational units. Lastly, this section measures the ability to configure user authentication methods, such as two-step verification, SSO integration, and session controls, ensuring alignment with corporate security standards and compliance requirements.
Thema 4	• Supporting Business Initiatives: This section of the exam measures the skills of Enterprise Data Managers and covers the use of Google Workspace tools to support legal, reporting, and data management initiatives. It assesses the ability to configure Google Vault for retention rules, legal holds, and audits, ensuring compliance with legal and organizational data policies. The section also involves generating and interpreting user adoption and usage reports, analyzing alerts, monitoring service outages, and using BigQuery to derive actionable insights from activity logs. Furthermore, candidates are evaluated on their proficiency in supporting data import and export tasks, including onboarding and offboarding processes, migrating Gmail data, and exporting Google Workspace content to other platforms.
Thema 5	• Configuring Services: This section of the exam evaluates the expertise of IT Systems Engineers and emphasizes configuring Google Workspace services according to corporate policies. It involves assigning permissions, setting up organizational units (OUs), managing application and security settings, and delegating Identity and Access Management (IAM) roles. The section also covers creating data compliance rules, applying Drive labels for data organization, and setting up feature releases such as Rapid or Scheduled Release. Candidates must demonstrate knowledge of security configurations for Google Cloud Marketplace applications and implement content compliance and security integration protocols. Furthermore, it includes configuring Gmail settings such as routing, spam control, email delegation, and archiving to ensure communication security and policy alignment across the organization.

Sie können so einfach wie möglich - Associate-Google-Workspace-Administrator bestehen!

Heutzutage fühlen Sie sich vielleicht machtlos in der konkurrenzfähigen Gesellschaft. Das ist unvermeidbar. Was Sie tun sollen, ist, eine Karriere zu machen. Sicher haben Sie viele Wahlen. Und ich empfehle Ihnen die Fragen und Antworten zur Associate-Google-Workspace-Administrator Zertifizierungsprüfung von It-Pruefung. It-Pruefung ist ein gute Gehilfe zur IT-Zertifizierung. So, worauf warten Sie noch? Kaufen Sie doch die Schulungsunterlagen zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung von It-Pruefung.

Google Associate Google Workspace Administrator Associate-Google-Workspace-Administrator Prüfungsfragen mit Lösungen (Q52-Q57):

52. Frage

You are configuring Chrome browser security policies for your organization. These policies must restrict certain Chrome apps and extensions.

You need to ensure that these policies are applied on the devices regardless of which user logs into the device. What should you do?

- A. Configure the Chrome user setting to require users to sign in to use Chrome apps and extensions.
- B. Require 2SV for user logins.
- **C. Configure the allowed list of apps in the Devices page in the apps and extensions settings.**
- D. Configure the Policy Precedence to override the domain-wide policy applied for apps and extensions.

Antwort: C

Begründung:

To ensure that Chrome apps and extension policies are applied regardless of which user logs into the device, you should configure the allowed list of apps in the Devices section of the apps and extensions settings. This policy applies at the device level, ensuring that the restrictions are enforced for any user who logs into that device, providing consistent security across the organization.

53. Frage

Your organization wants to prevent a group of users from logging into their Google Drive when they are traveling internationally for business.

You have added these users to an organizational unit (OU). You need to secure the users' access to the Google Drive app to meet this requirement.

What should you do?

- A. Define user-based access levels. Assign the levels to the Google Drive app for the OU.
- B. Require 2-step verification (2SV) when users in the OU sign in.
- **C. Define location-based access levels. Assign the levels to the Google Drive app for the OU.**
- D. Disable Google Drive for users in the OU.

Antwort: C

Begründung:

To restrict access to Google Drive for users when they are traveling internationally, you can define location-based access levels. By assigning these levels to the Google Drive app for the specific organizational unit (OU), you can control access based on the geographical location of the user. This ensures that users will only be able to access Google Drive from approved locations, effectively preventing access when they are traveling internationally for business.

54. Frage

You've received multiple reports about a suspicious email from someone who is pretending to be from your organization's human resources department. The email is prompting employees to click a link for a password update. You want to remediate this sender's emails. What should you do?

- A. Create an activity rule to alert administrators to similar emails from that sender.
- B. Notify all employees and request that they report this email as spam.
- **C. Use the security investigation tool to search for users who received the suspicious email, and select Mark message as phishing.**
- D. Use the security investigation tool to action the suspicious email and select Mark message as spam.

Antwort: C

Begründung:

The security investigation tool allows you to search for and take action on suspicious emails within your organization. Marking the email as phishing helps to flag the email as malicious and prevents further emails from the same sender from being delivered to users' inboxes. This also ensures that the email is properly categorized for review and investigation by your security team.

55. Frage

A team of temporary employees left your organization after completing a shared project. Per company policy, you need to disable their Google Workspace accounts while preserving all project data and related communications in Google Vault for a minimum of two years. You want to comply with this policy while minimizing cost. What should you do?

- **A. Purchase and assign Archived User licenses to the former employees.**
- B. Transfer the former employees' files and data to active user accounts. Delete the former employees' Workspace accounts.
- C. Move the former employees to their own organizational unit (OU) and disable access to Google services for that OU.
- D. Purchase additional user licenses and suspend the former employees' accounts.

Antwort: A

Begründung:

Google Workspace offers Archived User licenses, which allow you to retain access to the data and communications of former employees without paying for a full user license. This option ensures compliance with the policy of retaining project data and

communications in Google Vault while minimizing costs by avoiding unnecessary full user licenses.

56. Frage

During a recent Google Meet video conference, several employees reported that they could not hear the presenters. The presenters confirmed that their laptops' microphones were working. The affected employees were all using company-issued laptops. You need to quickly diagnose the source of the issue. What should you do first?

- A. Check the Admin console to determine whether there are recent Meet-related notifications or alerts.
- **B. Verify that the audio drivers on the affected laptops are up-to-date and functioning correctly.**
- C. Use the Meet quality tool for each affected user to analyze their microphone settings and configurations during the meeting.
- D. Check if Context-Aware access rules were set to prevent Meet access from the user's network location.

Antwort: B

Begründung:

Since the presenters' microphones are working, the issue likely lies with the affected employees' laptops. The first step in diagnosing the problem is to verify that the audio drivers on the affected laptops are up-to-date and functioning correctly. Outdated or malfunctioning audio drivers can cause issues with hearing sound during video conferences. Once the drivers are confirmed to be functional, further troubleshooting steps can be taken if necessary.

57. Frage

.....

Die Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung ist eine der wertvollsten zeitgenössischen Zertifizierungsprüfung. In den letzten Jahrzehnten ist die Computer-Ausbildung schon ein Fokus geworden. Sie ist ein notwendiger Bestandteil der Informations-Technologie im IT-Bereich. So legen viele IT-fachleute diese Prüfung ab, um ihr Wissen zu erweitern und einen Durchbruch in allen Bereichen zu verschaffen. Und unsere Fragen und Antworten zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung sind genau das, was sie brauchen. Dennoch ist es schwer, diesen Test zu bestehen. Wählen Sie die entsprechende Abkürzung, um Erfolg zu garantieren. Wählen Sie It-Pruefung, kommt der Erfolg auf Sie zu. Die Fragen und Antworten zur Google Associate-Google-Workspace-Administrator Zertifizierung von It-Pruefung werden von den IT-Eliten nach ihren Erfahrungen und Praxien bearbeitet und haben die Zertifizierungserfahrung von mehr als zehn Jahren.
