NEW QUESTION # 156

Where within the URL Filtering security profile must a user configure the action to prevent credential submissions?

- A. URL Filtering > URL Filtering Settings
- B. URL Filtering > Categories
- C. URL Filtering > Inline Categorization
- D. URL Filtering > HTTP Header Insertion

Answer: B

Explanation:

URL filtering technology protects users from web-based threats by providing granular control over user access and interaction with content on the Internet. You can develop a URL filtering policy that limits access to sites based on URL categories, users, and groups. For example, you can block access to sites known to host malware and prevent end users from entering corporate credentials to sites in certain categories.
