UiPath-ABAv1 Reliable Exam Cost & Latest UiPath-ABAv1 Test Pass4sure

Our company employs experts in many fields to write UiPath-ABAv1 study guide, so you can rest assured of the quality of our learning materials. What's more, preparing for the exam under the guidance of our UiPath-ABAv1 exam questions, you will give you more opportunities to be promoted and raise your salary in the near future. So when you are ready to take the exam, you can rely on our UiPath-ABAv1 Learning Materials. If you want to be the next beneficiary, what are you waiting for? Come and buy our UiPath-ABAv1 learning materials.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which of the following principles applies during the Process Documentation stage?

- A. Including more scenarios and business rules should be done after the first review
- B. Sign-Off is not mandatory if the feedback was implemented after review.
- **C. A minimum of one review is required**
- D. High-level process map should be created only after the To-Be process map is done

Answer: C

Explanation:

During the Process Documentation stage, it is a best practice and often a requirement to have at least one review of the documentation created, such as the Process Design Document (PDD). This ensures that all stakeholders agree on the process as

documented and that it accurately represents the business needs and technical requirements.
UiPath Documentation on Process Documentation at <https://docs.uipath.com/>.

NEW QUESTION # 75

What is the primary goal of task analysis in the context of evaluating automation potential?

- A. To determine the level of expertise required to perform the task
- B. To visualize and analyze the steps involved in a task
- C. To measure the time spent on a specific task or process
- D. To identify potential bottlenecks or areas for improvement

Answer: B

Explanation:

The primary goal of task analysis in the context of evaluating automation potential is to visualize and analyze the steps involved in a task. This involves collecting data on how employees perform their tasks, identifying patterns, and analyzing which parts of the process can be automated. Task analysis helps in understanding the workflow in detail, which is crucial for discovering automation opportunities and designing effective automation solutions¹.

References: The concept of task analysis and its role in identifying automation potential is discussed in the UiPath Documentation Portal, particularly in the section "Task Mining - Introduction" found at <https://docs.uipath.com/task-mining/automation-suite/2021.10/user-guide/introduction1>.

NEW QUESTION # 76

Which of the following data is ingested by Insights?

- A. Jobs. Assets, Robot Logs
- B. Assets. Queues, Robot Logs
- C. Jobs. Queues. Robot Logs
- D. Job. Queues, Assets

Answer: C

Explanation:

UiPath Insights ingests data such as Jobs, Queues, and Robot Logs. This data is used to generate comprehensive analytics that help organizations monitor, measure, and optimize their robotic process automation (RPA) operations.

Reference: UiPath Documentation on Insights at <https://docs.uipath.com/>.

NEW QUESTION # 77

What is an unattended automation process?

- A. Unattended Automations are automations that run under human supervision.
- B. Unattended Automations are automations that are best suited for use with smaller, more fragmented tasks.
- C. Unattended Automations are automations that are intended for more complex and highly repetitive tasks.
- D. Unattended Automations are automations that are intended to run on the same machine as the human uses.

Answer: C

Explanation:

Understanding Unattended Automation:

Unattended automations are designed to execute without human intervention, making them ideal for handling complex, highly repetitive, and time-consuming tasks.

Why Option A is Correct:

These automations typically run on dedicated machines and handle back-office tasks.

Why Other Options Are Incorrect:

Option B: Smaller tasks are more suitable for attended automations.

Option C/D: Unattended automations do not depend on human presence or interaction.

NEW QUESTION # 78

Given the use-case of an application/automation used to easily manage information of multiple products, what combination of UiPath tools can be used to easily develop and publish the solution?

- A. UiPath Apps and UiPath Assistant.
- B. **UiPath Apps and UiPath Data Service.**
- C. UiPath Data Service and UiPath Insights.
- D. UiPath Assistant and UiPath Insights.

Answer: B

Explanation:

Understanding the Tools:

UiPath Apps: Enables building user interfaces for automations, allowing users to interact with processes easily.

UiPath Data Service: Provides a centralized database for managing and storing structured data within the automation ecosystem.

Why Option B is Correct:

Combining UiPath Apps and UiPath Data Service allows users to build applications with rich interfaces while leveraging a robust backend for managing product information efficiently.

Why Other Options Are Incorrect:

Option A: UiPath Assistant is a tool for managing and running automations, not for building solutions.

Option C: UiPath Insights is an analytics tool and does not help with solution development.

Option D: While UiPath Data Service provides backend management, Insights is unrelated to solution development.

This combination ensures a seamless integration of UI design and data management, making it ideal for managing product information effectively.

NEW QUESTION # 79

.....

It is similar to the UiPath-ABAv1 desktop-based software, with all the elements of the desktop practice exam. This UiPath-ABAv1 exam can be accessed from any browser and does not require installation. The UiPath-ABAv1 questions in the mock test are the same as those in the real exam.
