### NEW QUESTION # 83

When does a Developer become accountable for the value of a Product Backlog item selected for the Sprint?  
(choose the best answer)

- A. Never. The entire Scrum Team is accountable for creating value every Sprint.
- B. At the Sprint Planning Event.
- C. During the Daily Scrum.
- D. Whenever a team member can accommodate more work.

**Answer: A**

Explanation:

Correct answer: D) Never. The entire Scrum Team is accountable for creating According to the Scrum Guide, the Scrum Team

consists of one Product Owner, one Scrum Master, and Developers. The Scrum Team is responsible for all product-related activities, including delivering a valuable, usable product increment every Sprint. The Product Owner is accountable for maximizing the value of the product and the work of the Developers. The Developers are accountable for creating a plan for the Sprint, the Sprint Backlog, instilling quality by adhering to a Definition of Done; and adapting their plan each day toward the Sprint Goal. The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide, helping everyone understand Scrum theory and practice, and removing impediments to the Scrum Team's progress.

Therefore, the Developers are not individually accountable for the value of a Product Backlog item selected for the Sprint, but collectively accountable as part of the Scrum Team. The value of a Product Backlog item is determined by the Product Owner, who orders the Product Backlog items based on stakeholder needs and feedback. The Developers collaborate with the Product Owner to understand the value and requirements of each Product Backlog item and deliver a potentially releasable product increment that meets the Definition of Done and the Sprint Goal.

- B. The place can be named.
- C. The Product Owner demands it.
- D. Rooms are hard to book and must be booked in advance.

**Answer: A**

\* The consistency increases transparency. By having a fixed time and place for the Daily Scrum, the Developers can ensure that everyone is aware of when and where the meeting takes place, and that everyone has an opportunity to participate and share their progress, plans, and challenges. They can also invite other stakeholders or observers, if they find it useful, to provide feedback or support.
