

# Try Free IAPP AIGP Questions Demo Before Buy

## Prepare the IAPP AIGP Exam Easily with CertsTime Questions

Preparing for the AIGP certification exam can be a challenging journey. However, with the right study resources and a well-structured plan, success is within reach. Hence, CertsTime offers top-quality study material, including actual [IAPP AIGP Exam Questions](#), to ensure you pass your exam on the first attempt. Let's explore how CertsTime can simplify your preparation process and help you achieve your certification goals.

### Why Choose CertsTime for IAPP AIGP Exam Preparation?

CertsTime is renowned for its authentic and updated IAPP Certification Programs AIGP study material, specifically designed to align with the latest AIGP exam objectives. Whether you're an experienced professional or new to the subject, CertsTime resources cater to all learning needs. Here's why CertsTime stands out:

#### Authentic Exam Questions

CertsTime provides real exam questions that mirror the actual AIGP exam format. Practicing with these questions helps you familiarize yourself with the types of questions you will encounter, reducing exam-day anxiety.

#### Comprehensive Coverage

The study material covers all the essential topics and subtopics outlined in the IAPP Certification Programs AIGP syllabus. This ensures you won't miss any crucial information, enhancing your understanding of key concepts.

2026 Latest TestPassKing AIGP PDF Dumps and AIGP Exam Engine Free Share: <https://drive.google.com/open?id=1zkA28KV9THbqZOI5-fb21FC2X-QpDwqj>

For the complete IAPP Certified Artificial Intelligence Governance Professional exam preparation and success, the TestPassKing AIGP exam practice test questions are the best choice. With the IAPP AIGP Exam Questions, you will get everything that you need to learn, prepare and succeed in the IAPP Certified Artificial Intelligence Governance Professional certification exam. You must add IAPP AIGP Exam Questions in your preparation and should not ignore them.

## IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li> </ul>

## New AIGP Test Blueprint & Valid AIGP Test Guide

You will gain a clear idea of every IAPP AIGP exam topic by practicing with Web-based and desktop IAPP AIGP practice test software. You can take IAPP AIGP Practice Exam many times to analyze and overcome your weaknesses before the final IAPP AIGP exam.

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q160-Q165):

### NEW QUESTION # 160

Scenario:

A company is using different types of AI systems to enhance consumer engagement. These include chatbots, recommendation engines, and automated content generation tools.

Which of the following situations would be least likely to raise concerns under existing consumer protection laws?

- A. An online platform offering recommendations to its users by displaying user-specific content and targeted advertisements**
- B. An AI algorithm being used in a credit decision-making process by a financial institution
- C. An AI customer service system claiming that it is as accurate as a human support agent
- D. An AI tool using scraped digital content to generate news summaries on a publishing website

**Answer: A**

Explanation:

The correct answer is D. Personalized content and advertisements, as long as properly disclosed and non-deceptive, are not generally a consumer protection issue under current legal regimes.

From the AI Governance in Practice Report 2025 (Consumer Protection Section):

"Standard practices like targeted advertising and recommendations are widely accepted provided they comply with transparency and consent requirements." Meanwhile, credit decision-making and misleading AI performance claims (Answers A and B) have already led to regulatory enforcement.

The AIGP ILT Guide highlights:

"Deceptive claims, biased financial decisions, and unauthorized data use may violate consumer protection and privacy laws. Advertising personalization is routine but must be disclosed appropriately."

### NEW QUESTION # 161

During the planning and design phases of the AI development life cycle, bias can be reduced by all of the following EXCEPT?

- A. Feature selection.
- B. Human oversight.
- C. Data collection.
- D. Stakeholder involvement.

#### Answer: A

Explanation:

Bias in AI can be reduced during the planning and design phases through stakeholder involvement, human oversight, and careful data collection. While feature selection is critical in the development phase, it does not specifically occur during planning and design. Ensuring diverse stakeholder involvement and human oversight helps identify and mitigate potential biases early, and data collection ensures a representative dataset. Reference: AIGP Body of Knowledge on AI Development Lifecycle and Bias Mitigation.

### NEW QUESTION # 162

After initially deploying a third-party AI model, you learn the developer has released a new version. As deployer of this third-party model, what should you do?

- A. Communicate necessary updates to your users.
- B. Retrain the model.
- C. Audit the model.
- D. Seek input from data scientists.

#### Answer: C

Explanation:

When a new version of a third-party model is released, the deployer must ensure it still meets safety, performance, and compliance requirements - which calls for a formal audit.

From the AI Governance in Practice Report 2024:

"Any updates or changes to AI systems should trigger a re-evaluation to ensure continued compliance and performance." (p. 12)  
"Post-market monitoring includes reassessing the impact of updated models or retraining." (p. 35)

### NEW QUESTION # 163

A US company has developed an AI system, CrimeBuster 9619, that collects information about incarcerated individuals to help parole boards predict whether someone is likely to commit another crime if released from prison.

When considering expanding to the EU market, this type of technology would?

- A. Be banned under the EU AI Act.
- B. Require a detailed conformity assessment.
- C. Require the company to register the tool with the EU database.
- D. Be subject to approval by the relevant EU authority.

#### Answer: B

Explanation:

Under the EU AI Act, high-risk AI systems like CrimeBuster 9619 would require a detailed conformity assessment before being deployed in the EU market. This assessment ensures that the AI system complies with all relevant regulations and standards, addressing potential risks related to privacy, security, and discrimination. The company would not need to register the tool with the EU database (A), seek approval from an EU authority (B), or face a ban (D) as long as it meets the necessary conformity requirements.

## NEW QUESTION # 164

### Scenario:

A company using AI for resume screening understands the risks of algorithmic bias and the evolving legal requirements across jurisdictions. It wants to implement the right governance controls to prevent reputational damage from misuse of the AI hiring tool. Which of the following measures should the company adopt to best mitigate its risk of reputational harm from using the AI tool?

- A. Require the procurement and deployment teams to agree upon the AI tool
- B. Continue to require the company's hiring personnel to manually screen all applicants
- C. Ensure the vendor provides indemnification for the AI tool
- D. **Test the AI tool pre- and post-deployment**

**Answer: D**

### Explanation:

The correct answer is A. Pre- and post-deployment testing ensures bias, accuracy, and fairness are evaluated and corrected as needed, which is essential for reputational risk mitigation.

### From the AIGP Body of Knowledge:

"Testing AI systems before and after deployment is critical to ensure performance, fairness, and compliance.

Failing to do so may result in reputational damage and legal exposure." AI Governance in Practice Report 2024 (Bias/Fairness and Risk Sections):

"System impact assessments, testing, and post-deployment monitoring are necessary to identify and mitigate risks... This supports both compliance and public trust." Testing is proactive, unlike indemnification (which transfers risk after damage), or requiring manual review (which defeats automation).

## NEW QUESTION # 165

We provide the IAPP AIGP exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. TestPassKing provides proprietary preparation guides for the certification exam offered by the IAPP Certified Artificial Intelligence Governance Professional (AIGP) exam dumps. In addition to containing numerous questions similar to the IAPP Certified Artificial Intelligence Governance Professional (AIGP) exam, the IAPP Certified Artificial Intelligence Governance Professional (AIGP) exam questions are a great way to prepare for the IAPP AIGP exam dumps.
