New Soft 2V0-17.25 Simulations | Reliable 2V0-17.25 Test Book

P.S. Free & New 2V0-17.25 dumps are available on Google Drive shared by Free4Dump: https://drive.google.com/open?id=1ZIM5BE3i7p8CmV2Gypu9WTZTOArELdAK

Once you start to become diligent and persistent, you will be filled with enthusiasms. Nothing can defeat you as long as you are optimistic. We sincerely hope that our 2V0-17.25 study materials can become your new purpose. Our 2V0-17.25 Exam Questions can teach you much practical knowledge, which is beneficial to your career development. And with the 2V0-17.25 certification, you are bound to have a bighter future.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.

Topic 2	• Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 3	• VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 4	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.

Reliable 2V0-17.25 Test Book & Real 2V0-17.25 Exam Dumps

Of course, when we review a qualifying exam, we can't be closed-door. We should pay attention to the new policies and information related to the test 2V0-17.25 certification. For the convenience of the users, the 2V0-17.25 test materials will be updated on the homepage and timely update the information related to the qualification examination. As a result, the 2V0-17.25 Test Prep can help users to spend the least time, know the test information directly, let users save time and used their time in learning the new hot spot concerning about the knowledge content.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q31-Q36):

NEW QUESTION # 31
A cluster has Enhanced vMotion Compatibility (EVC) enabled.
Which statements accurately describe the function and limitations of EVC?

- A. It enables cross-vCenter migration with different vCenter versions
- B. Once VMs are powered on, changing the EVC mode might require shutting them down
- C. It masks CPU feature sets to the lowest common denominator across hosts
- D. It allows live migration of VMs even with different CPU generations

Answer: B,C,D

Explanation:
EVC masks CPU features (A) to support vMotion across different CPU generations (C). Changing EVC settings often requires VMs to be powered off (D). Cross-vCenter migration (B) can be done with vMotion but is not guaranteed by EVC alone.

NEW QUESTION # 32
Which Container Network Interface (CNI) is selected by default in a VMware Kubernetes Service (VKS) workload cluster?

- A. Flannel
- B. Cilium

- C. Calico
- D. Antrea

Answer: D

Explanation:
When deploying a new VKS workload cluster, the Antrea Container Networking Interface is automatically enabled by default to provide pod-to-pod and pod-to-service networking. Antrea is fully integrated with NSX-T for advanced policy control. Flannel, Calico, and Cilium are widely used CNIs in upstream Kubernetes but are not the default in VCF. Administrators can optionally integrate with third-party CNIs, but the supported default choice is Antrea.

NEW QUESTION # 33
Which technology is primarily used to separate traffic and provide Layer 2 isolation in a vSphere virtual network environment?

- A. NIC teaming
- B. Jumbo frames
- C. VMware Tools
- D. VLAN tagging

Answer: D

Explanation:
VLAN tagging is used to isolate traffic at Layer 2 within virtual switches, ensuring network segmentation and security.

NEW QUESTION # 34
The administrator of a VMware Cloud Foundation environment notices that log data from multiple components, including vSphere, NSX, and vSAN, is not being collected in Aria Operations for Logs.
What two steps should the administrator perform to resolve this issue? (Choose two.)

- A. Ensure that the syslog configuration on each component is pointing to the correct Aria Operations for Logs server.
- B. Reconfigure the log level settings on all vSphere components to ensure detailed logging.
- C. Increase the storage capacity of the Aria Operations for Logs server to accommodate more log data.
- D. Verify that the Aria Operations for Logs license is still valid and active.
- E. Check the network connectivity between the Aria Operations for Logs server and the VMware Cloud Foundation components.

Answer: A,E

Explanation:
If Aria Operations for Logs cannot reach the vSphere, NSX, or vSAN components over the network, no logs will be collected-so validating connectivity (firewalls, routing, DNS) is essential.
Each component's syslog settings must point to the correct Aria Operations for Logs endpoint; if they're misconfigured, logs won't be forwarded.

NEW QUESTION # 35
Which vSphere technology automatically places VMs onto suitable datastores based on capacity, performance, or compliance settings?

- A. Resource Pools
- B. vSphere Replication
- C. Storage vMotion
- D. Storage DRS (SDRS)

Answer: D

Explanation:
Storage DRS monitors datastore load and can automatically move or place VMs to maintain balance.
vSphere Replication (A) handles data replication, Storage vMotion (C) moves a VM's storage on demand (not necessarily

automatically), and Resource Pools (D) manage CPU/memory resources.

NEW QUESTION # 36

......

The VMware Cloud Foundation 9.0 Administrator PDF practice material contains actual VMware 2V0-17.25 Exam Questions compiled by certified experts around the globe to benefit candidates. The criteria and pattern of the VMware Cloud Foundation 9.0 Administrator exam often change, and hence it is essential to use the updated exam study material for preparation. Free4Dump provides free updates after purchase so that you get the latest VMware Exam Questions for the exam.
