

FCSS_EFW_AD-7.6 Valid Test Pdf - Valid Braindumps FCSS_EFW_AD-7.6 Ebook

DOWNLOAD the newest PassTorrent FCSS_EFW_AD-7.6 PDF dumps from Cloud Storage for free:
https://drive.google.com/open?id=1Z_1vwJo4RrgyAJh4gl7dl_k1ktyFkd

You will be able to assess your shortcomings and improve gradually without having anything to lose in the actual FCSS - Enterprise Firewall 7.6 Administrator exam. You will sit through mock exams and solve actual Fortinet FCSS_EFW_AD-7.6 dumps. In the end, you will get results that'll improve each time you progress and grasp the concepts of your syllabus. The desktop-based Fortinet FCSS_EFW_AD-7.6 Practice Exam software is only compatible with Windows.

If you want to make progress and mark your name in your circumstances, you should never boggle at difficulties. As far as we know, many customers are depressed by the exam ahead of them, afraid of they may fail it unexpectedly. Our FCSS_EFW_AD-7.6 exam tool has three versions for you to choose, PDF, App, and software. If you have any question or hesitate, you can download our free Demo. The Demo will show you part of the content of our FCSS_EFW_AD-7.6 Study Materials real exam materials. So you do not have to worry about the quality of our exam questions. Our FCSS_EFW_AD-7.6 exam tool have been trusted and purchased by thousands of candidates. What are you waiting for?

Valid Braindumps Fortinet FCSS_EFW_AD-7.6 Ebook, Latest FCSS_EFW_AD-7.6 Test Format

The reality is often cruel. What do we take to compete with other people? More useful certifications like FCSS_EFW_AD-7.6 certificate? In this era of surging talent, why should we stand out among the tens of thousands of graduates and be hired by the company? Perhaps the few qualifications you have on your hands are your greatest asset, and the FCSS_EFW_AD-7.6 Test Prep is to give you that capital by passing exam fast and obtain certification soon. Don't doubt about it. More useful certifications mean more ways out. If you pass the FCSS_EFW_AD-7.6 exam, you will be welcome by all companies which have relating business with FCSS_EFW_AD-7.6 exam torrent.

Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions

(Q58-Q63):

NEW QUESTION # 58

In which two ways does FortiGate utilize the Internet Service Database (ISDB)?

- A. Provides predefined IPs and ports
- B. Works in proxy mode
- C. Limits by URL
- D. Blocks IPs and ports

Answer: A,D

NEW QUESTION # 59

Which technology should you use to facilitate dynamic direct tunnels and automatic link optimization in a hub-and-spoke VPN topology?

- A. Use ADVPN 2.0
- B. Use GRE over IPsec
- C. Use IP-in-IP tunneling
- D. Use static IPsec tunnels

Answer: A

NEW QUESTION # 60

Refer to the exhibit, which shows device registration on FortiManager.

```
FortiManager # diagnose dvm device list
--- There are currently 5 devices/vdoms managed ---
--- There are currently 5 device/vdoms count for license ---

TYPE          OID SN          HA IP          NAME          ADOM IPS  FIREWARE HW_GenX
-----
unregistered  273 FGVM010000077645 - 10.1.0.1:9443 FGVM010000077646 root N/A 7.0
MR2 (1396) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unregistered; dm: none;
conn:unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
unregistered  309 FGVM010000077648 - 10.1.0.100:9443 FGVM010000077648 root N/A
7.0 MR2 (1396) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unregistered; dm: none;
conn:unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
unregistered  285 FGVM010000077650 - 10.1.0.253:9443 FGVM010000077650 root N/A
7.0 MR2 (1396) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unregistered; dm: none;
conn:unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
fmgfaz-managed 297 FGVM010000077649 - 10.1.0.254 NGFW-1 Core 6 00741 (extended)
7.0 MR2 (1396) N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: autoupdated; conn: up
|- vdom:[3]root flags:0 adom:Core pkg: [imported] NGFW-1
fmgfaz-managed 321 FGVM010000077651 - 100.64.3.1 Spoke-1 Core 6 00741 (extended)
7.0 MR2 (1396) N/A
|- STATUS: dev-db: modified; conf: in sync; cond: Modified (recent auto-updated);
dm: autoupdated; conn:up
|- vdom:[3]root flags:1 adom:Core pkg: [out-of-sync]Spokes
fmgfaz-managed 333 FGVM010000077652 - 100.64.5.1 Spoke-2 Core 6 00741 (extended)
7.0 MR2 (1396) N/A
|- STATUS: dev-db: modified; conf: in sync; cond: Modified (recent auto-updated);
dm: autoupdated; conn:up
|- vdom:[3]root flags:1 adom:Core pkg: [out-of-sync]Spokes
```

What can you conclude about the Spoke-1 and Spoke-2 configurations with respect to the information cond: Modified (recent auto-updated)?

- A. Spoke-1 and Spoke-2 are sharing the same security policy configuration and the same policy package.
- B. On both Spoke-1 and Spoke-2, the configuration was changed directly on the FortiGate device, and the changes were automatically retrieved by the device database.
- C. On NGFW-1, the configuration was changed and spokes are waiting for an autoupdate.
- D. Based on the policy configuration on NGFW-1, the configuration on both spokes is modified and automatically updated.

Answer: B

Explanation:

Auto-Updated - configuration was changed directly on the FortiGate, and the changes were automatically Retrieved to the device db.

NEW QUESTION # 61

Refer to the exhibit, which contains the partial output of an OSPF command.

```
FortiGate # get router info ospf status
Routing Process "ospf 0" with ID 0.0.0.5
Process uptime is 0 minute
Process bound to VRF default
Conforms to RFC2328, and RFC1583Compatibility flag is enabled
Supports only single TOS(TOS0) routes
Supports opaque LSA
Do not support Restarting
This router is an ABR.
```

An administrator is checking the OSPF status of a FortiGate device and receives the output shown in the exhibit. What two conclusions can the administrator draw? (Choose two.)

- A. The FortiGate device injects external routing information
- B. The FortiGate device is connected to multiple areas
- C. The FortiGate device is a backup designated router
- D. The FortiGate device has OSPF ECMP enabled

Answer: A,B

Explanation:

The output of the get router info ospf status command provides key information about the OSPF (Open Shortest Path First) configuration on the FortiGate device.

The FortiGate device is connected to multiple areas

The output states: "This router is an ABR"

ABR (Area Border Router) means the device is connected to multiple OSPF areas and maintains routing information between them.

This confirms that the FortiGate is not just in one area, but at least one backbone area (Area 0) and another OSPF area.

The FortiGate device injects external routing information

The output states: "Supports opaque LSA"

Opaque LSAs (Type 9, 10, and 11) are used in OSPF extensions, including those that support external route injection.

Typically, ABRs or ASBRs (Autonomous System Boundary Routers) inject external routes, allowing routes from other routing protocols (such as BGP or static routes) to be advertised into OSPF.

NEW QUESTION # 62

To secure your enterprise network traffic, which step does FortiGate perform first, when handling the first packets of a session? (Choose one answer)

- A. Decryption
- B. IP integrity header checking
- C. Installation of the session key in the network processor (NP)
- D. A reverse path forwarding (RPF) check

Answer: B

Explanation:

Comprehensive and Detailed 150 to 200 words of Explanation From Exact Extract of Enterprise Firewall 7.6 Administrator documents:

Based on the FortiOS 7.6 Administration Guide and the Life of a Packet documentation (Parallel Path Processing), the FortiGate

follows a specific, hardcoded sequence when processing the first packet of a new session. This process is divided into several stages: Ingress, Kernel, and Egress.

The very first stage is Ingress, where all packets accepted by a network interface are processed by the TCP/IP stack. Immediately following this, the packet must pass through IP integrity header checking. This step involves reading the packet headers to verify that the packet is a valid protocol (TCP, UDP, ICMP, etc.) and that the header length is correct. This sanity check is performed before any other security functions, such as decryption (which occurs later in the Ingress stage) or the Reverse Path Forwarding (RPF) check (which occurs even later during the Routing step in the Kernel stage).

Installation of the session key (Option A) only occurs after the packet has matched a firewall policy and the session has been fully established and offloaded to the NPU. Therefore, IP integrity header checking is the absolute first security-related validation performed on an incoming packet.

NEW QUESTION # 63

.....

In order to save a lot of unnecessary trouble to users, we have completed our FCSS_EFW_AD-7.6 study questions research and development of online learning platform, users do not need to download and install, only need your digital devices have a browser, can be done online operation of the FCSS_EFW_AD-7.6 test guide. This kind of learning method is very convenient for the user, especially in the time of our fast pace to get FCSS_EFW_AD-7.6 Certification. When using our FCSS_EFW_AD-7.6 training materials, all the operations of the FCSS_EFW_AD-7.6 learning material of can be applied perfectly.
