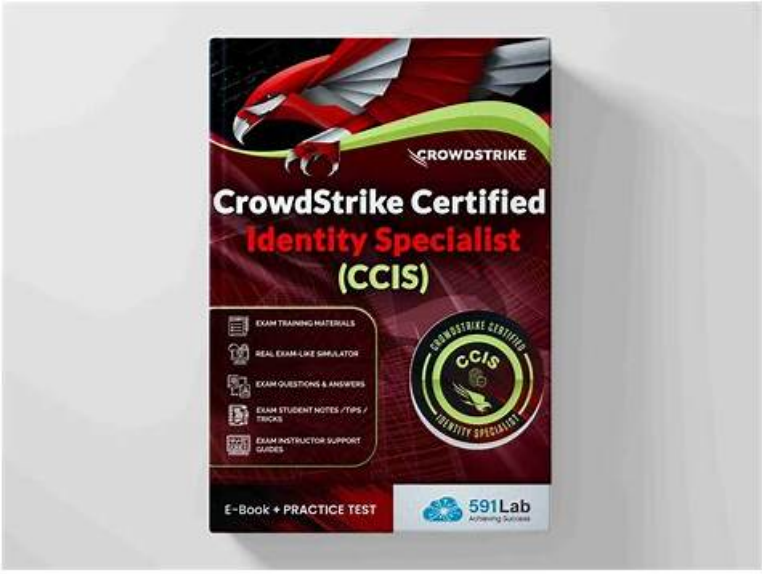
CrowdStrike - IDP - CrowdStrike Certified Identity Specialist(CCIS) Exam–Professional Valid Test Voucher



What's more, part of that TorrentVCE IDP dumps now are free: https://drive.google.com/open?id=1BCmQ67iHkiPXfEwSUczpK1FL1KqSQTqP

Our IDP learning materials were developed based on this market demand. More and more people are aware of the importance of obtaining a certificate. There are more and more users of IDP practice guide. Our products can do so well, the most important thing is that the quality of IDPexam questions is very good, and can be continuously improved according to market demand. And you can look at the data on our website, the hot hit of our IDP training guide can prove how popular it is!

In order to help you easily get your desired CrowdStrike IDP certification, CrowdStrike is here to provide you with the CrowdStrike IDP exam dumps. We need to adapt to our ever-changing reality. To prepare for the actual CrowdStrike IDP Exam, you can use our CrowdStrike IDP exam dumps.

IDP Simulation Questions & Interactive IDP Questions

As you know that the number of the questions and answers in the real IDP exam is fixed. So accordingly the information should be collected for you. Our IDP study materials have done the right thing for you. However, we will never display all the information in order to make the content appear more. Our IDP learning guide just want to give you the most important information. This is why IDP actual exam allow you to take the exam in the shortest possible time.

CrowdStrike IDP Exam Syllabus Topics:

Topic	Details
Topic 1	• Configuration and Connectors: Addresses domain controller monitoring, subnet management, risk settings, MFA and IDaaS connectors, authentication traffic inspection, and country-based lists.
Topic 2	• Multifactor Authentication (MFA) and Identity-as-a-service (IDaaS) Configuration Basics: Focuses on accessing and configuring MFA and IDaaS connectors, configuration fields, and enabling third-party MFA integration.

Topic 3	• Falcon Fusion SOAR for Identity Protection: Explores SOAR workflow automation including triggers, conditions, actions, creating custom • templated • scheduled workflows, branching logic, and loops.
Topic 4	• Zero Trust Architecture: Covers NIST SP 800-207 framework, Zero Trust principles, Falcon's implementation, differences from traditional security models, use cases, and Zero Trust Assessment score calculation.
Topic 5	• Risk Management with Policy Rules: Covers creating and managing policy rules and groups, triggers, conditions, enabling • disabling rules, applying changes, and required Falcon roles.
Topic 6	• Threat Hunting and Investigation: Focuses on identity-based detections and incidents, investigation pivots, incident trees, detection evolution, filtering, managing exclusions and exceptions, and risk types.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31
How does the Falcon sensor for Windows contribute to the enforcement in Falcon Identity Protection?

- A. Encrypts network traffic to ensure secure communication
- B. Collects and validates domain authentication events
- C. Manages user access and permissions on domain controllers
- D. Enforces strict password complexity rules for user accounts

Answer: B

Explanation:
The Falcon sensor for Windows plays a critical role in Falcon Identity Protection bycollecting and validating domain authentication eventsdirectly from domain controllers. According to the CCIS curriculum, the sensor inspects authentication protocols such as Kerberos, NTLM, and LDAP throughAuthentication Traffic Inspection (ATI).
This telemetry enables Falcon Identity Protection to analyze authentication behavior, build identity baselines, detect anomalies, and generate identity-based detections. The sensor does not enforce password policies, manage permissions, or encrypt network traffic-those functions belong to Active Directory and network infrastructure components.
By providinghigh-fidelity authentication telemetrywithout relying on log ingestion, the Falcon sensor enables real-time identity threat detection and Zero Trust enforcement. Therefore,Option Dis the correct and verified answer.

NEW QUESTION # 32
The Enforce section of Identity Protection is used to:

- A. Configure domains, appliances, subnets, connectors, risk configuration, and settings
- B. Define policy rules that determine what actions to take in response to certain triggers observed in the environment
- C. Gain an overview of the domain and indicate whether the domain follows best security practice
- D. View all identity-based detections and identity-based incidents in the environment

Answer: B

Explanation:
The Enforce section of Falcon Identity Protection is dedicated to policy-based identity enforcement.
According to the CCIS curriculum, this section allows administrators to define and manage Policy Rules and Policy Groups that specify how the platform should respond when identity-related conditions are detected.
These rules evaluate triggers such as risky authentication behavior, privilege misuse, compromised credentials, or elevated risk scores, and then execute actions like blocking access, enforcing MFA, or initiating Falcon Fusion workflows. Enforce is therefore the execution layer of Falcon's identity security model.
The other options correspond to different sections of the platform:

Configuration tasks are handled in Configure.
Detections and incidents are reviewed in Monitor or Explore.
Domain posture overviews are displayed in Domain Security Overview.
Because Enforce directly controls what actions are taken in response to identity risk, Option B is the correct and verified answer.

NEW QUESTION # 33
Which of the following statements isNOTtrue as it relates to Identity Events, Detections, and Incidents?

- A. An event can become an element of a detection that preceded it in time
- B. Not all events are security events that become elements of detections
- C. Events related to an incident that occur after the incident is marked In Progress will create a new incident
- D. A detection can become an element of an incident that preceded it in time

Answer: C

Explanation:
Falcon Identity Protection follows acorrelation and enrichment modelwhere events, detections, and incidents are dynamically linked over time. According to the CCIS curriculum,events that occur after an incident is marked In Progress do not automatically create a new incident. Instead, related events and detections are typicallyadded to the existing incident, provided they fall within the incident's correlation and suppression window.
This behavior allows Falcon to present asingle evolving incident, showing the full progression of an identity attack rather than fragmenting activity into multiple incidents. Therefore, statementA is not true.
The other statements are correct:
* Detections can be retroactively associated with incidents that occurred earlier if correlation logic determines relevance.
* Events can be linked to detections even if the detection is created after the event occurred.
* Not all events are security-relevant; many remain informational and never become detections.
This adaptive correlation model is a core concept in CCIS training and supports efficient investigation and incident lifecycle management. Hence,Option Ais the correct answer.

NEW QUESTION # 34
Where would a Falcon administrator enable authentication traffic inspection (ATI) for Domain Controllers?

- A. Identity management settings
- B. Identity protection settings
- C. Identity configuration policies
- D. Identity detection configuration

Answer: C

Explanation:
Authentication Traffic Inspection (ATI) is a foundational capability of Falcon Identity Protection that enables the platform to analyze authentication traffic from domain controllers. According to the CCIS documentation, ATI is enabled throughIdentity configuration policies.
Identity configuration policies define how the Falcon sensor captures and inspects authentication-related traffic, including Kerberos, NTLM, LDAP, and other identity protocols. Enabling ATI at this level ensures that domain controllers provide the necessary telemetry for identity risk analysis, detections, and behavioral profiling.
The other options are incorrect because:
* Identity management settings focus on identity governance and administration.
* Identity detection configuration controls detection logic, not traffic inspection.
* Identity protection settings manage high-level configuration but do not directly enable ATI.
Because ATI must be explicitly enabled viaIdentity configuration policies,Option Ais the correct and verified answer.

NEW QUESTION # 35
How many days will an identity-based incident be suppressed if new events related to the same incident occur?

- A. 5 days
- B. 7 days

- C. 30 days
- D. 14 days

Answer: A

Explanation:
Falcon Identity Protection usesincident suppression windowsto prevent alert fatigue while still maintaining accurate incident tracking. According to the CCIS documentation, whennew events related to an existing identity-based incident occur, the incident issuppressed for 5 days.
This suppression means that Falcon does not generate a new incident for the same activity during this window. Instead, additional detections areadded to the existing incident, allowing analysts to view the full progression of the threat in a single investigative context.
The 5-day suppression window ensures that ongoing identity attacks-such as repeated authentication abuse or lateral movement-are consolidated rather than fragmented across multiple incidents. This improves investigation efficiency and aligns with Falcon's incident lifecycle management approach.
Because the suppression period is fixed at5 days,Option Dis the correct and verified answer.

NEW QUESTION # 36
.....

our IDP exam questions beckon exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our IDP simulating exam is the best. Our effort in building the content of our IDP Study Materials lead to the development of learning guide and strengthen their perfection. To add up your interests and simplify some difficult points, our experts try their best to design our study material and help you understand the learning guide better.
