Handout 18.4.2026

I. Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 1 to 10.

[I] Shoppers who use the internet to research hotels, bookings, electronics and other purchases are being misled by millions of fake reviews orchestrated by companies to trick potential customers, the consumer watchdog warns today as it begins an inquiry. [II] More than half of the adults in Britain, around 25 million people, use online review websites such as Amazon, Tripadvisor, Expedia and Checkatrade to find the best deals. [III] But their impressions are "distorted" by the growth of a "clandestine" market for fake reviews, the Competition and Market Authority has discovered. [IV] Others were offering money, free product samples, or other "rewards" to people who wrote positive reviews or gave five-star ratings. In some cases, rival firms were posting disparaging remarks to cloud the judgement of potential customers. And some review websites were hiding negative reviews because they had commercial arrangements with the companies facing criticism.

The scale of the issue is unknown because fake reviews are difficult to spot, the CMA said. However, it expressed concern that abuse could be widespread. Although some websites told the regulator just 2 per cent of their reviews were spurious, other sources claimed the proportion was "much higher", the watchdog said. An investigation will now commence, and firms found to be acting illegally will be fined and their bosses may face prison.

Consumer groups welcomed the move because research showed around £23 billion of purchases a year were influenced by online reviews. Guy Anker, a director of consumer advice experts website, said: "It is utterly appalling that companies are engaging in practices where they are duping potential customers who just want an honest appraisal of their services. Review websites are a vital part of people's research, whether that's booking a hotel or buying a product, and so visitors need to be able to trust them."

One of the best-known specialist sites is Tripadvisor, which hosts hundreds of millions of reviews written by and for holidaymakers. Booking agents such as Expedia and retailers such as Amazon also provide reviews alongside their primary function of selling a product or service. Checkatrade has 1.8 million reviews of electricians, plumbers, builders and other tradesmen, while Reevo and Feefo collect and manage reviews on behalf of clients. Many of these are free to use with revenues coming from advertising, paid-for links, payments or commissions from the companies listed or the provision of "reputation management" services to these firms.

Practice tests for 250-573 PdfDumps are best for self-assessment. This helps improve errors and strengthen preparation. The practice test is among the most beneficial features offered by BraindumpsPrep to make sure that applicants are successful. It is advised to attempt the test multiple times.
