Our study materials with high quality and high pass rate in order to help you get out of your harassment.

CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q322-Q327):

NEW QUESTION # 322
Why is it important to consider the cloud ecosystem when developing applications?

- A. The role of the IT department will change.
- B. Cloud providers will do application development.
- C. The development process needs to change.
- D. This can speed up the development process.

Answer: D

NEW QUESTION # 323
A security policy states all user actions in a new cloud infrastructure must be tracked. Which of the following will meet this security requirement?

- A. Auditing
- B. Sanitization
- C. Encryption
- D. Hardening

Answer: A

Explanation:
Auditing involves tracking and recording user actions and activities within a system, ensuring that all interactions with the infrastructure are logged and can be reviewed for security or compliance purposes. This aligns with the security policy that requires tracking all user actions in the cloud infrastructure.

NEW QUESTION # 324
Which of the following must be implemented by a cloud provider to ensure that different entities can authenticate and share basic user accounting information?

- A. Scalability
- B. Virtualization
- C. Self service
- D. Federation

Answer: B

NEW QUESTION # 325
Which of the following cloud storage features helps move data online between different types of disks?

- A. Auto-tiering
- B. Deduplication
- C. Compression
- D. Load balancing

Answer: A

Explanation:
Auto-tiering is a cloud storage feature that automatically moves data between different types of storage disks (e.g., high-performance disks, standard disks, and archival disks) based on usage patterns. Data that is frequently accessed may be moved to faster, more expensive disks, while less frequently accessed data is moved to slower, cheaper disks. This helps optimize costs while ensuring the right performance for different types of data.

NEW QUESTION # 326

A company purchased insurance due to the risks involved with a cloud migration project. Which of the following risk response strategies is this an example of?

- A. Avoidance
- B. Mitigation
- C. Acceptance
- D. Transference

Answer: D

Explanation:
Transference is a risk response strategy that involves shifting the responsibility or impact of a risk to a third party, such as an insurance company, a vendor, or a partner. By purchasing insurance, the company transferred the financial liability of the cloud migration project to the insurance provider, in case of any losses or damages. Transference does not eliminate the risk, but it reduces the exposure of the company to the risk.

NEW QUESTION # 327

......

With regard to the Internet, if you use our CLO-002 study materials in a network environment, then you can use our products in a non-network environment. CLO-002 learning guide guarantee that you can make full use of all your free time to learn, if you like. The reason why we emphasize this is that we know you have a lot of other things to do. Many users stated that they can only use fragmented time to learn. Experts at CLO-002 practice prep also fully considered this point.
