Get the Salesforce Data-Architect certification by preparing through Salesforce Data-Architect exam questions that will help you pass the Salesforce Data-Architect exam.

Salesforce Certified Data Architect Sample Questions (Q75-Q80):

NEW QUESTION # 75

NTO has decided that it is going to build a channel sales portal with the following requirements:

1. External resellers are able to authenticate to the portal with a login.
2. Lead data, opportunity data and order data are available to authenticated users.
3. Authenticated users many need to run reports and dashboards.
4. There is no need for more than 10 custom objects or additional file storage.

Which community cloud license type should a data architect recommend to meet the portal requirements?

- A. Customer community.

- B. Partner community.
- C. Customer community plus.
- D. Lightning external apps starter.

Answer: B

Explanation:

Partner community license type is the best option for building a channel sales portal, as it allows external resellers to access lead, opportunity, and order data, as well as run reports and dashboards. Customer community and customer community plus license types are more suitable for customer service portals, while lightning external apps starter license type does not support reports and dashboards

NEW QUESTION # 76

A casino is implementing salesforce and is planning to build a customer 360 view for a customer who visits its resorts. The casino currently maintained the following systems that records customer activity:

1. Point of sales system: All purchases for a customer.
2. Salesforce: All customer service activity and sales activity for a customer.
3. Mobile app: All bookings, preferences and browser activity for a customer.
4. Marketing: All email, SMS and social campaigns for a customer.

Customer service agents using salesforce would like to view the activities from all system to provide supports to customers. The information has to be current and real time.

What strategy should the data architect implement to satisfy this requirement?

- A. Use a customer data mart to view the 360 view of customer.
- B. Explore external data sources in salesforce to build 360 view of customer.
- C. Periodically upload summary information in salesforce to build 360 view.
- D. Migrate customer activities from all 4 systems into salesforce.

Answer: B

Explanation:

Exploring external data sources in Salesforce to build 360 view of customer is the best strategy to satisfy the requirement, as it allows real-time access to data from other systems without storing it in Salesforce3. Using a customer data mart may not provide real-time information or may require additional integration efforts.

Migrating customer activities from all 4 systems into Salesforce may exceed the storage limits or cause data quality issues.

Periodically uploading summary information in Salesforce may not provide current or detailed information.

NEW QUESTION # 77

Universal Containers has a public website with several forms that create Lead records in Salesforce using the REST API. When designing these forms, which two techniques will help maintain a high level of data quality?

- A. Do client-side validation of phone number and email field formats.
- B. Prefer picklist form fields over free text fields, where possible.
- C. Ensure the website visitor is browsing using an HTTPS connection.
- D. Use cookies to track when visitors submit multiple forms.

Answer: A,B

NEW QUESTION # 78

Universal Containers has implemented Salesforce for its operations. In order for customers to be created in their MDM solution, the customer record needs to have the following attributes:

1. First Name
2. Last Name
3. Email

Which option should the data architect recommend to mandate this when customers are created in Salesforce?

- A. Create validation rules to check If the required attributes are entered.
- B. Configure Page Layout marking attributes as required fields.

- C. Build validation in Integration with MDM to check required attributes.
- D. Mark Fields for the attributes as required under Setup.

Answer: A

Explanation:

Creating validation rules to check if the required attributes are entered is the best option to mandate this when customers are created in Salesforce. Validation rules allow you to specify criteria that must be met before a record can be saved. You can use validation rules to ensure that customers have a first name, last name, and email when they are created in Salesforce. This way, you can prevent incomplete or invalid data from being sent to your MDM solution.

NEW QUESTION # 79

Universal Container is using Salesforce for Opportunity management and enterprise resource planning (ERP) for order management. Sales reps do not have access to the ERP and have no visibility into order status.

What solution a data architect recommends to give the sales team visibility into order status?

- A. Leverage Canvas to bring the order management UI in to the Salesforce tab.
- B. Build batch jobs to push order line items to salesforce.
- C. Build real-time integration to pull order line items into Salesforce when viewing orders.
- D. leverage Salesforce Connect to bring the order line item from the legacy system to Salesforce.

Answer: D

Explanation:

The correct answer is C, leverage Salesforce Connect to bring the order line item from the legacy system to Salesforce. Salesforce Connect is a feature that allows you to integrate external data sources with Salesforce and access them in real time without copying or synchronizing the data. This way, the sales team can view the order status from the ERP system without having access to it. Leveraging Canvas, building batch jobs, or building real-time integration are also possible solutions, but they are more complex and costly than using Salesforce Connect.

NEW QUESTION # 80

.....

In the modern world, obtaining Data-Architect certification is essential. With the growing popularity of Salesforce, the demand for professionals holding this Salesforce Certified Data Architect (Data-Architect) certification holders has increased significantly. Unfortunately, many candidates fail to pass the Data-Architect Exam due to outdated Salesforce Certified Data Architect (Data-Architect) exam study material.
