Microsoft Power Platform Functional Consultant Sample Questions (Q207-Q212):

NEW QUESTION # 207

You plan to create a canvas app.

The app requires a button on the data entry screen that users can select to send an email.

You need to configure the app.

What should you create?

- A. Azure Logic App
- B. Classic workflow
- C. Power Automate cloud flow
- D. Business process flow

Answer: C

NEW QUESTION # 208

You modify a model-driven app for a bicycle repair help desk. The model-driven app is for help desk users when customers have an issue with their bicycle.

After you add a custom table named bicycle, you configure the table for Microsoft Dataverse search. The table will contain information from callers about their bicycles. The account table is related to the custom table. Contact information is brought over to the custom table.

You add the following columns to the table:

Bicycle type

Tire brand

Special equipment

Users must be able to perform the following types of searches:

Search for all customers who have a bicycle type of Contoso and live in Florida.

Search all tables for any record that contains the word broken.

You need to decide which type of search will give you the results desired.

Which search should you configure? To answer, drag the appropriate search types to the correct requirements. Each search type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 209

You need to address the executive's concerns regarding unnecessary data access.

Which security changes should you make? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Assign records to a service account and add the team member doing the verification by using an access team.

When to use access teams

* The teams are dynamically formed and dissolved. This typically happens if the clear criteria for defining the teams, such as established territory, product, or volume aren't provided.

* The team members require different access rights on the records. You can share a record with several access teams, each team providing different access rights on the record. For example, one team is granted the Read access right on the account and another team, the Read, Write and Share access rights on the same account.

* A unique set of users requires access to a single record without having an ownership of the record.

Box 2: Assign records to the QV team when the service request is completed.

Issues: More employees than are required can access individual client information and continue to have access after a service request is completed.

Management has decided to create a new qualification verification (QV) role to help ensure that clients get the most accurate results. This role examines completed work to ensure that nothing is missed.

* When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

NEW QUESTION # 210

You have a canvas app that allows users to view, select, and purchase products. The app uses a Gallery control to display products and checkboxes that allow users to select products.

When users select items from the product catalog, they move to a different screen to complete a purchase.

Users must be able to clear all product selections when they click the button.

You need to configure the button.
What should you do?

- A. Set the OnCheck value to populate a collection and the OnUncheck value to remove the item from the collection. Clear collection when the user selects the button.
- B. Use the Reload(Control) formula and pass the gallery control as a parameter to the Reload formula.
- C. Use the ForAll() function to iterate through each item of the Gallery and clear user selections.
- **D. Use the Reset(Control) formula and pass the gallery control as a parameter to the Reset formula.**

Answer: D

NEW QUESTION # 211

A company uses Power Apps and Power Automate.

There is an issue with the existing flow in the test environment. Development changes are allowed in the test environment.

You need to troubleshoot the issue with the flow.

Which command should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation

□ Graphical user interface, text, application Description automatically generated

NEW QUESTION # 212

.....
