

Latest ZDTA Exam Practice | ZDTA New Test Bootcamp

ZCC - Answer✓Lightweight app that sits on users, endpoint, and enforces security policies and access controls, regardless of device location or application

- Creates tunnel to Zero trust Exchange for protection of SaaS and internet-bound traffic
- persistent control plane
- dynamic, micro-segmented data plane tunnels to the ZTE for internal app protection
- traffic delivered to application via corresponding outbound only data plane tunnel from Zscaler app connector

Time to check for software updates - Answer✓Every 2 hours

Time when ZCC will connect and download any policy updates for the app profiles and forwarding profiles - Answer✓Every hour

The Zscaler ZDTA exam questions on the platform have been gathered by subject matter experts to ensure that they accurately reflect the format and difficulty level of the actual Zscaler ZDTA exam. This makes these Zscaler Digital Transformation Administrator PDF Questions ideal for individuals looking to pass the Zscaler ZDTA Exam on their first try. You can evaluate the product with a free ZDTA demo.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 2	<ul style="list-style-type: none">• Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.

Topic 3	<ul style="list-style-type: none"> Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 4	<ul style="list-style-type: none"> Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform

ZDTA New Test Bootcamp - Exam ZDTA Preview

Our PDFTorrent are so confident on their own software, because the vast number of customers have made excellent achievements with the help of our ZDTA exam software from our research and development. There is no doubt that to get ZDTA exam certification certainly let them find better job opportunities to boost in their IT career. In order to let you trust our products and let you more securely to prepare the exam, we promise, if you are still fail ZDTA Exam after using our software, after still failed, we will give you a full refund, and continue to develop better Zscaler test software of ZDTA.

Zscaler Digital Transformation Administrator Sample Questions (Q82-Q87):

NEW QUESTION # 82

Layered defense throughout an organization security platform is valuable because of which of the following?

- A. Layered defense from multiple vendor solutions easily share attacker data.
- B. Layered defense increases costs to attackers to operate.**
- C. Layered defense with multiple endpoint agents protects from attackers.
- D. Layered defense ensures attackers are prevented eventually.

Answer: B

Explanation:

By deploying multiple, overlapping security controls at different layers, you force adversaries to overcome each barrier, significantly raising the cost, complexity, and time required for a successful attack.

NEW QUESTION # 83

In which of the following SaaS apps can you protect data at rest via Zscaler's out-of-band CASB solution?

- A. Google Drive.**
- B. Yahoo Mail
- C. Facebook.
- D. Twitter.

Answer: A

Explanation:

Zscaler's out-of-band CASB solution supports data-at-rest protection for cloud storage platforms like Google Drive, enabling scanning and governance of files stored there.

NEW QUESTION # 84

Which feature does Zscaler Client Connector Z-Tunnel 2.0 enable over Z-Tunnel 1.0?

- A. Enables SSL Inspection for Client Connector

- B. Enables Browser Isolation
- **C. Inspection of all ports and protocols via Cloud Firewall**
- D. Enables multicast traffic

Answer: C

Explanation:

Z-Tunnel 2.0 upgrades over 1.0 by carrying all ports and protocols through the Cloud Firewall for inspection - rather than being limited to just HTTP/HTTPS - ensuring full visibility and control.

NEW QUESTION # 85

Does the Cloud Firewall detect evasion techniques that would allow applications to communicate over non- standard ports to bypass its controls?

- A. As traffic usually is forwarded from an on-premise firewall, this firewall will handle any evasion and will make sure that the protocols are corrected.
- B. Zscaler Client Connector will prevent evasion on the endpoint in conjunction with the endpoint operating system's firewall.
- **C. The Cloud Firewall includes Deep Packet Inspection, which detects protocol evasions and sends the traffic to the respective engines for inspection and handling.**
- D. The Cloud Firewall includes an IPS engine, which will detect the evasion techniques and will just block the transactions as it is invalid.

Answer: C

Explanation:

The Cloud Firewall includes Deep Packet Inspection (DPI) capabilities that detect protocol evasion techniques where applications try to communicate over non-standard ports to bypass firewall controls. Once detected, the traffic is sent to the appropriate inspection engines for further handling and mitigation. This ensures that evasive traffic does not bypass security controls.

NEW QUESTION # 86

Which of the following is unrelated to the properties of 'Trusted Networks'?

- A. Default Gateway
- B. DNS Server
- **C. Org ID**
- D. Network Range

Answer: C

Explanation:

Trusted Networks in Zscaler are defined using network-specific parameters such as DNS Server, Default Gateway, and Network Range, which are used to identify known internal networks. These properties help Zscaler Client Connector recognize when a device is on a corporate network. Org ID, however, is unrelated to the network characteristics and is instead associated with tenant identification in Zscaler's cloud infrastructure.
