SAP C-SIGVT-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Monitoring Transformation Progress using SAP Cloud ALM: This section of the exam measures the capabilities of Cloud ALM Specialists and covers the use of SAP Cloud ALM to track project progress and operational performance. It explains how Cloud ALM supports implementation tasks, monitors system health, and provides visibility into key milestones. Candidates learn how to use the platform to support continuous governance and ensure transformation activities remain on track.
Topic 2	• Exploring SAP Cloud Strategy: This section of the exam measures the skills of Cloud Strategy Analysts and focuses on SAP overall cloud vision, deployment models, and strategic direction. It includes understanding the value of cloud adoption, SAP portfolio of cloud solutions, and how organizations benefit from modern cloud architectures. The section validates foundational knowledge of SAP cloud ecosystem and its relevance to transformation.
Topic 3	• Validating Business Processes with SAP Signavio: This section of the exam measures the skills of Business Process Analysts and covers the use of SAP Signavio to evaluate, analyze, and validate business processes during transformation projects. It focuses on understanding how process insights support decision-making and how Signavio helps identify gaps between current operations and desired outcomes. The section ensures candidates can apply Signavio tools to support business process optimization.

Topic 4	• Exploring the SAP Business Transformation Methodology: This section of the exam measures the skills of Transformation Consultants and introduces SAP structured methodology for guiding organizations through transformation programs. It covers the stages, principles, and frameworks used to support business evolution, ensuring candidates understand how SAP's methodology enables structured planning, execution, and adoption across transformation lifecycles.
Topic 5	• Using LeanIX for Enterprise Architecture Validation: This section of the exam measures the abilities of Enterprise Architects and focuses on using LeanIX to validate architecture landscapes. It includes understanding how LeanIX maps applications, data, and business capabilities to support modernization efforts. The domain emphasizes validating architecture readiness and ensuring that the existing IT landscape aligns with transformation goals.

NEW QUESTION # 20
What does Cloud ALM Integration & Exception Monitoring track?

- A. Cross-system process adherence
- B. Communication failures between systems
- C. Cloud API changes
- D. Business partner roles

Answer: B

Explanation:
Integration & Exception Monitoring in SAP Cloud ALM provides transparency into message flows and data exchanges between integrated systems. It identifies communication failures, processing delays, and error situations across cloud and on-premise landscapes. This helps operations teams quickly identify root causes and ensure uninterrupted business processes. It does not track master data roles or cross-system process conformance; its focus is strictly on integration health and exception handling.
