- D. Test Execution app

Answer: B

Explanation:

Step 1 - Understanding the question

This question asks where to create test cases in SAP Cloud ALM to document formal tests.

SAP Cloud ALM provides a testing framework to plan, prepare, execute, and monitor test activities.

Step 2 - Evaluate each option

Option A: Test Preparation app

Correct.

The Test Preparation app in SAP Cloud ALM is used to create and manage test cases.

It allows users to define test case details, steps, expected results, and link them to requirements or business processes.

Option B: Test Plan app

Incorrect.

The Test Plan app is used to organize and group existing test cases into a testing cycle, not to create them.

Option C: Manage Your Test Processes app

Incorrect.

There is no specific app called "Manage Your Test Processes" in SAP Cloud ALM's testing module.

Option D: Test Execution app

- B. Change the status to In Testing
- C. Assign the test case to a test plan
- D. Change the status to In Preparation

In SAP Cloud ALM, testing activities are organized using test plans and test cases. A test plan defines the testing scope and timeline, while test cases represent individual tests that need to be executed. To assign a business process test to a tester, both the relationship between plan and case and the status must be properly maintained.

B). Change the status to In Testing

The test case must have the status "In Testing" before a tester can execute it. This status indicates that the test case is ready for assignment and execution.

D). Assign the test case to a test plan

You must assign the test case to a test plan to make it part of an organized testing cycle. Only after this link is created can individual testers be assigned to execute specific test cases within the plan.

* A. Change the status to In Preparation: This is an earlier phase before testing begins.

* C. Assign the test plan to a test case: The relationship works the other way around; test cases are assigned to test plans.
