# Desktop and Web-Based Practice Exams to Evaluate Cloud-Deployment-and-Operations Exam Preparation

BTW, DOWNLOAD part of iPassleader Cloud-Deployment-and-Operations dumps from Cloud Storage: https://drive.google.com/open?id=1AE9GHhVtDZP8eu4UNrMwVZUoGu56xOdM

Our web-based practice exam software is an online version of the WGU Cloud-Deployment-and-Operations practice test. It is also quite useful for instances when you have internet access and spare time for study. To study and pass the certification exam on the first attempt, our WGU Cloud-Deployment-and-Operations Practice Test software is your best option. You will go through WGU Cloud-Deployment-and-Operations exams and will see for yourself the difference in your preparation.

It can be said that all the content of the Cloud-Deployment-and-Operations prepare questions are from the experts in the field of masterpieces, and these are understandable and easy to remember, so users do not have to spend a lot of time to remember and learn our Cloud-Deployment-and-Operations exam questions. It takes only a little practice on a daily basis to get the desired results. Especially in the face of some difficult problems, the user does not need to worry too much, just learn the Cloud-Deployment-and-Operations Practice Guide provide questions and answers, you can simply pass the Cloud-Deployment-and-Operations exam.

Cloud-Deployment-and-Operations WGU Cloud Deployment and Operations For Guaranteed Success

The update for our Cloud-Deployment-and-Operations learning guide will be free for one year and half price concession will be offered one year later. In addition to the constantly update, we have been working hard to improve the quality of our Cloud-Deployment-and-Operations Preparation prep. I believe that with the help of our study materials, the exam is no longer an annoyance. Hope you can give not only our Cloud-Deployment-and-Operations training materials but also yourself a chance.

WGU Cloud Deployment and Operations Sample Questions (Q32-Q37):

NEW QUESTION # 32

(Which two solutions should an administrator use to receive emails when a Lambda function returns an error?
Choose 2 answers.)

- A. Amazon Simple Notification Service
- B. AWS CloudTrail
- C. Amazon Simple Queue Service
- D. Amazon CloudWatch

Answer: A,D

Explanation:

To receive emails when a Lambda function returns an error, the administrator should use Amazon CloudWatch to monitor the function's logs and metrics (e.g., errors) and Amazon Simple Notification Service (SNS) to send email notifications based on CloudWatch alarms. The WGU Cloud Deployment and Operations Study Guide (Section 4.3, CloudWatch and SNS) states, "CloudWatch can detect Lambda errors via logs and trigger an alarm, which integrates with SNS to send email notifications to subscribed endpoints, ensuring timely error alerts." SQS and CloudTrail are not designed for this notification workflow.

NEW QUESTION # 33

(Which two solutions are supported by CloudWatch? Choose 2 answers.)

- A. Instance monitoring
- B. Load balancing
- C. Event response
- D. Threat detection

Answer: A,C

Explanation:

Amazon CloudWatch supports several monitoring and management solutions, including event response and instance monitoring. Event response is facilitated through CloudWatch Events, which can trigger actions based on predefined rules, such as invoking AWS Lambda functions. Instance monitoring involves collecting and tracking metrics from Amazon EC2 instances, providing visibility into performance and health. The WGU Cloud Deployment and Operations Study Guide (Section 4.1, CloudWatch Overview) highlights that CloudWatch is designed for instance monitoring and event-driven responses, while load balancing and threat detection are handled by services like Elastic Load Balancing and GuardDuty, respectively.

NEW QUESTION # 34

(What is the role of AWS Trusted Advisor?)

- A. It provides an assessment on unused IAM roles.
- B. It provides recommendations to help follow AWS best practices.
- C. It provides recommendations on patches to be performed on resources.
- D. It provides a holistic overview of the health of architecture.

Answer: B

Explanation:

AWS Trusted Advisor provides recommendations to help follow AWS best practices, analyzing the environment for cost optimization, security, performance, and fault tolerance. It offers actionable insights to improve resource usage. The WGU Cloud Deployment and Operations Study Guide (Section 6.4, Trusted Advisor) states, "Trusted Advisor evaluates your AWS environment against best practices, providing recommendations in categories like cost optimization and security (e.g., enabling MFA or removing unused resources)." Options A, B, and C overstate or misrepresent its role, as it does not focus solely on unused IAM roles, holistic health overviews, or patch recommendations.

NEW QUESTION # 35

(Which AWS solution can send email based on CloudWatch alarms?)

- A. Kinesis

- B. Simple Queue Service (SQS)
- C. Amplify
- D. Simple Notification Service (SNS)

Answer: D

Explanation:
Amazon CloudWatch alarms can trigger notifications when a metric breaches a defined threshold. The AWS solution designed to send emails based on these alarms is Amazon Simple Notification Service (SNS). SNS supports sending notifications via email, SMS, and other protocols when subscribed endpoints are triggered by CloudWatch alarms. The WGU Cloud Deployment and Operations Study Guide (Section 4.3, Monitoring and Alarms) states that SNS is the primary service for delivering notifications from CloudWatch, allowing users to configure emailsubscriptions for alarm states. Other options like SQS, Amplify, and Kinesis are not designed for this purpose.

NEW QUESTION # 36
(Which type of support plan provides a technical account manager and full use of Trusted Advisor?)

- A. Enterprise
- B. Business
- C. Standard
- D. Developer

Answer: A

Explanation:
The Enterprise support plan provides a technical account manager (TAM) and full use of Trusted Advisor, offering proactive guidance and comprehensive access to all checks. This plan is designed for large-scale, mission-critical workloads. The WGU Cloud Deployment and Operations Study Guide (Section 6.4, AWS Support Plans) states, "The Enterprise support plan includes a dedicated Technical Account Manager and full Trusted Advisor access, providing 24/7 support and proactive optimization recommendations." Developer, Standard, and Business plans offer limited or no TAM support and partial Trusted Advisor access.

NEW QUESTION # 37
......

You will find the key points as well as the latest question types of the exam are included in our Cloud-Deployment-and-Operations training materials, Once the update comes out, we will inform our customers who are using our Cloud-Deployment-and-Operations guide torrent so that they can have a latest understanding of Cloud-Deployment-and-Operations exam preparation.
