高質量的DA0-001測試和資格考試中的領先供應平臺 & 有效的DA0-001: CompTIA Data+ Certification Exam

DA0-001 認證是業界最廣泛認可的IT技術認證之一，也是業界最權威、最受尊敬的認證之一。全新的微軟認證技術工程師認證提供IT專家一個更清楚明確的架構，讓他們展現其技術技巧、以及針對特殊開發人員之工作角色時

所需的技能。如果你正在準備 DA0-001 認證考試，為 CompTIA 認證做最後衝刺，就可以使用 PDFExamDumps 考試題庫參加 DA0-001 考試，再加上你的認真態度，包您一次通過。

要獲得 CompTIA DA0-001 認證，候選人需通過一次涵蓋各種主題的考試。這些主題包括數據分析方法和技巧、數據可視化和報告、數據質量管理以及統計分析。候選人必須展示對這些主題的知識和各種行業，例如醫療、金融和教育等，所需要有效數據分析實務技能。

最新的 CompTIA Data+ DA0-001 免費考試真題 (Q320-Q325):

問題 #320

A Chief Executive Officer (CEO) is requesting more up-to-date sales data for improved visibility prior to month-end. An analyst must determine the frequency of a sales report that was previously distributed on an as-needed basis. Which of the following would be the most appropriate frequency for this report?

- A. Every other month
- B. Quarterly
- C. Monthly
- **D. Weekly**

答案：D

解題說明：

Explanation

The most appropriate frequency for the sales report is weekly, as this will provide the CEO with more up-to-date sales data for improved visibility prior to month-end. A weekly sales report can show the sales performance, trends, and issues of the sales team on a regular basis, and help the CEO to monitor and evaluate the progress and results of the sales activities. A weekly sales report can also help the CEO to identify and address any problems or opportunities that may arise during the month, and to make timely and informed decisions.

問題 #321

A data analyst needs to calculate the mean for Q1 sales using the data set below:

□ Which of the following is the mean?

- A. \$2,667.60
- **B. \$3,082.72**
- C. \$2,466.18
- D. \$12,330.88

答案：B

解題說明：

The mean is the average of all the values in a data set. To calculate the mean, we add up all the values and divide by the number of values. In this case, the mean for Q1 sales is $(\$2,000 + \$3,000 + \$4,000 + \$2,500 + \$3,500) / 5 = \$3,082.72$ Reference:

問題 #322

Consider this dataset showing the retirement age of 11 people, in whole years:

54, 54, 54, 55, 56, 57, 57, 58, 58, 60, 60

This tables show a simple frequency distribution of the retirement age data.

□

- A. 0
- B. 1
- C. 2
- **D. 3**

答案：D

解題說明：

A measure of central tendency (also referred to as measures of centre or central location) is a summary measure that attempts to

describe a whole set of data with a single value that represents the middle or centre of its distribution.

There are three main measures of central tendency: the mode, the median and the mean. Each of these measures describes a different indication of the typical or central value in the distribution.

What is the mode?

The mode is the most commonly occurring value in a distribution.

The most commonly occurring value is 54, therefore the mode of this distribution is 54 years.

問題 #323

Which of the following query optimization techniques involves examining only the data that is needed for a particular task?

- A. Creating a flat file
- B. Making a temporary table
- C. Creating an execution plan
- D. Indexing documents

答案： D

解題說明：

The correct answer is C. Indexing documents.

Indexing documents is a query optimization technique that involves creating a data structure that allows faster access to the data in the documents. Indexing documents can reduce the amount of data that needs to be scanned for a particular query, thus improving the performance and efficiency of the query. Indexing documents can also help with searching, sorting, filtering, and aggregating the data in the documents¹²

問題 #324

A business intelligence engineer needs to reduce the size of a data model for reporting purposes. The data set contains more than one million rows, and the table has a date-time column named Date. Which of the following should the analyst do to complete this task?

- A. Trim the date.
- B. Change the data type of the Date column to text.
- C. Split the Date column into two columns-time and date.
- D. Round the hour of the Date column to the start of the hour.

答案： D

解題說明：

Comprehensive and Detailed In-Depth

When dealing with large datasets, optimizing data storage is crucial for performance and efficiency. The Date column, containing date-time values, can be optimized by reducing its precision, thereby decreasing the storage requirements.

Changing the data type to text: Converting the Date column to text would likely increase the storage size and complicate date-time operations, as text representations are less efficient for date-time computations.

Trimming the date: This option is ambiguous. If it refers to removing time components, it could lead to loss of essential information.

Rounding the hour to the start of the hour: By adjusting the time to the top of the hour (e.g., 10:45 becomes 10:00), the precision is reduced, which can decrease the storage size and improve performance without significant loss of essential information.

Splitting into two columns-time and date: This approach increases the number of columns and may not effectively reduce the overall data size.

Therefore, rounding the hour to the start of the hour is the most effective method to reduce the data model's size while preserving essential temporal information.

問題 #325

.....

DA0-001 認證是互聯網界具有極大聲望的網路技能認證，在全球，通過IBM認證考試的工程師，平均年薪在10萬元以上。通過 HP 認證考試的工程師，平均年薪在30萬元以上。獲得 CompTIA 的 DA0-001 認證的工程師，平均年薪也不低於20萬人民幣。據說，這還只是基本工資，不包括獎金，紅利和其他非工資性補貼。難怪美國副總統戈爾曾把 CompTIA DA0-001 認證恰當而幽默地稱為“獲得高技術，高薪水的頭等艙船票”。
