Scrum Professional Scrum Product Owner II Sample Questions (Q83-Q88):

NEW QUESTION # 83
The CEO questions Mike, the Product Owner, on the data showing the usage rates. He believes feature usage is not the right measure. You are the Product Owner, you have confirmed that the data is accurate and determine that the data is valuable to the team and product.
What should you do? (choose the best answer)

- A. Continue to measure and publish the data and use it to inform your decisions.
- B. Stop measuring to appease the CEO.
- C. Continue to measure the usage feature but not publish the data.

Answer: A

NEW QUESTION # 84
True or False: Some say adding more features always generate more value.

- A. False
- B. True

Answer: A

NEW QUESTION # 85
According to the Scrum Guide, what would be considered the smallest Product Increment that would be valuable enough to be released? (choose the best answer)

- A. The Increment includes fixes for at least one defect
- B. The Increment adds a new feature.
- C. The Increment delivers all "must have" Product Backlog items
- D. The Increment delivers a single new or improved outcome.

Answer: D

At the same time, we are very concerned about social information and will often update the content of our PSPO-II Exam Questions.

Scrum Professional Scrum Product Owner II Sample Questions (Q81-Q86):

NEW QUESTION # 81
Your stakeholders are very demanding and each of them has at least one feature that they say is essential for the next release. As the Product Owner, you have validated that the feature requests are all valid requests and would likely add value to your product. What should you do? (Choose the best answer)

- A. Pick the two most influential stakeholders and satisfy their needs, then release.
- B. Release when you can satisfy at least a single outcome, even though not all features are implemented.
- C. Wait until all essential features are complete before releasing the product.
- D. Escalate to the steering committee to make the call.

Answer: B

NEW QUESTION # 82
Which of the following statements is true about the Product Vision?
(choose the best answer)

- A. It evolves as the Scrum Team learns more about customers and their needs.
- B. All of the above.
- C. It is the shared responsibility of the Scrum Team to develop and evolve.
- D. None of the above.
- E. It must be completely free from discussions about strategic technology choices.

Answer: A

Explanation:
Option A is the best answer because it reflects the agile and empirical nature of Scrum and Product Ownership. The Product Vision is a concise and inspiring statement that describes the purpose, direction, and value proposition of the product1. The Product Vision is not a fixed or static document, but rather an emergent and dynamic one that adapts to the changing environment, needs, and feedback. The Product Owner is accountable for creating and communicating the Product Vision to the Scrum Team and the stakeholders2. The Product Owner collaborates with the Scrum Team and the stakeholders to inspect and adapt the Product Vision based on the new insights, opportunities, and learnings that arise from the changing environment34. The Product Owner also uses various techniques, such as product discovery, user research, market analysis, and experiments, to validate and refine the Product Vision5 .
Option B is not the best answer because it contradicts the accountability of the Product Owner. The Product Owner is the sole person responsible for managing the Product Backlog and maximizing the value of the product and the work of the Scrum Team. The Product Owner is also the sole person responsible for creating and communicating the Product Vision to the Scrum Team and the stakeholders2. The Product Owner may seek input and feedback from the Scrum Team and the stakeholders, but the final decision and authority on the Product Vision belongs to the Product Owner.
The Scrum Team and the stakeholders are not accountable for developing and evolving the Product Vision, but they are expected to understand and support it .
Option C is not the best answer because it contradicts the reality and complexity of product development. The Product Vision is not a technical specification, but rather a strategic and business-oriented statement that guides the development of the product1. The Product Vision does not prescribe how the product should be built, but rather why and what the product should achieve.
However, the Product Vision is not completely detached from the technical aspects of the product, as the technology choices may have an impact on the feasibility, desirability, and viability of the product. The Product Owner should be aware of the strategic

technology choices and their implications, and discuss them with the Development Team and the stakeholders, as part of the product discovery and validation process .

15: [Experiments]

NEW QUESTION # 83

When the Product Owner is too busy to work with all of the teams in a multi-team product development effort, which strategy will help them?
(choose the best answer)

- A. Assign sub-Product Owners to each Scrum Team.
- B. All of the above.
- C. Communicate a clear Product Goal and delegate some activities to the Developers.
- D. Enlist the Program Management Office to help coordinate work.
- E. Add component team Product Owners.

Answer: C

Explanation:
The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. They are also accountable for effective Product Backlog management, which includes clearly expressing Product Backlog items, ordering them to best achieve goals and missions, ensuring that the Product Backlog is transparent, visible and understood. The Product Owner may do the above work or may delegate the responsibility to others. However, the Product Owner remains accountable1. When working with multiple Scrum Teams on the same product, the Product Owner should ensure that there is a shared understanding of the Product Goal among all the teams and stakeholders. The Product Goal is the long-term objective for the Scrum Team. They must fulfill (or abandon) one objective before taking on the next2. The Product Owner should also collaborate with the Developers to create and refine Product Backlog items that are valuable, feasible, and testable. The Developers are accountable for creating a plan for the Sprint, the Sprint Backlog1. The Product Owner should trust the Developers to self-organize and deliver the most valuable increments possible.
The other options are not recommended strategies for the Product Owner, as they may introduce unnecessary complexity, confusion, and waste. Adding component team Product Owners, enlisting the Program Management Office, or assigning sub-Product Owners may create silos, dependencies, and conflicts among the teams and stakeholders. These roles may also undermine the authority and accountability of the Product Owner, and reduce the transparency and alignment of the Product Backlog. The Product Owner should work with the Scrum Master and the Developers to find ways to optimize the value delivery and collaboration across the teams, rather than creating intermediaries or proxies34. NEW QUESTION # 84

If a Scrum Team uses Product Backlog refinement, when should it occur?
(choose the best two answers)

- A. Business Analysts in the organization should do this work for the Scrum Team 1-
  2 Sprints ahead of the development Sprints.
- B. The Product Owner and the Developers do it in the current Sprint if they have been unable to do it in preceding Sprints.

- C. The Product Owner takes the time between the Sprints to do it.
- D. The Product Owner must do this as essential work in Sprint 0.
- E. The Product Owner and the Developers can refine the Product Backlog during any Sprint as needed, ideally in advance of the upcoming Sprint.

Answer: B,E

Explanation:
Product Backlog refinement is an ongoing activity that can occur at any time during a Sprint, as needed. The Product Owner and Developers collaborate on this task, ideally in advance of the upcoming Sprint to ensure clarity and readiness of the work . If refinement has not been done in preceding Sprints, it should be done in the current Sprint to maintain the flow of valuable work (E). This approach is consistent with the Scrum principle of continuous improvement and the iterative, incremental nature of Scrum12.

NEW QUESTION # 85
Which of the following measures would help you understand the potential market for your product? (choose the best answer)

- A. Market Share trends.
- B. All of the above.
- C. Net Promoter Score (NPS).
- D. Quarterly revenue trends.
- E. Usage Index.

Answer: B

NEW QUESTION # 86
