### Salesforce Certified Heroku Architect Sample Questions (Q18-Q23):

#### NEW QUESTION # 18

Universal Containers wants to ensure that Service Appointments are only assigned to Active Resources. What configuration should a Consultant recommend for the Scheduling Policy?

- A. Match Fields
- **B. Match Boolean**
- C. Preferred Resources
- D. Required Resources

**Answer: B**

#### NEW QUESTION # 19

A ClientService Representative (CSR) receives a call from a customer on Saturday. The CSR determines that the customer is covered, but the coverage is about to expire.

Which two upsell activities should the CSR consider? (Choose two.)

- A. Open a Case and send email with new Service offerings.
- B. Open a Case and a renewal Opportunity for the Sales team.
- C. Open a Case and create a Work Order for the Dispatch Team.
- D. Open a Case and inform Customer of weekend service pricing.

**Answer: A,D**

#### NEW QUESTION # 20

UniversalContainers (UC) has an on-premise application for reporting damage to their shipments. They want to migrate the application to Heroku. The damage reporting process includes uploading one or more pictures to the application which temporarily stores them on the local system. After the report is submitted, a case is created in UC's Salesforce org for processing, and the images are deleted from the file system. The application's configuration is read from environment variables that are specified in the system user's profile.

The application writes its logs to rotating files using an open-source library. Which two recommendations should an Architect make to ensure that the application runs correctly on Heroku? Choose 2 answers.

- A. Run the application in a Private Space to enable communication with UC's Salesforce org
- B. Write `ENV` in `std::map` instead of `write` in `thpm` in the `flip` `svstpm`
- C. Use an external object storage service for temporary image uploads
- D. Load the application's configuration from its source code instead of using environment tables

**Answer: B,D**

Explanation:

#### NEW QUESTION # 21

To satisfy the requirements of an upcoming compliance audit, a client must provide a record of all interactive commands run against a production application in the last six months. Which Heroku feature should an Architect recommend to help with this use case?

- A. SSH tunneling using Heroku Exec
- B. Private Space Logging
- C. Heroku Shield keystroke logging
- D. Dataclips

**Answer: C**

Explanation:

- <https://devcenter.heroku.com/articles/event-driven-microservices-with-apache-kafka>

#### NEW QUESTION # 22

Universal Containers utilizes two contractors, Contractor 1 and Contractor 2, to perform repair work. Contractor 1 has provided service longer for Universal Containers and is considered to have more repair work expertise than Contractor 2.

How should a Consultant configure this expertise for Contractor 1 versus Contractor 2?

- A. Assign Contractor 1 and 2 different Skill Levels for repair Work Type.
- B. Assign Contractor 1 as a Preferred Resource.
- C. Assign Contractor 2 as an Excluded Resource
- D. Assign Contractor 1 and 2 different capacities for repairwork

**Answer: A**
