問題 #21

Which of the following describes the role of the Scrum Master?

- A. Responsible for monitoring progress against the baselined Delivery Plan
- B. Accountable for maximizing the value of the product or service resulting from the work of their scrum teams.
- **C. Accountable for establishing Scrum, both within the Scrum Team and the wider organization, and for helping everyone understand and enact Scrum theory, practices, rules, and values.**
- D. Responsible for approving the solution as technically fit for purpose prior to deployment.

答案： C

解題說明：

In an agile context, the Scrum Master embodies servant leadership, coaching the team and the organization to apply Scrum effectively. Their accountability is to establish and uphold Scrum's empirical approach—transparency, inspection, and adaptation—by ensuring events, artifacts, and values are understood and used as intended. They remove impediments that hinder flow, facilitate collaboration with stakeholders, and help the team focus on outcomes guided by the Sprint and Product Goals. Crucially, the Scrum Master does not manage scope, schedule, or approve the technical solution; those duties lie with product ownership and technical leadership. Nor do they "maximize value" directly—that accountability belongs to the Product Owner. Instead, the Scrum Master improves the system of work so the team can deliver value predictably and sustainably, fostering continuous improvement and adherence to agreed quality standards (e.g., Definition of Done). This aligns with option A and distinguishes it from the governance or authority-centric responsibilities implied by the other options.

問題 #22

In which of the following circumstances should processes and tools be prioritized over individuals and interactions?

- **A. None of the above**
- B. Contractual obligations
- C. Need to demonstrate formal control over processes
- D. Requirement to create and approve documentation

答案： A

解題說明：

The Agile Manifesto explicitly values "individuals and interactions over processes and tools." AgilePM fully aligns with this principle. While processes, tools, documentation, and contracts are important and often necessary (especially for governance, compliance, and clarity), they should not take precedence over effective collaboration, empowered teams, and rapid feedback. AgilePM's practices—facilitated workshops, daily coordination, frequent reviews, and active business involvement—are designed to maximize human interaction to reduce waste, accelerate understanding, and improve quality. Even in regulated or contractual contexts, AgilePM recommends shaping processes and agreements to enable collaboration (e.g., clear roles, decision latency reduction, acceptance criteria, and incremental validation) rather than letting procedures dominate. Therefore, no listed circumstance justifies prioritizing processes and tools over individuals and interactions. The right choice is D. None of the above.

問題 #23

When using the Iterative Development technique, which of the following should each cycle include?

1. Thought
2. Action
3. Control
4. Conversation

- A. 2, 3, 4
- **B. 1, 2, 3**
- C. 1, 3, 4
- D. 1, 2, 4

答案： B

解題說明：

When using the Iterative Development technique, each cycle should include Thought, Action, and Control. These components ensure that the development process is systematic and reflective. Thought involves planning and considering the next steps, Action is the implementation of those plans, and Control is the evaluation and adjustment based on feedback and results. This iterative cycle helps in refining the product incrementally and ensures continuous improvement.

問題 #24

According to the 'change formula' (Beckhard and Harris), which response will increase an individual's 'dissatisfaction with the status quo'?

- **A. Communicate the danger of inaction.**
- B. Focus on the benefits of the change.
- C. Clarify the steps users need to take.
- D. Amend performance targets during the change.

答案： A

解題說明：

* Communicating the Danger of Inaction: Highlighting risks of not changing amplifies dissatisfaction with the status quo, creating urgency and driving motivation for change.

* Other Options:

* A: Performance targets align with accountability, not dissatisfaction.

* C: Clarifying steps supports action but doesn't address dissatisfaction.

* D: Benefits focus on the positive outcome, not dissatisfaction.

問題 #25

What role, ideally, should be independent of the outcome to be achieved in a Facilitated Workshop?

- **A. Workshop Facilitator**
- B. Business Ambassador
- C. Business Analyst
- D. Business Visionary

答案： A
