C_OCM_2503 Valid Braindumps Files - C_OCM_2503 Valid Exam Syllabus

Here in this Desktop practice test software, the SAP Certified Associate - Organizational Change Management (C_OCM_2503) practice questions given are very relevant to the actual SAP Certified Associate - Organizational Change Management (C_OCM_2503) exam. It is compatible with Windows computers. VCEPrep provides its valued customers with customizable SAP Certified Associate - Organizational Change Management (C_OCM_2503) practice exam sessions. The SAP Certified Associate - Organizational Change Management (C_OCM_2503) practice test software also keeps track of the previous SAP C_OCM_2503 practice exam attempts.

SAP Certified Associate - Organizational Change Management Sample Questions (Q77-Q82):

NEW QUESTION # 77

What are typical tasks of a change manager in cloud projects? Note: There are 3 correct answers to this question.

- A. Providing expertise for handling people-related challenges
- B. Supporting the execution of change management activities
- C. Acting as key speakers in information sessions for the business
- D. Advising all leaders how to break resistance within their team
- E. Orchestrating the change management activities

Answer: A,B,E

Explanation:

The change manager in SAP cloud projects drives OCM execution. Option A is correct because orchestrating activities (e.g., coordinating communication, training) ensures a cohesive effort, like a conductor aligning an orchestra-e.g., timing stakeholder workshops with project milestones. Option C is correct as providing expertise on people challenges (e.g., resistance, skill gaps) guides the project team, offering solutions like tailored enablement. Option D is correct because supporting execution (e.g., facilitating workshops, reviewing plans) ensures activities succeed, often hands-on with the team.

Option B is incorrect-"advising all leaders" overstates the role; change managers coach key leaders, but breaking resistance is a shared leadership task. Option E is incorrect; while they might speak, key speakers are often sponsors or leaders for authority-change managers focus on planning, not presenting. SAP OCM defines the change manager as a strategic coordinator and expert. "Change managers orchestrate OCM activities, provide people-focused expertise, and support execution to ensure project success" (SAP Activate, Change Manager Role).

NEW QUESTION # 78

What are possible options for setting up organizational change management in the project organization? Note: There are 3 correct answers to this question.

- A. As part of the functional sub-projects
- B. As a separate project
- C. As a cross-topic
- D. As a staff unit
- E. As a subproject

Answer: B,C,E

NEW QUESTION # 79

What are typical tasks a change manager performs after the conduction of a change impact analysis workshop? Note: There are 3 correct answers to this question.

- **A. Plan and conduct validation sessions with the impacted stakeholder groups**
- B. Visualize quantitative ratings and aggregate qualitative insights
- **C. Drive and facilitate the development of follow-up activities**
- **D. Create and align the result report**
- E. Review and refine the KPIs to measure user adoption after go-live

Answer: A,C,D

Explanation:

After a change impact analysis (CIA) workshop, the change manager transitions from data collection to action planning and communication. Option A is correct because driving and facilitating follow-up activities (e.g., communication plans, training sessions) ensures the CIA findings translate into actionable steps to address impacts. This involves collaborating with stakeholders to prioritize and design interventions. Option B is correct as planning and conducting validation sessions with impacted groups confirms the accuracy of findings and secures buy-in, a key step to refine the analysis and build trust. Option D is correct because creating and aligning the result report consolidates workshop outcomes (e.g., impact severity, affected areas) into a formal document shared with project leadership and stakeholders for alignment and decision-making.

Option C is incorrect-while visualizing data and aggregating insights might occur, it's typically part of the workshop preparation or facilitation, not a post-workshop task, which focuses on action rather than analysis.

Option E is incorrect; reviewing and refining KPIs for user adoption is a broader, ongoing task tied to the Run phase, not an immediate post-CIA activity. The change manager's role here is to operationalize the CIA, ensuring its insights drive the next steps in the change process. This reflects SAP OCM's emphasis on translating analysis into practical outcomes.

"Post-CIA tasks include facilitating follow-up activities, validating findings with stakeholders, and creating a result report to ensure impacts are addressed effectively" (SAP Activate, OCM Workstream, Change Impact Analysis Process).

NEW QUESTION # 80

What is the key benefit of capturing lessons learned towards the end of a cloud implementation?

- **A. It contributes to the organization's capabilities to successfully handle future business transformations.**
- B. It supports the project leadership team to identify the project team members who deserve special appreciation for their good work.
- C. It helps to identify ad-hoc activities to foster high and sustainable user adoption after the go-live.
- D. It facilitates the hand-over process of important project activities to the IT organization of the company.

Answer: A

Explanation:

Capturing lessons learned in SAP projects (typically in the Run phase) enhances future success. Option D is correct because it builds organizational knowledge for subsequent transformations. Option A is incorrect- hand-over is a separate process, not the key benefit. Option B is incorrect; adoption activities are planned earlier, not ad-hoc from lessons learned. Option C is incorrect; recognition is a byproduct, not the primary goal.

Extract from SAP OCM Concepts: Lessons learned in SAP Activate improve future change capabilities (SAP OCM Framework).

NEW QUESTION # 81

How would you prepare to conduct a detailed change impact analysis workshop? Note: There are 2 correct answers to this question.

- **A. Create a template with the relevant business processes broken down to a suitable level for the discussion**
- B. Schedule individual upfront meetings with all workshop participants to collect initial insights
- C. Select one relevant impact dimension to be analyzed, for example process, technology, organization, or people
- **D. Invite the appropriate workshop participants, for example process owners, subject matter experts, and key users**

Answer: A,D

Explanation:

Preparing for a detailed change impact analysis (CIA) workshop, typically conducted in the SAP Activate Explore or Realize phase, requires careful planning to ensure actionable outcomes. Option A is correct because inviting the right participants-process owners (who understand current workflows), subject matter experts (SMEs, who provide technical/process depth), and key users (who represent end-user perspectives)- ensures a comprehensive assessment of impacts across affected areas. Their diverse insights are critical for identifying specific changes at a granular level, such as how a process shift affects daily tasks or system usage. Without these stakeholders, the workshop risks missing critical details or buy-in, undermining its effectiveness.

Option B is correct because creating a template with relevant business processes broken down to a suitable level (e.g., subprocesses like "order entry" within "order-to-cash") provides a structured framework for discussion. This template might include columns for as-is vs. to-be states, impact severity, and affected roles, enabling participants to systematically evaluate changes. It ensures focus and consistency, preventing the workshop from becoming a free-for-all discussion, and aligns with SAP's methodical approach to CIA.

Option C is incorrect because scheduling individual upfront meetings with all participants is impractical and time-consuming for a detailed CIA, which builds on prior high-level analysis. While some pre-workshop input might be gathered, the workshop itself is the collaborative forum for insights, not pre-meetings. Option D is incorrect because limiting the analysis to one dimension (e.g., only "process") contradicts the holistic nature of a detailed CIA, which assesses multiple dimensions (process, technology, organization, people) to capture the full scope of change. SAP OCM emphasizes stakeholder inclusion and structured tools for detailed CIA preparation.

"Preparation for a detailed change impact analysis workshop involves inviting key stakeholders such as process owners, SMEs, and key users, and providing a structured template of business processes to guide the assessment of impacts across all dimensions" (SAP Activate Methodology, OCM Workstream, Detailed CIA Preparation).
