### NACE Coating Inspector Level 1 Sample Questions (Q26-Q31):

#### NEW QUESTION # 26

You have just received your NACE CIP Level 1 certification when you are asked to supervise a team of uncertified field pipeline inspectors.

Your FIRST preferred course of action is to:

- A. Review the NACE Attestation prior to making a decision
- B. Accept the assignment without hesitation
- C. Advise the prospective employer that you cannot accept the position
- D. Meet with the prospective employer to determine the scope of your role

**Answer: D**

#### NEW QUESTION # 27

In the event of a conflict between the project specification and the coating manufactures' product data sheet, the Inspector's first course of action should be too:

- A. Use the job specification as a guide
- B. Use the product data sheet as a guide
- C. Call the coating manufacturer for clarification
- D. Call the person who wrote the specification for clarification

**Answer: A**

#### NEW QUESTION # 28

You are the NACE Inspector on a job where NACE No. 2/SSPC - SP 10 has been specified. You are finding the Contractor is leaving mill scale on the on surface and as a result you have been rejecting the blast. The Contractor is very upset and has told you that the standard permits up to 5% of the mill scale to remain and still be in compliance with the standard.

Your FIRST preferred course of action is to:

- A. Shut the job down
- B. Review the relevant standard with the Contractor
- C. Call your supervisor
- D. Permit coating to take place so as not to lose the blast

**Answer: B**

#### NEW QUESTION # 29

Removal of welds splatter is required:

- A. When ISO abrasive blast standards are specified
