

100% Pass Nutanix - NCP-AI - Nutanix Certified Professional - Artificial Intelligence v6.10 Pass-Sure Latest Test Prep

2026 Latest ActualPDF NCP-AI PDF Dumps and NCP-AI Exam Engine Free Share: <https://drive.google.com/open?id=1CxCHL5tgNvXnTZfEQ9fVInWRA4umYsqN>

We stick to the principle "Credit management first and first class service". While purchasing our NCP-AI exam questions, not only you have no need to worry about the quality of our NCP-AI exam materials quality but also our service is satisfying on the NCP-AI study guide. We promise buyers "Pass Guaranteed" and we only offer the latest NCP-AI Training Materials. If you would like to choose safely high passing rate of NCP-AI exam torrent materials, our NCP-AI learning guide will be the first choice for you.

Nowadays the requirements for jobs are higher than any time in the past. The job-hunters face huge pressure because most jobs require both working abilities and profound major knowledge. Passing NCP-AI exam can help you find the ideal job. If you buy our NCP-AI test prep you will pass the NCP-AI Exam easily and successfully, and you will realize you dream to find an ideal job and earn a high income. Our NCP-AI training braindump is of high quality and the passing rate and the hit rate are both high as more than 98%.

NCP-AI Exam Guide | Real NCP-AI Questions

NCP-AI practice test keeps a record of your attempts so you can evaluate and enhance your progress. Our Nutanix Certified Professional - Artificial Intelligence v6.10 (NCP-AI) practice exams replicate the real Nutanix Certified Professional - Artificial Intelligence v6.10 (NCP-AI) exam environment so you can eliminate your anxiety. You can access the web-based Nutanix Certified Professional - Artificial Intelligence v6.10 (NCP-AI) practice exam through browsers. Moreover, operating systems such as Mac, iOS, Android, Windows, and Linux support the online NCP-AI practice exam.

Nutanix NCP-AI Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> • Perform Day 2 Operations: This domain addresses ongoing management including preparing application integration requirements, interpreting and optimizing performance metrics, monitoring access for anomalies, and selecting appropriate LLMs for optimal output.
Topic 2	<ul style="list-style-type: none"> • Connect Applications to a Nutanix Enterprise AI Environment: This domain focuses on configuring and validating application connections to endpoints and monitoring endpoint metrics to track application usage and integration performance.
Topic 3	<ul style="list-style-type: none"> • Configure a Nutanix Enterprise AI Environment: This domain focuses on operational setup including onboarding users, importing large language models, creating and securing API endpoints with keys, and delivering these endpoints to consumers.
Topic 4	<ul style="list-style-type: none"> • Deploy a Nutanix Enterprise AI Environment: This domain covers initial deployment tasks including validating prerequisites, installing Enterprise AI components, and configuring DNS, URLs, and certificates for secure platform operation.
Topic 5	<ul style="list-style-type: none"> • Troubleshoot a Nutanix Enterprise AI Environment: This domain covers diagnosing and resolving performance issues, resource utilization problems, cluster health check failures, and model import or endpoint creation errors.

Nutanix Certified Professional - Artificial Intelligence v6.10 Sample Questions (Q11-Q16):

NEW QUESTION # 11

Refer to the exhibit

Model Details

Choose a Model Type

Pre-validated Model

These models are tested and validated to run on Nutanix Enterprise AI.

Custom Model

Models that are not tested and validated to run on Nutanix Enterprise AI.

Model

meta-llama/Llama-Guard-3-8B

Select the Pre-validated Model

Model Instance Name

test

Model Type

Text Generation

Storage Location

Location

File Share

File Server Address

fs01.nutanix.edu

NFS Export Path

/llm

NUTANIX
Directory Path for the Model

testllm

An administrator needs to troubleshoot an import failure from a AI/ML user and does not have the admin right to try to do a manual upload of LLM.

What is the cause of the import failure?

- A. Storage location configuration is not correct.
- **B. AI/ML User does not have the proper rights.**
- C. Wrong pre-validated model has been selected.
- D. Model Instance name test already exists.

Answer: B

NEW QUESTION # 12

An administrator is monitoring the performance of a deployed Large Language Model within the Nutanix Enterprise AI platform. After initial deployment, users report slow inference response times and occasional timeouts when accessing the model through its API endpoint.

The administrator reviews the performance metrics available in the NAI Dashboard and notes the following:

CPU usage is consistently high across all inference-serving containers.

Memory utilization is nearing the allocated limits for the model service.

The request latency graph shows increasing average inference times during peak usage.

Which action should the administrator take to improve performance and reduce latency?

- **A. Scale out the number of instances and allocate additional CPU and memory resources.**
- B. Restart the model container to clear memory cache and allow the system to rebalance performance.
- C. Disable logging temporarily to reduce resource consumption during peak load periods.
- D. Increase the number of API keys assigned to the endpoint to allow more concurrent access.

Answer: A

NEW QUESTION # 13

An administrator needs to spot the busiest credentials at a glance.

Which Dashboard widget provides insight into the most frequently used credentials?

- A. API Requests Trends
- **B. API Keys (Top 5)**
- C. Endpoints Summary
- D. Infrastructure Summary

Answer: B

NEW QUESTION # 14

Here is the text converted from the uploaded image:

An Accounting Department is thrilled with the RAG Application that the Application & Data Science Teams recently rolled out.

However, they provided some feedback that sometimes (approximately 20% of the time), the documents retrieved are not relevant to their prompts or are too generic.

During development, there was extensive testing between models to make sure the best possible model was selected. The

Accounting Department emphasizes that when the responses use the right documents, the results are very good and they are pleased with the completeness, accuracy, and coherence of those responses.

What would be a way to address the irrelevant RAG results without having to rebuild the entire workflow?

- **A. Implement a rerank model as a post retrieval step to re-order initially retrieved documents based on query-document relevance.**
- B. Fine-tune the Large Language Model on a broader dataset to enable it to generate more relevant responses.
- C. Significantly expand the document knowledge base by ingesting a much larger volume of financial reports.
- D. Replace the embedding model with a larger, more general-purpose language model to improve document retrieval.

Answer: A
