

100% Pass Quiz The Best ISACA - COBIT-Design-and-Implementation - ISACA COBIT Design and Implementation Certificate Valid Practice Questions

BONUS!!! Download part of Prep4away COBIT-Design-and-Implementation dumps for free: <https://drive.google.com/open?id=1k4XP03foLakRL8bZjIXv-A9UNwFMfHh2>

Our COBIT-Design-and-Implementation Exams preparation software allows you to do self-assessment. If you have prepared for the COBIT-Design-and-Implementation exam, you will be able to assess your preparation with our preparation software. The software provides you the real feel of an exam, and it will ensure 100% success rate as well. You can test your skills in real exam like environment. If you are not getting the desired results, you will get 100% money back guarantee on all of our exam products.

In modern society, innovation is of great significance to the survival of a company. The new technology of the COBIT-Design-and-Implementation practice prep is developing so fast. So the competitiveness among companies about the study materials is fierce. Luckily, our company masters the core technology of developing the COBIT-Design-and-Implementation Exam Questions. On one hand, our professional experts can apply the most information technology to compile the content of the COBIT-Design-and-Implementation learning materials. On the other hand, they also design the displays according to the newest display technology.

COBIT-Design-and-Implementation Passguide - Mock COBIT-Design-and-Implementation Exam

All the ISACA COBIT-Design-and-Implementation questions given in the product are based on actual examination topics. Prep4away provides three months of free updates if you purchase the COBIT-Design-and-Implementation questions and the content of the examination changes after that. Prep4away COBIT-Design-and-Implementation PDF Questions: The ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) PDF dumps are suitable for smartphones, tablets, and laptops as well. So you can study actual ISACA COBIT-Design-and-Implementation questions in PDF easily anywhere. Prep4away updates ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) PDF dumps timely as per adjustments in the content of the actual COBIT-Design-and-Implementation exam.

ISACA COBIT Design and Implementation Certificate Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which of the following is the BEST starting point when translating enterprise goals into actionable governance and management objectives?

- A. Risk-based enterprise goals
- **B. Prioritized enterprise goals**
- C. Generic enterprise goals
- D. Selective enterprise goals

Answer: B

Explanation:

The COBIT 2019 Design Guide describes the COBIT goals cascade as the mechanism for translating enterprise goals into governance and management objectives. The guide clearly states that this translation must begin with prioritized enterprise goals, not generic or selective lists.

Prioritization ensures that governance design focuses on what matters most to the enterprise, given its strategy, risk profile, and context. Without prioritization, governance systems risk becoming overly broad, complex, or misaligned with business value. Generic enterprise goals represent the full COBIT catalog and are not specific enough to guide design decisions. Risk-based goals are an important input but do not replace enterprise-wide prioritization. Selective goals lack formal weighting and may omit critical dependencies.

By starting with prioritized enterprise goals, the governance designer can systematically identify relevant alignment goals and then map them to governance and management objectives. This structured approach is explicitly recommended in COBIT 2019 and ensures traceability, focus, and value-driven governance design.

NEW QUESTION # 18

An enterprise has been consistently growing over the years and has decided to adapt the COBIT framework from the growth perspective of the balanced scorecard dimensions. Which of the following enterprise goals is MOST relevant to select?

- A. Optimization of business process costs
- B. Managed business risk
- **C. Product and business innovation**
- D. Customer-oriented service culture

Answer: C

Explanation:

The COBIT 2019 framework aligns enterprise goals with balanced scorecard (BSC) dimensions. Under the growth and innovation BSC perspective, one of the core enterprise goals listed is:

"Product and business innovation" - which directly supports strategic growth by encouraging new products, services, and ways of operating.

This goal aligns with an enterprise that is expanding and looking to leverage innovation to sustain growth.

Other options like risk management or cost optimization fit different BSC dimensions (e.g., financial, internal process).

Reference: COBIT 2019 Design Guide, Appendix A (Enterprise Goals Table)

NEW QUESTION # 19

Who is responsible for monitoring the achievement of the overall EGIT implementation program plan results, including the achievement of goals and realization of benefits?

- A. IT process owners
- **B. Program steering committee**
- C. IT managers
- D. CIO

Answer: B

Explanation:

The COBIT 2019 Implementation Guide clearly assigns accountability for overall program oversight to the program steering committee. This body is responsible for monitoring whether the implementation program delivers its intended outcomes, including achievement of enterprise goals, realization of benefits, and alignment with strategic drivers.

While the CIO typically sponsors or chairs the steering committee, the responsibility is collective and not individual. IT managers and process owners are accountable for executing specific activities and processes, but they do not have authority over program-level outcomes.

The Implementation Guide emphasizes that benefit realization, stakeholder value, and performance tracking must be governed at a level that can make cross-functional decisions, resolve escalations, and redirect priorities when necessary. The steering committee fulfills this role by providing governance oversight, ensuring continued alignment with enterprise objectives, and validating that outcomes justify investments.

Therefore, monitoring overall EGIT program results-including goals and benefits-is explicitly the responsibility of the program steering committee.

NEW QUESTION # 20

When considering the threat landscape design factor, and the design factor value is high, which of the following should be a management objective priority?

- A. Managed innovation (APO04)
- **B. Managed assurance (MEA04)**
- C. Managed operations (DSS01)
- D. Managed service agreements (APO09)

Answer: B

Explanation:

The COBIT 2019 Design Guide explains that when the threat landscape is assessed as high, enterprises must strengthen their ability to monitor, evaluate, and provide independent assurance over governance and management practices. A high threat landscape indicates increased exposure to cyber threats, regulatory scrutiny, operational disruption, or external instability.

In such environments, governance systems must ensure that controls are not only defined but are working effectively and continuously. The management objective MEA04 - Managed Assurance directly addresses this need by establishing mechanisms for independent assurance, audit coordination, and validation of control effectiveness.

While DSS01 (operations) and APO09 (service agreements) are important operational objectives, they do not directly address the governance need for confidence in control effectiveness. APO04 (innovation) is generally deprioritized in high-threat contexts, where stability and risk oversight take precedence.

COBIT explicitly links elevated threats to increased reliance on assurance activities to provide governing bodies with confidence that risks are being managed appropriately. Therefore, MEA04 becomes a priority management objective when the threat landscape is high.

NEW QUESTION # 21

During CSF life cycle action plan review, which of the following tasks is associated with realizing benefits?

- A. Developing business cases indicating success factors
- B. Documenting risk issues and remediation plans
- **C. Monitoring performance against objectives**

Answer: C

Explanation:

During the Critical Success Factor (CSF) life cycle action plan review, the task associated with realizing benefits is "Monitoring performance against objectives." This task ensures that the expected benefits of the IT initiatives are being achieved by continuously assessing performance and making necessary adjustments.

Monitoring performance against objectives involves tracking the progress of IT initiatives to ensure they meet their goals and deliver the expected benefits. This includes using performance metrics, key performance indicators (KPIs), and regular reviews to evaluate whether the initiatives are on track and delivering value.

COBIT 2019 Framework References:

* COBIT 2019 Implementation Guide, Chapter 7:Emphasizes the importance of monitoring and measuring performance to ensure that benefits are realized and objectives are met.

* COBIT 2019 Design Guide, Chapter 4:Highlights the role of performance monitoring in managing and achieving IT governance and management objectives.

By monitoring performance against objectives, enterprises can ensure that their IT initiatives are successful and provide the intended benefits, making it a critical task in the CSF life cycle action plan review.

NEW QUESTION # 22
