## **Valid FCP\_FCT\_AD-7.4 Exam Pdf - Online FCP\_FCT\_AD-7.4 Lab Simulation**

Our company is widely acclaimed in the industry, and our FCP\_FCT\_AD-7.4 learning dumps have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the FCP\_FCT\_AD-7.4 real questions, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our FCP\_FCT\_AD-7.4 practice guide is devoted to research on which methods are used to enable users to pass the test faster. Therefore, through our unremitting efforts, our FCP\_FCT\_AD-7.4 Real Questions have a pass rate of 98% to 100%. Therefore, our company is worthy of the trust and support of the masses of users, our FCP\_FCT\_AD-7.4 learning dumps are not only to win the company's interests, especially in order to help the students in the shortest possible time to obtain qualification certificates.

## **Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q15-Q20):**

## NEW QUESTION # 15

An administrator has lost web access to the FortiClient EMS console, and the web page to access to the console is timing out. How can the administrator gather information to investigate the issue? (Choose one answer)

- A. Download the webserver logs from the PostgreSQL server.
- B. Use the diagnostic logs option from the FortiClient EMS GUI.
- **C. Use the CLI diagnostic tool on the EMS server.**
- D. Download the log generator from the support site and run it on the EMS server.

### Answer: C

Explanation:

According to the FortiClient EMS Administrator Study Guide and official Technical Tips from Fortinet, when the web console is inaccessible (e.g., timing out), the administrator must use tools available directly on the server's operating system (CLI) to gather diagnostic information.

1. Why the CLI Diagnostic Tool (Answer A) is the Correct Choice:

\* Availability during Outage: When the GUI is unreachable, the standard "Generate Diagnostic Logs" option within the EMS interface is also unavailable.

\* Windows-based EMS: The administrator can manually run the EMSDiagnosticTool.exe located at C:

\Program Files (x86)\Fortinet\FortiClientEMS\. This tool collects server information, Windows events, and EMS-specific logs into a compressed file for investigation.

\* Linux-based EMS (v7.4+): For newer versions running on Linux, the administrator can use the CLI command: sudo /opt/forticlientems/bin/diagnostic\_tool -o /tmp/diag to generate a diagnostic package.

\* Service Verification: The CLI also allows administrators to verify if critical services (like fcems, apache2, or postgres) are running or if remote access has been disabled using the emscli utility.

2. Why Other Options are Incorrect:

\* B. Download webserver logs from PostgreSQL: PostgreSQL is the database engine for EMS, not the web server. While database logs are useful, they are not the primary method for gathering general

"diagnostic information" and would typically be collected as part of the CLI diagnostic tool output rather than downloaded directly from the DB.

\* C. Diagnostic logs option from the GUI: This option is impossible to use if the administrator has lost web access and the page is timing out.

\* D. Download log generator from support site: While Fortinet provides various tools on their support site, the EMS Diagnostic Tool is natively installed with the FortiClient EMS software and is the primary, documented method for troubleshooting the EMS server itself.

## NEW QUESTION # 16

Which statement about FortiClient enterprise management server is true?

- **A. It provides centralized management of multiple endpoints running FortiClient software.**
- B. It provides centralized management of FortiClient Android endpoints only.
- C. It provides centralized management of Chromebooks running real-time protection
- D. It provides centralized management of FortiGate devices.

### Answer: A

Explanation:

FortiClient EMS is designed to provide centralized management and control of multiple endpoints running FortiClient software. It serves as a central management server that allows administrators to efficiently manage and configure a large number of FortiClient installations across the network.

## NEW QUESTION # 17

An administrator wants to simplify remote access without asking users to provide user credentials. Which access control method provides this solution?

- A. ZTNA IP/MAC filtering mode
- **B. ZTNA full mode**
- C. L2TP
- D. SSL VPN

**Answer: B**

Explanation:

\* Simplifying Remote Access:

\* The administrator wants to simplify remote access without asking users to provide user credentials.

\* Evaluating Access Control Methods:

\* ZTNA full mode can provide seamless access by leveraging device identity and posture, eliminating the need for user credentials for each access request.

\* Other methods like SSL VPN and L2TP typically require user credentials.

\* Conclusion:

\* The correct access control method that provides this solution is ZTNA full mode.

References:

ZTNA section in the FortiGate Infrastructure 7.2 Study Guide.

**NEW QUESTION # 18**

An administrator installs FortiClient EMS in the enterprise.

Which component is responsible for enforcing protection and checking security posture?

- A. FortiClient EMS
- **B. FortiClient**
- C. FortiClient vulnerability scan
- D. FortiClient EMS tags

**Answer: B**

Explanation:

\* Understanding FortiClient EMS Components:

\* FortiClient EMS manages and configures endpoint security settings, while FortiClient installed on the endpoint enforces protection and checks security posture.

\* Evaluating Responsibilities:

\* FortiClient performs the actual enforcement of security policies and checks the security posture of the endpoint.

\* Conclusion:

\* The component responsible for enforcing protection and checking security posture is FortiClient (C).

References:

FortiClient EMS and endpoint security documentation from the study guides.

**NEW QUESTION # 19**

Which component or device shares device status information through ZTNA telemetry?

- A. FortiClient EMS
- **B. FortiClient**
- C. FortiGate
- D. FortiGate Access Proxy

**Answer: B**

Explanation:

FortiClient communicates directly with FortiClient EMS to continuously share device status information through ZTNA telemetry.

**NEW QUESTION # 20**

.....

Our web-based practice exam software is an online version of the Fortinet FCP\_FCT\_AD-7.4 practice test. It is also quite useful for instances when you have internet access and spare time for study. To study and pass the Fortinet FCP\_FCT\_AD-7.4 Exam on the first attempt, our web-based Fortinet FCP\_FCT\_AD-7.4 practice test software is your best option. You will go through FCP - FortiClient EMS 7.4 Administrator mock exams and will see for yourself the difference in your preparation.
