Health-Cloud-Accredited-Professional学習教材があれば、あなたは自分の夢を叶えます。Health-Cloud-Accredited-Professional学習教材はすごく人気があります。全世界のお客様からいい評価をもらいました。なんといっても、自分はHealth-Cloud-Accredited-Professional学習教材を利用したら、その資料のよさを感じることができます。大切なのは、Health-Cloud-Accredited-Professional学習教材の合格率が高いので、多くのお客様はHealth-Cloud-Accredited-

Professional認定試験資格証明書を取得したということです。

Salesforce Health Cloud認定の専門的認定試験は、医療業界の基準と規制を完全に理解する必要がある厳格な試験です。データセキュリティ、プライバシー、コンプライアンスなどの分野と、患者データ、ケアプラン、コミュニケーションを管理するためのSalesforce Health Cloudの使用をカバーしています。この試験では、医療提供者の独自のニーズを満たすためにプラットフォームを構成およびカスタマイズするためのベストプラクティスに関する候補者の知識を評価します。

Salesforce Health Cloud Accredited Professional 認定 Health-Cloud-Accredited-Professional 試験問題 (Q72-Q77):

質問 # 72

Which Permission Set Licenses and Permission Sets need to be assigned to users to leverage Utilization Management? (Choose three)

- A. Health Cloud Analytics Permission Set
- B. Health Cloud Foundation Permission Set
- C. Health Cloud Platform Permission Set License
- D. Health Cloud Utilization Management Permission Set
- E. Health Cloud Permission Set License

正解: C、D、E

解説:

To leverage Utilization Management features in Health Cloud, users need to have Health Cloud Permission Set License, Health Cloud Utilization Management Permission Set, and Health Cloud Foundation Permission Set. Health Cloud Permission Set License grants access to the Health Cloud platform objects and features. Health Cloud Utilization Management Permission Set grants access to utilization management objects so users can manage care requests and reviews. Health Cloud Foundation Permission Set assigns read access to additional Health Cloud platform capabilities⁴. Health Cloud Analytics Permission Set and Health Cloud Platform Permission Set License are not required for Utilization Management.

質問 # 73

How should Members and Patients be represented during the basic set-up of Health Cloud console for Care Coordinators and Managers as per the Salesforce recommendation?

- A. The Individual data model may be used to represent Members and Patients.
- B. Leveraging Person Accounts is the recommended approach to represent Members and Patients.
- C. Leveraging Candidate Accounts are the recommended approach to represent Members and Patients.
- D. Salesforce recommends using Member Accounts to represent Members and Patients.

正解: B

解説:

According to the Health Cloud Implementation Guide, leveraging Person Accounts is the recommended approach to represent Members and Patients during the basic set-up of Health Cloud console for Care Coordinators and Managers. Person Accounts are a type of account that combines account and contact information in a single record. They are suitable for representing individual consumers in healthcare and life sciences. The other options are not recommended approaches to represent Members and Patients.

質問 # 74

A customer wants to leverage dependent intervention tasks as part of their care coordination solution using Integrated Care Management.

Which feature should a consultant configure to accomplish this task?

- A. Action Plan Templates
- B. Intervention Templates
- C. Industry Template Library
- D. Care plan Task Templates

正解: A

解説:

Action Plan Templates in Salesforce Health Cloud are designed to support care coordination by automating the creation of dependent intervention tasks. These templates allow administrators to define a set of tasks and their dependencies, ensuring that tasks are completed in a specific sequence or based on predefined criteria.

How Action Plan Templates Work for Dependent Tasks:

Task Sequencing: Enables the creation of dependent tasks that are triggered when prior tasks are completed.

Reusable Templates: Action Plan Templates can be reused across different care plans, ensuring consistency in intervention management.

Flexibility in Task Configuration: Includes options to assign tasks to specific team members, define due dates, and set task dependencies.

Why Other Options Are Incorrect:

Intervention Templates: Focused on creating reusable intervention definitions but lack task dependency configuration.

Industry Template Library: Provides predefined templates for healthcare workflows but does not directly address task dependencies.

Care Plan Task Templates: Define standalone tasks but do not support task dependencies or automation.

質問 # 75

A pharma company wants the ability to:

- * Upload a patient's insurance card, including automatic Member Plan record creation
- * Run a benefits verification check
- * Schedule on behalf of the patient with a provider

Which set of Health Cloud capabilities should enable the company to build this business process?

- **A. Intelligent Document Automation, Intelligent Appointment Management, Intelligent Document Reader, Benefits Verification**
- B. Virtual Care, Intelligent Appointment Management, Intelligent Document Automation, Intelligent Document Reader
- C. Intelligent Appointment Management, Benefits Verification, Intelligent Document Automation, eFax Integration
- D. Utilization Management, Care Management, Intelligent Document Automation, Intelligent Appointment Management

正解: A

解説:

The business process requires a combination of capabilities for handling patient insurance cards, benefits verification, and appointment scheduling. The following Health Cloud capabilities are recommended:

* Intelligent Document Automation:

* Automates the processing of uploaded documents, such as insurance cards.

* Intelligent Document Reader:

* Reads data from documents and creates corresponding records (e.g., Member Plan records).

* Benefits Verification:

* Runs real-time verification checks on insurance plans and coverage.

* Intelligent Appointment Management:

* Facilitates scheduling appointments on behalf of the patient with the provider.

Why Other Options Are Incorrect:

* A & B: These options exclude critical elements like Intelligent Document Reader.

* D: Utilization Management and Care Management are unrelated to the stated requirements.
