Huawei H13-624_V5.5 Exam Training - Review H13-624_V5.5 Guide

Under the tremendous stress of fast pace in modern life, sticking to learn for a H13-624_V5.5 certificate becomes a necessity to prove yourself as a competitive man. Our H13-624_V5.5 practice questions have been commonly known as the most helpful examination support materials and are available from global internet storefront. After years of unremitting efforts, our H13-624_V5.5 Exam Materials and services have received recognition and praises by the vast number of customers. An increasing number of candidates choose our H13-624_V5.5 study materials as their exam plan utility.

Huawei HCIP-Storage V5.5 Sample Questions (Q91-Q96):

NEW QUESTION # 91

An Industry customer purchases several Huawei flash storage devices for service deployment. During an inspection, an engineer finds that some storage components are faulty and need to be removed and replaced.

Which of the following statements Is true about the part removal and replacement?

- A. The memory modules and system disks of the storage device can be removed and replaced independently.

- B. The interface modules and system subracks of the storage device can be replaced independently.
- C. The CPUs of the storage device cannot be replaced independently, but can be removed independently.
- D. The coin batteries of the storage device cannot be replaced or removed.

Answer: A

NEW QUESTION # 92

During flash storage initialization, an administrator needs to change the IP address of a management network port. Which statements about the change are false?

- A. The IP addresses of the management and maintenance network ports must be in different network segments; otherwise, there will be a route conflict.
- B. The administrator needs to apply for and activate a license before changing the IP address of the management network port.
- C. To change the IP address of the management network port on the CLI, log in to the CLI and run the "change system management_ip" command.
- D. To change the IP address of the management network port on the command-line interface (CLI), the IP address of the maintenance terminal and the default IP address of the storage management network port must be in the same network segment if the administrator logs in to the system through a serial port.

Answer: B,C

Explanation:

Changing the management network port IP in Huawei flash storage systems is a common initialization task.

The *HCIP-Storage V5.5 Training Material (Module 5: Storage System Maintenance and Troubleshooting)* states:

- Option A: False. "The CLI command to change the management IP is 'change system management_ip_address,' not 'change system management_ip.'"

- Option B: True. "Management and maintenance network ports must use different network segments to avoid routing conflicts."

- _ Index C: False. "No license is required to change the management network port IP address; it is a basic configuration task."

- Option D: True. "For serial port login, the maintenance terminal's IP and the default management IP must be in the same segment to establish connectivity." Thus, options A and C are false.

Reference:

HCIP-Storage V5.5 Training Material, Module 5: Storage System Maintenance and Troubleshooting, Section 5.4: Network Configuration and Initialization*, Huawei Technologies Co., Ltd.

NEW QUESTION # 93

Before deploying and implementing storage devices, you need to plan and design storage solutions. Which of the following options are in planning and design Action to be performed when ()

- A. Confirmation of compatibility of operating system and storage
- B. Confirm whether the computer room provides AC or DC power
- C. Storage system upgrade planning
- D. Storage network segment planning

Answer: A,B,C,D

NEW QUESTION # 94

The performance of a storage system can be measured by multiple indicators. In application scenarios where the I/O size is greater than or equal to 64 KB, the _____ performance indicator is the main concern for storage performance.

Answer:

Explanation:

Throughput

Explanation:

Storage performance metrics are covered in the *HCIP-Storage V5.5 Training Material (Module 5: Storage System Maintenance

and Troubleshooting)*: "For large I/O sizes (#64 KB), throughput is the primary performance indicator, as it measures the data transfer rate, critical for applications like video streaming or large file transfers." Throughput, measured in MB/s or GB/s, reflects the system's ability to handle large data volumes, making it the key concern for such scenarios.
