which would help you pass the next C-S4CPB-2502 Exam successfully. Please contact us through email when you need us. Our purchasing process is designed by the most professional experts, that's the reason why we can secure your privacy while purchasing our C-S4CPB-2502 test guide.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q47-Q52):

NEW QUESTION # 47

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Customer system admin
- B. Partner project manager
- C. Partner lead configuration expert
- D. Customer project manager

Answer: A

Explanation:

The IT Contact is the person who is responsible for setting up the initial system access, provisioning users, and managing authentication for the SAP S/4HANA Cloud Public Edition project. The IT Contact should be identified and assigned immediately when the implementation begins, as they will receive all the SAP communications and notifications related to the system setup and configuration. The IT Contact should also be available and accessible throughout the project, and collaborate with the project team and the business stakeholders1.

The IT Contact should be someone who is a hands-on system administrator, not an executive. They should have the skills and experience to perform the system administration tasks, such as creating users, assigning roles, configuring identity providers, and troubleshooting issues. They should also be committed and engaged with the project, and provide feedback and participate in testing and training activities1.

Therefore, the correct answer is C, as the customer system admin is the most suitable person to be the IT Contact for the SAP S/4HANA Cloud Public Edition project. References = 1 How to Choose the Right IT Contact for Your SAP S/4HANA Cloud Public Edition Project - SAP Community

NEW QUESTION # 48

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Explore
- B. Realize
- C. Prepare
- D. Deploy

Answer: B

NEW QUESTION # 49

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. SAP Signavio Process Collaboration Hub
- B. Digital Discovery Assessment
- C. Business Driven Configuration Questionnaire
- D. SAP Signavio Journey Modeler

Answer: A

Explanation:

A partner line of business configuration expert plays a crucial role in preparing for Fit-to-Standard workshops, which are pivotal in aligning SAP S/4HANA Cloud Public Edition's capabilities with the customer's business requirements. To identify and select relevant business processes for discussion in these workshops, the expert would reference:

* SAP Signavio Process Collaboration Hub: This tool serves as a comprehensive repository and collaboration platform for business process documentation and best practices. It provides detailed insights into various business processes, including their steps,

variations, and best practices, as established in the SAP ecosystem. By referencing the SAP Signavio Process Collaboration Hub, a line of business configuration expert can identify relevant standard business processes that SAP S/4HANA Cloud supports, which should be covered during the Fit-to-Standard workshops. This ensures that the workshops focus on processes critical to the customer's operations and that any gaps or customization needs are identified early in the implementation phase.

NEW QUESTION # 50

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Combining the local and remote schema approaches into one migration project
- B. Extensibility using the Legacy System Migration Workbench
- C. Mapping source values to SAP S/4HANA target values
- D. Guidance and simulation of the migration process

Answer: C,D

Explanation:

The SAP S/4HANA Migration Cockpit is a tool that facilitates the transfer of business data from a source system to SAP S/4HANA. It uses migration objects to identify and transfer the relevant data for a specific business object. The SAP S/4HANA Migration Cockpit has the following characteristics1:

- * It allows mapping source values to SAP S/4HANA target values, as well as converting values that are migrated from source fields to target fields. This ensures data consistency and quality in the target system.
- * It provides guidance and simulation of the migration process, as well as error handling and monitoring. This helps to reduce the complexity and risk of data migration, and to ensure a smooth and successful data transfer.
- * It does not support extensibility using the Legacy System Migration Workbench (LSMW), which is a tool for data migration from legacy systems to SAP systems. The SAP S/4HANA Migration Cockpit has its own extensibility framework, the SAP S/4HANA Migration Object Modeler, which allows creating and enhancing migration objects2.
- * It does not combine the local and remote schema approaches into one migration project. The SAP S/4HANA Migration Cockpit offers three options for transferring data to SAP S/4HANA: using files, using staging tables, or using direct transfer from an SAP system1. Each option requires a separate migration project and has its own advantages and limitations3.

NEW QUESTION # 51

Where do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. In the Extensibility Cockpit app
- B. In the Custom Fields app
- C. In the Maintain SAP Business Technology Platform Extensions app
- D. In the Runtime Authoring mode

Answer: B

NEW QUESTION # 52
