

NCP-EUC Valid Exam Tips & New NCP-EUC Exam Testking

P.S. Free 2026 Nutanix NCP-EUC dumps are available on Google Drive shared by Exam4Docs: https://drive.google.com/open?id=1NvLwt_K5vCXpFEPAe6Qw8sgnZnDZkVoz

As far as we know, in the advanced development of electronic technology, lifelong learning has become more accessible, which means everyone has opportunities to achieve their own value and life dream though some ways such as the NCP-EUC certification. With over a decade's endeavor, our NCP-EUC practice materials successfully become the most reliable products in the industry. There is a great deal of advantages of our NCP-EUC exam questions you can spare some time to get to know.

The Nutanix NCP-EUC pdf questions learning material provided to the customers from Exam4Docs is in three different formats. The first format is PDF format which is printable and portable. It means it can be accessed from tablets, laptops, and smartphones to prepare for the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam. The Nutanix NCP-EUC PDF format can be used offline, and candidates can even prepare for it in the classroom or library by printing questions or on their smart devices.

New Nutanix NCP-EUC Exam Testking | NCP-EUC Reliable Test Dumps

Our world is in the state of constant change and evolving. If you want to keep pace of the time and continually transform and challenge yourself you must attend one kind of NCP-EUC certificate test to improve your practical ability and increase the quantity of your knowledge. Buying our NCP-EUC Study Materials can help you pass the test smoothly. Our NCP-EUC study materials have gone through strict analysis and verification by senior experts and are ready to supplement new resources at any time.

Nutanix NCP-EUC (Nutanix Certified Professional - End-User Computing) certification exam is designed for professionals who want to demonstrate their expertise in end-user computing solutions. NCP-EUC exam tests the candidate's knowledge and skills in deploying, managing, and troubleshooting Nutanix infrastructure for desktop and application virtualization. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is suitable for IT professionals who work with Nutanix virtualization solutions, including virtual desktop infrastructure (VDI) and application virtualization.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q119-Q124):

NEW QUESTION # 119

An administrator is configuring an existing VM to use a virtual Trusted Platform Module (vTPM).

What additional step must be taken to support Secure Boot?

- A. Provision the VM with a CD-ROM drive.
- B. Set the virtual hardware type to legacy BIOS.
- C. Hardware TPM must be a pass-through device.
- D. Set the VM machine type to q35.

Answer: D

Explanation:

To enable Secure Boot and vTPM on a Nutanix AHV cluster, specific VM configuration requirements must be met. According to the Nutanix AHV Administration and Security guides, Secure Boot prevents malicious code from loading during the boot process by ensuring that only signed drivers and OS loaders are used.

When configuring a VM for Secure Boot, the machine type must be set to q35. The standard legacy machine type (i440fx) does not support the necessary features for Secure Boot and vTPM operations in this context.

Documentation for creating or updating a VM with these features via the Acropolis CLI (aCLI) explicitly includes the parameter `machine_type=q35` in the command string (e.g., `vm.create vm-name machine_type=q35 uefi_boot=true secure_boot=true virtual_tpm=true`). Furthermore, if an administrator attempts to update an existing VM to enable Secure Boot without this machine type, the operation will fail or require the conversion, as Secure Boot and vTPM are supported specifically on the Q35 virtual hardware platform combined with UEFI boot mode.

Legacy BIOS (Option C) is explicitly unsupported for Secure Boot, as UEFI is a strict prerequisite. Hardware TPM pass-through (Option D) is not used; instead, AHV utilizes a software-based vTPM that keeps the crypto keys independent of the underlying hardware to allow for VM mobility.

Relevance of the video: The video provides a step-by-step visual guide on enabling Credential Guard and Secure Boot for Windows VMs on Nutanix AHV, which directly illustrates the configuration steps and requirements discussed in the question, including the necessary VM settings.

Enabling Credential Guard for AHV Windows VMs

NEW QUESTION # 120

The administrator is reviewing Prism Central Tasks (Menu\Activity\Tasks) and noticed that there are a lot of tasks named:

ADS: Remove Resource Contention

The administrator would like to identify the virtual desktops in the environment that are using the most resources to determine how to fix the resource contention.

Which action should the administrator take to complete this task?

- A. Review Planning scenarios.
- B. Review the Storage Runway
- C. Filter the virtual desktops by Metrics: CPU Usage.
- **D. Filter the virtual desktops by Constrained: High,**

Answer: D

Explanation:

an action that the administrator should take to identify the virtual desktops in the environment that are using the most resources and causing resource contention is Filter the virtual desktops by Constrained: High. Constrained is a metric that indicates how often a virtual machine is unable to get its requested CPU resources. A high value means that the virtual machine is frequently starved for CPU and may experience performance degradation. By filtering the virtual desktops by Constrained: High, the administrator can see which ones are suffering from resource contention and take appropriate actions such as migrating them to less loaded hosts or increasing their CPU allocation.

NEW QUESTION # 121

An organization recently deployed an Active-passive VDI solution across multiple sites within their Nutanix platforms. The Organization is now on phase two of the project, which requires them to consolidate all user profile and home data, since each location will have its own standalone Microsoft File Server.

Which solution will provide a more easily-managed environment for profile and Home Share data that includes High Availability and a unified single namespace?

- A. Microsoft DFS
- B. Microsoft FSLogix
- **C. Nutanix Files**
- D. Nutanix Storage Containers

Answer: C

Explanation:

Nutanix Files is a software-defined, scale-out file storage solution that provides a repository for unstructured data, such as home directories, user profiles, departmental shares, application logs, backups, and archives¹. Nutanix Files also provides high availability and a unified single namespace for easy management².

NEW QUESTION # 122

An administrator wants to deploy 1,000 virtual desktops on Nutanix AOS and wants to leverage a cloning technology from the company's chosen virtual desktop broker vendor which is Citrix.

What kind of Nutanix storage efficiency feature should the administrator use for this solution?

- A. Deduplication + Capacity
- **B. Deduplication**
- C. Compression + Deduplication
- D. Compression

Answer: B

Explanation:

one of the possible Nutanix storage efficiency features that the administrator can use for this solution is Deduplication. Deduplication is a technology that eliminates duplicate blocks of data and reduces storage consumption. Deduplication can be enabled on a per-container basis and can provide significant savings for Citrix virtual desktop deployments that use cloning technologies such as Machine Creation Services (MCS) or Provisioning Services (PVS)¹.

NEW QUESTION # 123

An administrator has been tasked with ensuring that all CVMs and AHV hosts in a cluster are protected from CPU and memory-related security vulnerabilities.

Which interface would be used to accomplish this?

- A. ncli
- B. Prism Element
- **C. Prism Central**
- D. accli

Answer: C

Explanation:

Nutanix Prism Central features the Security Dashboard (previously known as Security Planner), which is the designated interface for monitoring and managing the security posture of the environment.

This dashboard specifically scans and reports on Common Vulnerabilities and Exposures (CVEs), including CPU and memory-related vulnerabilities (such as Spectre, Meltdown, and L1TF) affecting the AHV hosts and CVMs. It provides a consolidated view of the "Protection Status" across all registered clusters and guides the administrator on the necessary software versions (LTS/STS) or Life Cycle Manager (LCM) updates required to remediate these specific hardware-level security risks.

NEW QUESTION # 124

.....

Exam4Docs offers authentic and up-to-date NCP-EUC study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam on the first try. The cost of registering for a certification Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam is quite expensive, ranging between \$100 and \$1000. After paying such an amount, the candidate is sure to be on a tight budget. Exam4Docs provides Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) certification test for a second time.
