Reliable 112-57 Exam Online, 112-57 Latest Braindumps Ebook

Reliable ServiceNow CIS-SAM Braindumps Ebook - Reliable CIS-SAM Exam Papers

ServiceNow Certified Implementation Specialist - Software Asset Management Professional Exam Sample Questions (Q119-Q124):

NEW QUESTION # 119

NEW QUESTION # 120

NEW QUESTION # 121

VerifiedDumps exam dumps are written by IT elite who have more than ten years experience, through research and practice. VerifiedDumps provides you with the latest and the most accurate questions and answers. VerifiedDumps exists for your success. To choose VerifiedDumps is to choose your success. If you want to pass EC-COUNCIL 112-57 Certification Exam, VerifiedDumps is your unique choice.

Owing to the industrious dedication of our experts and other working staff, our 112-57 study materials grow to be more mature and are able to fight against any difficulties. Our 112-57 preparation exam have achieved high pass rate in the industry, and we always maintain a 99% pass rate with our endless efforts. We have to admit that behind such a starling figure, there embrace mass investments from our company on our 112-57 learning quiz. But it is all worth that as the high pass rate can make sure our customers pass the exam by the best percentage.

112-57 Latest Braindumps Ebook, 112-57 Latest Guide Files

The proper answer to your questions is VerifiedDumps. When studying for the EC-Council Digital Forensics Essentials (DFE) (112-57) certification exam, VerifiedDumps is one of the most helpful resources. VerifiedDumps guarantees success on the first try by providing you with actual EC-Council Digital Forensics Essentials (DFE) (112-57) exam questions in PDF, desktop practice exam software, and a web-based practice exam.

EC-COUNCIL EC-Council Digital Forensics Essentials (DFE) Sample Questions (Q45-Q50):

NEW QUESTION # 45
Which of the following titles of The Electronic Communications Privacy Act protects the privacy of the contents of files stored by service providers and records held about the subscriber by service providers, such as subscriber name, billing records, and IP addresses?

- A. Title II
- B. Title IV
- C. Title I
- D. Title III

Answer: A

Explanation:
Under the Electronic Communications Privacy Act (ECPA),Title IIis commonly known as theStored Communications Act (SCA). Digital forensics and e-discovery references treat the SCA as the key legal framework governing access tostored electronic communications and associated subscriber/account recordsheld by service providers. The question specifically mentions (1) "contents of files stored by service providers" and (2) "records held about the subscriber ... such as subscriber name, billing records, and IP addresses." These map directly to the SCA's two broad categories:content(what a communication or stored file contains) andnon-content records(subscriber identity, connection logs, billing information, IP assignment /history, and related transactional metadata).
From an investigative perspective, Title II matters because it sets the legal process and restrictions for compelled disclosure-typically requiring different forms of legal process depending on whether the investigator seekscontentversussubscriber/transactional records, and depending on factors like how the data is stored and retention timeframes. In contrast,Title Ifocuses on real-time interception (wiretap-style capture), andTitle IIIaddresses pen register/trap-and-trace style dialing/routing information rather than stored content. Therefore, the correct title isTitle II (Option A).

NEW QUESTION # 46
Bob, a network specialist in an organization, is attempting to identify malicious activities in the network. In this process, Bob analyzed specific data that provided him a summary of a conversation between two network devices, including a source IP and source port, a destination IP and destination port, the duration of the conversation, and the information shared during the conversation.
Which of the following types of network-based evidence was collected by Bob in the above scenario?

- A. Statistical data
- B. Alert data
- C. Session data
- D. Full content data

Answer: C

Explanation:
The description matchessession data, often calledflow records(for example, NetFlow/IPFIX-style evidence).
In network forensics, session/flow evidence summarizes a communication "conversation" between two endpoints using the5-tuple(source IP, source port, destination IP, destination port, and protocol) and typically addsstart/end time or duration,bytes/packets sent, and sometimes directionality. This allows an investigator to reconstructwho talked to whom, when, and for how long, even when packet payloads are unavailable (because of encryption, storage limits, or privacy constraints).
"Full content data" refers to complete packet captures (PCAP) containing payload bytes; that is far more detailed and would include the actual transmitted content, not just a summary. "Statistical data" is broader aggregate metrics (overall bandwidth trends, interface counters) and generally lacks per-conversation attribution. "Alert data" comes from IDS/IPS/SIEM detections and represents triggered events or signatures, not a neutral conversation summary.
Because Bob's evidence contains per-connection identifiers (IPs/ports) and conversation duration-typical of flow/session summaries-the correct evidence type isSession data (C).

NEW QUESTION # 47
Which of the following measures is defined as the time to move read or write disc heads from one point to another on the disk?

- A. Seek time
- B. Mean time
- C. Access time
- D. Delay time

Answer: A

Explanation:
Seek timeis the specific performance measure that describes how long a hard disk drive's actuator takes tomove the read/write heads across the plattersfrom the current track (cylinder) to the target track where the requested data resides. In traditional magnetic HDDs, the heads must be physically repositioned before any sector can be read or written, making seek time a core component of mechanical latency.
Digital forensics materials emphasize understanding this distinction because HDD mechanical behavior affectsacquisition duration, the feasibility of repeated scans, and why imaging or carving operations can take longer on fragmented media. It also helps explain why solid-state drives (SSDs), which have no moving heads, do not have seek time in the same sense and therefore behave differently during large-scale reads.
The other choices are broader or unrelated:access timetypically refers to thetotal time to retrieve data, commonly combiningseek time + rotational latency + transfer time.Delay timeis not the standard term for head movement in disk performance definitions.Mean timeis incomplete as written and is usually part of reliability metrics like mean time between failures, not head positioning. Therefore, the correct measure for head movement time isSeek time (C).

NEW QUESTION # 48
In which of the following attacks does an attacker trick high-profile executives such as CEOs, CFOs, politicians, and celebrities to reveal critical corporate and personal information through email or website spoofing?

- A. Whaling
- B. Spimming
- C. Identity fraud
- D. Smishing

Answer: A

Explanation:
The scenario describes a targeted social-engineering attack aimed specifically athigh-profile individuals (CEOs, CFOs, politicians, celebrities) and usesemail or website spoofingto deceive them into disclosing sensitive information. In digital forensics and incident response documentation, this is most accurately categorized aswhaling, a specialized form of phishing that focuses on "big targets" (often called "high-value targets" or "VIPs"). Whaling campaigns typically use highly tailored pretexts (e.g., legal subpoenas, board communications, invoice/payment requests, HR or executive directives) and may include spoofed sender domains, look-alike websites, or fraudulent login pages to harvest credentials and confidential corporate data.
Because executives often have access to financial systems, strategic documents, and privileged communications, attackers concentrate effort on realism and personalization, making whaling distinct from broad, generic phishing.
By contrast,smishingis phishing conducted via SMS/text messages,spimmingis spam over instant messaging platforms, andidentity fraudis a broader category involving impersonation/misuse of personal data but does not specifically denote the executive-targeted spoofing technique described. Therefore, the attack type in the question isWhaling (A).

NEW QUESTION # 49
Bob, a forensic investigator, was instructed to review a Windows machine and identify any anonymous activities performed using it. In this process, Bob used the command "netstat -ano" to view all the active connections in the system and determined that the connections established by the Tor browser were closed.
Which of the following states of the connections established by Tor indicates that the Tor browser is closed?

- A. TIME_WAIT
- B. LISTENING
- C. ESTABLISHED
- D. CLOSE_WAIT

Answer: A

Explanation:

In Windows network forensics,netstat -anois commonly used to correlateTCP connection stateswithprocess identifiers (PIDs)to understand which application created or used a connection. When Tor Browser is actively communicating, outbound circuits typically appear asESTABLISHEDconnections to Tor relays (entry/guard nodes) or local loopback endpoints used by Tor components. After the browser is closed and the application tears down connections, Windows TCP/IP behavior often leaves recently closed sockets inTIME_WAIT.
TIME_WAITis a normal TCP state that appears after a connection has been actively closed. It exists to ensure delayed packets from the old session are not misinterpreted as belonging to a new session and to allow proper retransmission of the final ACK if needed. From an investigative standpoint, seeing Tor-related endpoints transition from ESTABLISHED toTIME_WAITstrongly indicates the sessions were terminated and the application is no longer maintaining live network traffic.
By contrast,CLOSE_WAITusually means the remote side has closed but the local application has not fully closed its socket yet,LISTENINGindicates a service waiting for inbound connections, andESTABLISHEDmeans the session is still active.
Therefore,TIME_WAIT (B)best indicates Tor Browser connections have been closed.

NEW QUESTION # 50
.....

If you prepare for the 112-57 exam using our VerifiedDumps testing engine, it is easy and convenient to buy. Just two steps to complete your purchase, we will send the 112-57 product to your mailbox quickly. And you only need to download e-mail attachments to get your products.

112-57 Latest Braindumps Ebook: https://www.verifieddumps.com/112-57-valid-exam-braindumps.html

Thirdly, our passing rate of 112-57 Latest Braindumps Ebook - EC-Council Digital Forensics Essentials (DFE) test questions and dumps is high up to 96.59%, Our 112-57 best questions materials have varied kinds for you to choose from, namely, the App version, the PDF versions as well as the software version, You choose VerifiedDumps 112-57 Latest Braindumps Ebook, and select the training you want to start, you will get the best resources with market and reliability assurance, Our valid 112-57 exam dumps will provide you with free dumps demo with accurate answers that based on the real exam.

Similarly, the zero value for an arbitrary-precision integer in Go represents the value zero, It is well known that 112-57 is a major test of EC-COUNCIL and plays a big role in IT industry.

Pass Guaranteed Quiz 2026 EC-COUNCIL 112-57: EC-Council Digital Forensics Essentials (DFE) High Hit-Rate Reliable Exam Online

Thirdly, our passing rate of EC-Council Digital Forensics Essentials (DFE) test questions and dumps is high up to 96.59%, Our 112-57 best questions materials have varied kinds for you to choose 112-57 Latest Guide Files from, namely, the App version, the PDF versions as well as the software version.

You choose VerifiedDumps, and select the training Reliable 112-57 Exam Online you want to start, you will get the best resources with market and reliability assurance, Our valid 112-57 exam dumps will provide you with free dumps demo with accurate answers that based on the real exam.

All content are separated by different 112-57 sections with scientific arrangement and design, easy to remember logically.
