In addition, we add diagrams and examples to display an explanation in order to make the interface more intuitive. Our AP-219 exam questions will ease your pressure of learning, using less Q&A to convey more important information, thus giving you the top-notch using experience if you study with our AP-219 Training Materials. And with the high pass rate of 99% to 100%, the AP-219 exam will be a piece of cake for you.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which two objects are found within Order Management?

- A. Cart
- **B. Payment Summary**
- C. Packing Manifest
- **D. Fulfillment Order**
- E. Receipt

Answer: B,D

Explanation:

Two objects that are found within Order Management are:

Fulfillment Order. A Fulfillment Order is a record that represents a group of products in an order that are fulfilled together from the same location. A Fulfillment Order has a lookup relationship to the Order Summary object, and it contains information such as the fulfillment location, delivery method, status, etc.

Payment Summary. A Payment Summary is a record that represents a payment made for an order or part of an order. A Payment Summary has a lookup relationship to both Order Summary and Invoice objects, and it contains information such as the payment amount, method, status, etc.

https://help.salesforce.com/s/articleView?id=sf.order_management_payment_summary.htm&type=5

NEW QUESTION # 61

An administrator is attempting to automatically create process exceptions for the Fulfillment Order object. When does the Create Process Exception flow get triggered?

- A. On a daily basis using Schedule Jobs in Setup
- B. A Fulfillment Order or Order Summary object are modified and any modification meets the error criteria
- **C. A Process Exception Event is fired**

Answer: C

NEW QUESTION # 62

Which two APIs can an admin suggest so that customers can initiate order cancellations and returns from the B2C Commerce storefront and have their action carry out the cancel and return operations in Order Management?

- A. Bulk APIs
- **B. Connect APIs**
- C. Streaming APIs
- **D. REST APIs**

Answer: B,D

Explanation:

Two APIs that an admin can suggest so that customers can initiate order cancellations and returns from the B2C Commerce storefront and have their action carry out the cancel and return operations in Order Management are:

Connect APIs. These are RESTful APIs that expose resources in Order Management, such as orders, payments, shipments, etc. They allow customers to perform CRUD (create, read, update, delete) operations on these resources from external systems, such as B2C Commerce.

REST APIs. These are HTTP-based APIs that enable developers to access data in Order Management using standard HTTP methods, such as GET, POST, PUT, PATCH, and DELETE. They allow customers to interact with Order Management resources using JSON or XML formats.

Verified Reference: https://help.salesforce.com/s/articleView?id=sf.order_management_connect_api.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.order_management_rest_api.htm&type=5

NEW QUESTION # 63

Which objects can a Process Exception be related to?

- A. Order Details, Fulfillment Order, Payment Invoice
- B. Order Summary, Fulfillment Order, Payment Invoice
- **C. Order Summary, Fulfillment Order**
- D. Order Summary, Order Details, Fulfillment Order

Answer: C

NEW QUESTION # 64

An admin is analyzing project requirements and notes that there are requirements to support both high volume and multiple locations. What is the recommended approach for this scenario?

- A. Download the Multiple Locations sample flow from the Partner Community and have developers add Apex code to enhance performance
- B. Download the Single Location High Volume sample flow from the Partner Community and have the developers add Apex code to enhance performance
- **C. Download the Single Location High Volume sample flow and the Multiple Locations sample flow from the Partner Community and make a blend between the two considering trade-offs**
- D. Download the Single Location High Volume sample flow from the Partner Community and modify all the flows to loop through locations

Answer: C

Explanation:

The Single Location High Volume sample flow and the Multiple Locations sample flow are two examples of how to implement order fulfillment with Order Management. The Single Location High Volume sample flow is optimized for performance and scalability, but it only supports one fulfillment location per order. The Multiple Locations sample flow supports multiple fulfillment locations per order, but it has lower performance and scalability. To support both high volume and multiple locations, an admin can download both sample flows from the Partner Community and make a blend between them, considering trade-offs such as complexity, maintainability, and customizability. Reference: Order Fulfillment Flows, Partner Community

NEW QUESTION # 65

.....

We all want to be the people who are excellent and respected by others with a high social status. If you want to achieve that you must boost an authorized and extremely useful AP-219 certificate to prove that you boost good abilities and plenty of knowledge in some area. Passing the test AP-219 Certification can help you realize your goal and if you buy our AP-219 latest torrent you will pass the AP-219 exam successfully. You can just free download the demo of our AP-219 exam questions to have a check the excellent quality.
