Are you an exam jittering? Are you like a cat on hot bricks before your driving test? Do you have put a test anxiety disorder? If your answer is yes, we think that it is high time for you to use our CS0-002 Exam Question. Our study materials have confidence to help you pass exam successfully and get related certification that you long for, and we can guarantee that if you don't pass the exam, we will give you full refund.

The CompTIA CS0-002 Exam is designed to test the candidate's ability to identify and analyze cybersecurity threats, develop and implement effective security solutions, and respond to security incidents. CS0-002 exam also evaluates the candidate's knowledge of various cybersecurity technologies such as firewalls, intrusion detection and prevention systems, and network security protocols.

CompTIA CS0-002 certification exam is designed for professionals in the field of cybersecurity. CompTIA Cybersecurity Analyst (CySA+) Certification Exam certification validates the skills and knowledge of individuals in the areas of threat management, vulnerability management, incident response, and security architecture. CompTIA Cybersecurity Analyst (CySA+) Certification Exam certification exam is updated regularly to ensure that it remains relevant to the changing landscape of cybersecurity.

## CS0-002 Test Vce Free, Latest CS0-002 Test Practice

If you are prepared to take the CS0-002 exam with the help of excellent CS0-002 learning materials on our website, the choice is made brilliant. Our CS0-002 training materials are your excellent choices, especially helpful for those who want to pass the CS0-002 Exam without bountiful time and eager to get through it successfully. Besides that, our CS0-002 study questions have three versions: PDF version, Soft version and APP version, which can be interesting and helpful for you to choose.

## CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q358-Q363):

### NEW QUESTION # 358

Which of the following describes why it is important to include scope within the rules of engagement of a penetration test?

- A. To ensure servers are not impacted and service is not degraded
- **B. To ensure all systems being scanned are owned by the company**
- C. To ensure the network segment being tested has been properly secured
- D. To ensure sensitive hosts are not scanned

**Answer: B**

### NEW QUESTION # 359

A network appliance manufacturer is building a new generation of devices and would like to include chipset security improvements. The management team wants the security team to implement a method to prevent security weaknesses that could be reintroduced by downgrading the firmware version on the chipset. Which of the following would meet this objective?

- A. A hardware security module
- B. Certificate signed updates
- C. UEFI
- **D. eFUSE**

**Answer: D**

Explanation:

A) UEFI is not correct. UEFI stands for Unified Extensible Firmware Interface, and it is a standard that defines the software interface between an operating system and a platform firmware. UEFI can provide security features, such as secure boot, which verifies the integrity of the boot loader and prevents unauthorized code execution during the boot process. However, UEFI does not prevent security weaknesses that could be reintroduced by downgrading the firmware version on the chipset<sup>2</sup>.

B) A hardware security module is not correct. A hardware security module (HSM) is a physical device that provides secure storage and processing of cryptographic keys and operations. An HSM can protect sensitive data and transactions, such as encryption, decryption, signing, or verification, from unauthorized access or tampering. However, an HSM does not prevent security weaknesses that could be reintroduced by downgrading the firmware version on the chipset<sup>3</sup>.

D) Certificate signed updates are not correct. Certificate signed updates are a method of ensuring the authenticity and integrity of firmware updates by using digital certificates and signatures. Certificate signed updates can prevent malicious or corrupted firmware updates from being installed on the chipset, but they do not prevent security weaknesses that could be reintroduced by downgrading the firmware version on the chipset.

1: What Is an eFUSE? 2: What Is UEFI? 3: What Is a Hardware Security Module (HSM)?

Explanation:

The correct answer is C. eFUSE. An eFUSE is a type of electronic fuse that can be programmed to permanently alter the functionality or configuration of a chipset. An eFUSE can be used to prevent security weaknesses that could be reintroduced by downgrading the firmware version on the chipset, by locking the firmware to a specific version or preventing unauthorized modifications. An eFUSE can also provide other benefits, such as anti-tampering, anti-counterfeiting, and device authentication<sup>1</sup>.

### NEW QUESTION # 360

While reviewing web server logs, a security analyst notices the following code:

```
GET http://testphp.comptia.org/profiles.php?id=-1 UNION SELECT 1, 2, 3 HTTP/1.1
Host: testphp.comptia.org
```

Which of the following would prevent this code from performing malicious actions?

- **A. Disabling the use of HTTP and requiring the use of HTTPS**
- B. Installing a network firewall in front of the application
- C. Requiring the application to use input validation
- D. Performing web application penetration testing

**Answer: A**

### NEW QUESTION # 361

A security analyst is logged on to a jump server to audit the system configuration and status. The organization's policies for access to and configuration of the jump server include the following:

- \* No network access is allowed to the internet.
- \* SSH is only for management of the server.
- \* Users must utilize their own accounts, with no direct login as an administrator.
- \* Unnecessary services must be disabled.

The analyst runs netstar with elevated permissions and receives the following output:

Active connections			
Protocol	Local address	Foreign address	State
TCP	127.0.0.1:5357	VM-Windows-10:49229	TIME_WAIT
TCP	192.168.1.100	192.168.1.43	TIME_WAIT
TCP	192.168.1.100	security- updates.microsoft.com	ESTABLISHED
TCP	192.168.1.100	192.168.1.22	ESTABLISHED

Which of the following policies does the server violate?

- A. Unnecessary services must be disabled.
- B. Users must utilize their own accounts, with no direct login as an administrator.
- C. No network access is allowed to the internet.
- D. SSH is only for management of the server.

**Answer: C**

Explanation:

The server violates the policy of no network access to the internet because it has an established connection to an external IP address (216.58.194.174) on port 443, which is used for HTTPS traffic. This indicates that the server is communicating with a web server on the internet, which is not allowed by the policy. The other policies are not violated because SSH is only used for management of the server (not for accessing other devices), users are utilizing their own accounts (not logging in as an administrator), and unnecessary services are not enabled (only SSH and HTTPS are running). Reference: CompTIA Cybersecurity Analyst (CySA+) Certification Exam Objectives (CS0-002), page 9; [https://en.wikipedia.org/wiki/Jump\\_server](https://en.wikipedia.org/wiki/Jump_server)

### NEW QUESTION # 362

After receiving reports latency, a security analyst performs an Nmap scan and observes the following output:

Port	State	Service	Version
80/tcp	open	http	Apache httpd 2.2.14
111/udp	open	rpcbind	
443/tcp	filtered	https	Apache httpd 2.2.14
2222/tcp	open	OpenSSH	OpenSSH 5.3p1 Debian
3306/tcp	open	MySQL	5.40-Debian0.14.1

Which of the following suggests the system that produced output was compromised?

- A. There are no indicators of compromise on this system.
- B. MySQL services is identified on a standard PostgreSQL port.
- C. Secure shell is operating of compromise on this system.
- D. Standard HTP is open on the system and should be closed.

**Answer: A**

### NEW QUESTION # 363

.....

As you know that the number of the questions and answers in the real CS0-002 exam is fixed. So accordingly the information should be collected for you. Our CS0-002 study materials have done the right thing for you. However, we will never display all the information in order to make the content appear more. Our CS0-002 learning guide just want to give you the most important information. This is why CS0-002 actual exam allow you to take the exam in the shortest possible time.
