CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q172-Q177):

NEW QUESTION # 172

Which of the following is NOT a valid deployment option for R80?

- A. Log server
- B. All-in-one (stand-alone)
- C. Multi-domain management server
- D. SmartEvent

Answer: C

Explanation:

Multi-domain management server is a valid deployment option for R81, not R80. R80 supports multi-domain security management, which is a centralized management solution for large-scale, distributed environments with many different domain networks¹. Multi-Domain Security Management Administration Guide R80

NEW QUESTION # 173

What is the main difference between Static NAT and Hide NAT?

- A. Static NAT allow incoming and outgoing connections. Hide NAT only allows outgoing connections.
- B. Static NAT only allows outgoing connections. Hide NAT allows incoming and outgoing connections.
- C. Static NAT only allows incoming connections to protect your network.
- D. Hide NAT only allows incoming connections to protect your network.

Answer: A

Explanation:

The main difference between Static NAT and Hide NAT is that Static NAT allows incoming and outgoing connections, while Hide NAT only allows outgoing connections⁴. Static NAT translates a single IP address to another single IP address, while Hide NAT translates a group of IP addresses to a single IP address. Static NAT is used to expose internal servers to external networks, while Hide NAT is used to hide internal hosts from external networks. Check Point R81 Firewall Administration Guide

NEW QUESTION # 174

In HTTPS Inspection policy, what actions are available in the "Actions" column of a rule?

- A. "Inspect", "Bypass", "Categorize"
- B. "Detect", "Bypass"
- C. "Inspect", "Bypass"
- D. "Inspect", "Bypass", "Block"

Answer: C

Explanation:

The actions available in the "Actions" column of a rule in HTTPS Inspection policy are "Inspect" and "Bypass". "Inspect" means that the HTTPS traffic will be decrypted and inspected according to the Access Control policy. "Bypass" means that the HTTPS traffic will not be decrypted and will be allowed without inspection¹. The other options are not valid actions for HTTPS Inspection policy.

NEW QUESTION # 175

What is the main difference between Threat Extraction and Threat Emulation?

- A. Threat Emulation never delivers a file that takes less than a second to complete
- B. Threat Emulation never delivers a file and takes more than 3 minutes to complete
- C. Threat Extraction never delivers a file and takes more than 3 minutes to complete
- D. Threat Extraction always delivers a file and takes less than a second to complete

Answer: D

Explanation:

The correct answer is B because Threat Extraction always delivers a file and takes less than a second to complete². Threat Extraction removes exploitable content from files and delivers a clean and safe file to the user². Threat Emulation analyzes files in a sandbox environment and delivers a verdict of malicious or benign². Threat Emulation can take more than 3 minutes to complete depending on the file size and complexity². Check Point R81 Threat Prevention Administration Guide

NEW QUESTION # 176

Which of the following is used to extract state related information from packets and store that information in state tables?

- A. RECORD Engine
- B. STATE Engine
- C. INSPECT Engine
- D. TRACK Engine

Answer: C

Explanation:

The INSPECT Engine is the core component of Check Point's Stateful Inspection technology. It is used to extract state related information from packets and store that information in state tables. The INSPECT Engine also evaluates the security policy and enforces it on the packets. 1. Check Point R81 Security Gateway Technical Administration Guide

NEW QUESTION # 177

.....
