According to the statistics shown in the feedback chart, the general pass rate for latest AZ-900 test prep is 98%, which is far beyond that of others in this field. In recent years, our AZ-900 exam guide has been well received and have reached 99% pass rate with all our dedication. As one of the most authoritative question bank in the world, our study materials make assurance for your passing the AZ-900 Exam.

What Next after Passing AZ-900 Exam?

The Microsoft AZ-900 exam is an amazing foundation for other intermediate certifications. After acing it and possessing the Microsoft Certified: Azure Fundamentals certification, you can proceed in any direction of your choosing based on the desired role. Certificates to pursue within the role-based sphere, just to name a few, can include:

- The Microsoft Certified: Azure Administrator Associate;
- The Microsoft Certified: Azure Developer Associate;
- The Microsoft Certified: Azure Security Engineer Associate;
- The Microsoft Certified: Azure Database Administrator Associate.

The more you advance within the Microsoft certification arrangement, the more you'll have a chance to build a great career. With a

specific role such as an Azure administrator, DevOps engineer, security engineer, or database administrator, you can access better opportunities. So, once you ace your AZ-900 test, you can always proceed to the next step that awards you a chance to specialize and grow your career. With this, you're going to fit into the requirements of many organizations that need skilled specialists to provide support concerning critical Azure-based solutions.

2026 Reliable AZ-900 Exam Questions | Pass-Sure Microsoft Azure Fundamentals 100% Free New Test Bootcamp

There is a high demand for Microsoft Development certification, therefore there is an increase in the number of Microsoft AZ-900 exam candidates. Many resources are available on the internet to prepare for the Microsoft Azure Fundamentals exam. Braindumpsqa is one of the best certification exam preparation material providers where you can find newly released Microsoft AZ-900 Dumps for your exam preparation. With years of experience in compiling top-notch relevant Microsoft AZ-900 dumps questions, we also offer the Microsoft AZ-900 practice test (online and offline) to help you get familiar with the actual exam environment.

Microsoft AZ-900 Certification Exam is a great way for individuals to validate their knowledge and skills in Azure fundamentals. It is also a great way for organizations to ensure that their employees have a basic understanding of Azure, which can help them to make informed decisions about cloud adoption and migration. AZ-900 exam is available in multiple languages and can be taken online or at a testing center. It consists of 40-60 multiple-choice questions and has a time limit of 85 minutes. Candidates who pass the exam will receive a digital badge and a certificate, which they can use to demonstrate their Azure knowledge and skills to potential employers. Overall, the Microsoft AZ-900 Certification Exam is an excellent opportunity for individuals to get started with Azure and to demonstrate their expertise in cloud computing.

Microsoft Azure Fundamentals Sample Questions (Q460-Q465):

NEW QUESTION # 460

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If you have Azure resources deployed to every region, you can implement availability zones in all the regions.	<input type="radio"/>	<input type="radio"/>
Only virtual machines that run Windows Server can be created in availability zones.	<input type="radio"/>	<input type="radio"/>
Availability zones are used to replicate data and applications to multiple regions.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
If you have Azure resources deployed to every region, you can implement availability zones in all the regions.	<input type="radio"/>	<input checked="" type="radio"/>
Only virtual machines that run Windows Server can be created in availability zones.	<input type="radio"/>	<input checked="" type="radio"/>
Availability zones are used to replicate data and applications to multiple regions.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Box 1: No

Not all Azure regions support availability zones.

Box 2: No

Regions that support availability zones support Linux virtual machines.

Box 3: Yes

Availability Zones is a high-availability offering that protects your applications and data from datacenter failures. Availability Zones are unique physical locations within an Azure region. Each zone is made up of one or more datacenters equipped with independent

power, cooling, and networking. To ensure resiliency, there's a minimum of three separate zones in all enabled regions. The physical separation of Availability Zones within a region protects applications and data from datacenter failures. Zone-redundant services replicate your applications and data across Availability Zones to protect from single-points-of-failure. With Availability Zones, Azure offers industry best 99.99% VM uptime SLA.

NEW QUESTION # 461

To complete the sentence, select the appropriate option in the answer area.

Azure Site Recovery provides  for virtual machines.

Answer:

Explanation:

Azure Site Recovery provides  for virtual machines.

Explanation

Azure Site Recovery helps ensure business continuity by keeping business apps and workloads running during outages. Site Recovery replicates workloads running on physical and virtual machines (VMs) from a primary site to a secondary location.

NEW QUESTION # 462

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Advisor provides recommendations on how to improve the security of an Azure Active Directory (Azure AD) environment.	<input type="radio"/>	<input type="radio"/>
Azure Advisor provides recommendations on how to reduce the cost of running Azure virtual machines.	<input type="radio"/>	<input type="radio"/>
Azure Advisor provides recommendations on how to configure the network settings on Azure virtual machines.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

NEW QUESTION # 463

Your company plans to move several servers to Azure.

The company's compliance policy states that a server named FinServer must be on a separate network segment. You are evaluating

which Azure services can be used to meet the compliance policy requirements.
Which Azure solution should you recommend?

- A. a VPN for FinServer and a virtual network gateway for each other server
- B. one resource group for all the servers and a resource lock for FinServer
- C. a resource group for FinServer and another resource group for all the other servers
- **D. a virtual network for FinServer and another virtual network for all the other servers**

Answer: D

Explanation:

Explanation

Networks in Azure are known as virtual networks. A virtual network can have multiple IP address spaces and multiple subnets. Azure automatically routes traffic between different subnets within a virtual network.

The question states that FinServer must be on a separate network segment. The only way to separate FinServer from the other servers in networking terms is to place the server in a different virtual network to the other servers.

NEW QUESTION # 464

You need to identify which blades in the Azure portal must be used to perform the following tasks:

View security recommendations.

Monitor the health of Azure services.

Browse available virtual machine images.

Which blade should you identify for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
