New Google Cloud-Digital-Leader Dumps - Get Ready With Cloud-Digital-Leader Exam Questions [2026]

As the talent team grows, every fighter must own an extra technical skill to stand out from the crowd. To become more powerful and struggle for a new self, getting a professional Cloud-Digital-Leader certification is the first step beyond all questions. We suggest you choose our Cloud-Digital-Leader test prep ----an exam braindump leader in the field. Since we release the first set of the Cloud-Digital-Leader quiz guide, we have won good response from our customers and until now---a decade later, our products have become more mature and win more recognition. We promise to give you a satisfying reply as soon as possible. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our Cloud-Digital-Leader Test Guide' growth.

Google Cloud Digital Leader Sample Questions (Q260-Q265):

NEW QUESTION # 260
Your customer currently has a hybrid cloud setup including their on-premises data center and AWS. They are consolidating all their services on Google Cloud as part of a modernization plan and want to spend less IT effort in the future. There are about 10 MySQL and 25 PostgreSQL databases across the two DCs. What is the best option to for them?

- A. Use the Data Catalog Service to manage the metadata of the databases
- B. Use Cloud Dataflow service and setup Google's Cloud SQL as the sink and the others as the source, which will cause the data to flow in as expected.
- C. Use the Bare Metal Solution and copy the databases directly as they are on-premises and on AWS.
- D. Use the Database Migration Service

Answer: D

Explanation:
Explanation
Database Migration is the right one to use: "Simplifying migrations to Cloud SQL. Now available for MySQL and PostgreSQL migrations, with SQL Server coming soon." Since the customer also doesn't want to manage their own database installations in the future, Cloud SQL is the best option.
https://cloud.google.com/database-migration

NEW QUESTION # 261
Your organization needs to establish private network connectivity between its on-premises network and its workloads running in Google Cloud. You need to be able to set up the connection as soon as possible.
Which Google Cloud product or feature should you use?

- A. Cloud Interconnect
- B. Cloud CDN
- C. Cloud VPN
- D. Direct Peering

Answer: A

Explanation:

Private Google Access for on-premises hosts provides a way for on-premises systems to connect to Google APIs and services by routing traffic through a Cloud VPN tunnel.

NEW QUESTION # 262

An organization supplies electric car chargers in a nationwide network. They store customer and charging data in BigQuery. They want to efficiently upgrade and maintain their network to reduce waste and achieve their sustainability goals. How can Google Cloud services help the organization?

- A. Provide access to third-party developers by creating an API using Apigee.
- B. Create a model in BiaQuery to Dredict future maintenance schedules.
- C. Move data from BigQuery to Cloud Storage to reduce storage costs.
- D. Secure data access by using Identity and Access Management.

Answer: B

NEW QUESTION # 263

Your company provides car maintenance services. It is conducting an internal hackathon to identify new ideas that could expand their business. The teams have pitched different ideas and have started working on it. They have to present their application to the judges within 48 hours. A presentation alone is not enough; they have to demonstrate a working proof of concept. The team that you are mentoring is going to recommend additional ser-vices to drive in customers based on the brand of car they drive in. They need to be able to identify what brand of car the customer has, based on a photograph automatically taken at entry. They have already discovered an open source database of car images collected by online enthusiasts. How should they implement this solution?

- A. Use TensorFlow to create a model that will identify the car brands; use the available data to train the model.
- B. Use Deep Learning Containers that are preconfigured and optimized containers for deep learning environments.
- C. Use AutoML Image - upload the images and let it create a working model for you.
- D. Use Cloud Vision AI that is able to detect logos. Write only the code to integrate in-to your workflow.

Answer: C

Explanation:
Explanation
It would be most straightforward to use AutoML Image. Put the images in Cloud Storage, point to it from AutoML, and start the model building process.

NEW QUESTION # 264

You are working with a user to set up an application in a new VPC behind a firewall and it is no-ticed that the user is concerned about data egress. Therefore, to provide assistance you want to con-figure the fewest open egress ports. Which of the following statement is correct?

- A. Set up a high-priority (1000) rule to allow the appropriate ports.
- B. Set up a high-priority (1000) rule that pairs both ingress and egress ports.
- C. Set up a high-priority (1000) rule that blocks all egress and a low-priority (65534) rule that allows only the appropriate ports.
- D. Set up a low-priority (65534) rule that blocks all egress and a high-priority rule (1000) that allows only the appropriate ports.

Answer: D

Explanation:
Explanation
Implied rules Every VPC network has two implied firewall rules. These rules exist, but are not shown in the Cloud Console:
Implied allow egress rule. An egress rule whose action is allow, destination is 0.0.0.0/0, and priority is the lowest possible (65535) lets any instance send traffic to any destination, except for traffic blocked by Google Cloud. A higher priority firewall rule may restrict outbound access. Internet access is allowed if no other firewall rules deny outbound traffic and if the instance has an external IP address or uses a Cloud NAT instance. For more information, see Internet access requirements.
