1z0-1057-25 Latest Exam Papers - 1z0-1057-25 Valid Test Vce Free

Our 1z0-1057-25 question materials are designed to help ambitious people. The nature of human being is pursuing wealth and happiness. Perhaps you still cannot make specific decisions. It doesn't matter. We have the free trials of the 1z0-1057-25 study materials for you. The initiative is in your own hands. Our 1z0-1057-25 Exam Questions are very outstanding. People who have bought our products praise our company highly. In addition, we have strong research competence. So you can always study the newest version of the 1z0-1057-25 exam questions.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13

You have defined two expenditure types but they are not available for selection when you enter an expenditure batch. What is the reason for this problem?

- A. The two expenditure types are not assigned to the reference data set that is assigned to the project- owning organization in which the transaction is performed.
- B. The two expenditure types are not assigned to the reference data set that is assigned to the project unit in which the

transaction is performed.

- C. The two expenditure types are not assigned to the reference data set that is assigned to the project expenditure organization in which the transaction is performed.
- D. The two expenditure types are not assigned to the reference data set that is assigned to the business unit in which the transaction is performed.

Answer: B

Explanation:

The reason for this problem is that the two expenditure types are not assigned to the reference data set that is assigned to the project unit in which the transaction is performed. Expenditure types are a type of reference data that can be shared across different business units or organizations using reference data sets. To make an expenditure type available for selection when you enter an expenditure batch, you need to assign it to the reference data set that is assigned to the project unit of the transaction. The project unit determines the reference data set for expenditure types. The reference data sets that are assigned to the project expenditure organization, the business unit, or the project-owning organization do not determine the reference data set for expenditure types. These reference data sets may determine other types of reference data such as expenditure categories, expenditure item dates, etc. Reference:

NEW QUESTION # 14

When setting up capitalization options on a project type, you have decided to enable the Require Complete Asset Definition option. If this option is enabled, the "Transfer Assets to Oracle Fusion Assets" process will place asset lines with complete definition into which queue in Oracle Fusion Assets?

- **A. Hold**
- B. Post
- C. New
- D. Posted

Answer: A

Explanation:

If the Require Complete Asset Definition option is enabled on a project type, the "Transfer Assets to Oracle Fusion Assets" process will place asset lines with complete definition into the Hold queue in Oracle Fusion Assets. This queue holds the asset lines that require manual review and approval before they can be posted to the asset register. Asset lines with incomplete definition will be placed into the Error queue in Oracle Fusion Assets. This queue holds the asset lines that have errors or missing information that need to be corrected before they can be transferred to the Hold queue. NEW QUESTION # 15

Your organization performs revenue recognition based on the Labor and Non-labor Burden schedule types. Identify the setup required to enable this kind of revenue recognition. (Choose the best answer.)

- A. Create a revenue method classification with a revenue method of Percent Complete.
- B. Create a revenue method with a revenue method classification of Amount Based.
- C. Create a revenue method classification with a revenue method of Percent Spent.
- **D. Create a revenue method with a revenue method classification of Rate Based.**

Answer: D

Explanation:

To perform revenue recognition based on the Labor and Non-labor Burden schedule types, you need to create a revenue method with a revenue method classification of Rate Based. This classification allows you to use the burdened cost rates of labor and non-labor resources as the basis for revenue recognition. The burdened cost rates are derived from the burden schedules that are assigned to the project or task. Reference:

NEW QUESTION # 16

After completing setups in a source environment, your customer wants to move the setup data to a target environment. Identify the two statements related to task list scope, which you must consider before taking a decision based on the customer requirement. (Choose two.)

- A. Exported setup data can be filtered by specific scope values if the business object has scope enabled for the setup data export.
- B. A task list can be segmented by a scope value and a task can be performed for each qualifying value of the selected object.
- C. Exported setup data cannot be filtered by specific scope values if the business object has scope enabled for the setup data export.
- D. A scope value is used to assign users who can perform a task within an implementation project.

Answer: A,B

NEW QUESTION # 17

Your customer has the following setups on the project plan type that they are using for their projects:

Use Task Planned Dates as Task Assignment Dates = Yes

Automatically Roll Up Task Planned Dates = Yes

Synchronize Task Transaction Dates with Planned Dates = No

With these setups in place, you perform the following actions:

1. Create a new subtask (Sub Task 1) with a start date of 15-Jun-2016 on the project that has as start date of 01-Jul-2016.

2. Create another new subtask (Sub Task 2) after the previous action is saved.

What would the correct behavior of the application be after these actions? (Choose the best answer.)

- A. After the creation of Sub Task 1, Project Start Date would remain unchanged as 01-Jul-2016 and Sub Task 2 would be created with 15-Jun-2016.
- B. After the creation of Sub Task 1, Project Start Date would be changed to 15-Jun-2016 and Sub Task 2 would be created with 15-Jun-2016.
- C. After the creation and saving of Sub Task 1, Task Start Date would be changed to 01-Jul-2016 and Sub Task 2 would be created with 01-Jul-2016.
- D. Project Start Date would remain unchanged as 01-Jul-2016 for both actions but the start dates on both subtasks would remain 15-Jun-2016.

Answer: B
